

LEON COOPER

Professor of Operations Research
Southern Methodist University

DAVID STEINBERG

Assistant Professor of Applied Mathematics
Washington University

Introduction to
METHODS OF
OPTIMIZATION

W. B. SAUNDERS COMPANY
Philadelphia • London • Toronto

CONTENTS

TECHNISCHE HOCHSCHULE DARMSTADT	
Fachbereich 1	
<u>Gesamtbibliothek</u>	
<u>Betriebswirtschaftslehre</u>	
Inventar-Nr. :	_____
Abstell-Nr. :	_____
Sachgebiete:	_____

CHAPTER 1

INTRODUCTION	1
1.1 Introduction	1
1.2 Set Notation	4

CHAPTER 2

MATRIX ALGEBRA	7
2.1 Introduction	7
2.2 Matrices	7
2.3 Operations with Matrices: Addition, Scalar Multiplication, and Subtraction	9
2.4 Multiplication of Matrices	11
2.5 Special Types of Matrices	20
2.6 Partitioned Matrices	24
2.7 Determinants	26
2.8 Rank	32
2.9 Systems of m Equations in n Unknowns	34
2.10 Systems of n Equations in n Unknowns	38
2.11 Linear Independence; Vector Spaces	40
2.12 Quadratic Forms and Definite Matrices	45

CHAPTER 3

n -DIMENSIONAL GEOMETRY AND CONVEX SETS	53
3.1 Introduction: Hyperplanes	53
3.2 Hyperspheres; Open, Closed, and Bounded Sets	61
3.3 Convex Sets	67
3.4 Convex Hulls and Convex Polyhedra	72
3.5 Separating and Supporting Hyperplanes	78

CHAPTER 4

CLASSICAL OPTIMIZATION	87
4.1 Introduction	87
4.2 Functions of One Variable: Mathematical Back- ground	87
4.3 Optimization of Functions of a Single Variable . .	92
4.4 Sufficient Conditions for the Existence of an Optimum	93
4.5 Global Extrema: One Variable	97
4.6 Numerical Problems of Root Finding	99
4.7 Optima of Convex and Concave Functions	101
4.8 Optimization of Functions of Several Variables: Mathematical Background	103
4.9 Optimization of Functions of More Than One Variable	109
4.10 Global Extrema: Many Variables	112
4.11 Optima of Convex and Concave Functions	115
4.12 Constrained Optimization	117
4.13 Examples of Constrained Optimization	124
4.14 Inequality Constraints	127

CHAPTER 5

SEARCH TECHNIQUES: UNCONSTRAINED PROBLEMS	134
5.1 Introduction	134
5.2 The One-Dimensional Search Problem	136
5.3 Simultaneous Methods: One-Dimensional Search	137
5.4 One-Dimensional Sequential Methods	140
5.5 Dichotomous Search	141
5.6 Equal Interval Search	144
5.7 Fibonacci Search	147
5.8 The Multidimensional Search Problem	151
5.9 Simultaneous Methods—Multidimensional Search	153
5.10 Multidimensional Sequential Methods	156
5.11 Multivariate Grid Search	156
5.12 Univariate Search Method	158
5.13 Powell's Method	162
5.14 Method of Steepest Descent	166
5.15 The Fletcher-Powell Method	169
5.16 Pattern Search	173

CHAPTER 6

LINEAR PROGRAMMING	183
6.1 Introduction	183

6.2	Geometric Interpretation of Linear Programming	187
6.3	How Not To Solve a Linear Programming Problem.....	195
6.4	The Simplex Method: Basic Theorems.....	197
6.5	The Simplex Method: Theory.....	202
6.6	The Simplex Method: Computational Techniques	214
CHAPTER 7		
LINEAR PROGRAMMING: ADDITIONAL TOPICS.....		231
7.1	The Theory of Duality in Linear Programming..	231
7.2	Other Simplex Algorithms.....	239
7.3	The Decomposition Principle.....	246
7.4	Postoptimal Analysis.....	250
7.5	The Transportation Problem.....	253
7.6	Network Flow Problems.....	270
CHAPTER 8		
NONLINEAR PROGRAMMING.....		286
8.1	Introduction.....	286
8.2	Convex Constraint Sets.....	287
8.3	The Kuhn-Tucker Conditions.....	290
8.4	Quadratic Programming.....	295
8.5	Separable Programming.....	301
8.6	Gradient Methods.....	308
8.7	The Method of Griffith and Stewart.....	311
CHAPTER 9		
INTEGER PROGRAMMING.....		321
9.1	Introduction.....	321
9.2	Formulation of Models as Integer Programming Problems.....	323
9.3	Gomory's Algorithm.....	328
9.4	The Bounded Variable Algorithm.....	334
9.5	Branch and Bound Methods.....	340
9.6	Dynamic Programming: Introduction.....	350
9.7	Dynamic Programming: General Discussion; An Example.....	356
ANSWERS TO SELECTED EXERCISES.....		369
INDEX.....		377
