Resource Extraction and Market Structure

Fachbereich Mathematik Technische Hochschule Darmstädt Bibliothek

Inv. Nr. \$20751

Springer-Verlag Berlin Heidelberg New York Tokyo

CONTENTS

CHAPTER I

DYNAM	IC NODELS OF RESOURCE EXTRACTION IN MARKETS OF MONOPOLY OR	
PURE C	COMPETITION WITH FULL INFORMATION	
1.	Hotelling's Model	1
2.	Optimal Extraction Rates and Exploration	3
2.1	Pure Competition	4
2.2	Monopoly	8
3.	Optimal Extraction Rates and Constant Elasticity of Demand	9
4.	Market Structure and Optimal Depletion Rates	12
4.1	Pure Competition	12
4.2	Monopoly	15
5.	Extraction of an Exhaustible Resource and Production of a	
	Substitute	16
5.1	Social Optimum	17
5.2	Extraction of the Resource and Production of the Substitute	
	by the same Monopoly	18
5.3	Many Owners of the Resource and Production of the Substitute	
	by Monopoly	20
5.4	Many Owners of the Resource and Production of the Substitute	
	by all	22
6.	Extraction of Durable Exhaustible Resources	22
6.1	Discrete Time	22
6.2	Continuous Time	25
6.2.1	Pure Competition	26
6.2.2	Monopoly	28
7.	Conclusions	29
CHAPT	ER II	31
DYNAM	IC MODELS WITH UNCERTAINTY AND MONOPOLISTIC MARKETS OR PURE	
COMPE'	TITION	
1.	Optimal Extraction Rates and Uncertainty with Respect to	

R&D towards Future Technologies 1.1 Exogenous Technical Progress 31 31

1

1.1.1 Basic Model 32 First Extension: Production .34 1.1.2 1.1.3 Second Extension: Exhaustible Resources 35 1.1.4 Third Extension: Uncertainty about the Future Technological 37 Development Endogenous Technical Progress 39 1.2 1.2.1. Basic Model 39 Modification of the Basic Model 1.2.2 47 1.2.3 49~ Example with Exponentially Distributed Z 2. 53 Optimal Extraction Rates and Unknown Reserves 2.1 Monopolistic Extraction Rates Depending on Time only 54 Monopolistic Extraction Rates Depending on Time and 2.2 Quantities already Extracted 56 2.3 Optimal Extraction Rates and Pure Competition 58 2.3.1 Basic Model 58 2.3.2 Example with Two Suppliers 58 2.4 Optimal Extraction Rates from Consumer's View 59 2.4.1 Basic Model 59 2.4.2 Example with Exponentially Distributed Z 61 2.5 Pure Competition and Optimal Extraction 61 3. Optimal Extraction Rates and Unknown Costs of the Development of a Substitute 63 3.1 One-period Analysis and Monopoly 63 One-period Analysis and Pure Competition 3.2 66 3.3 Two-period Analysis 67 3.3.1 Optimal Extraction and One Decision Maker 67 3.3.1.1 Basic Model 67 3.3.1.2 Example with Linear Demand 71 Optimal Extraction and Pure Competition 71 3.3.2 3.3.3 Extraction of the Resource and Production of the Substitute by Exactly One Monopoly 73 4. Conclusions 75 CHAPTER III. 77

SHORT INTRODUCTION TO THE THEORY OF DIFFERENTIAL GAMES

77

VIII

CHAPTER IV

DYNA	AMIC MODELS OF RESOURCE EXTRACTION AND DUOPOLISTIC MARKETS	82
1.	An Introductory Duopoly Model with Production Strategies	83
2.	Duopoly with Price Strategies and Exploration	87
2.1	Open-loop Controls	88
2.2	Closed-loop Controls	92
3.	A Duopoly Model with Quantity Strategies	.96
3.1	Introduction of the Model	96
3.2	Specialization of the Model: Linear-Ouadratic Differential	
	Game	. 98
4.	Cartelization and Optimal Extraction of Exhaustible Resources	104
4.1	Pure Competition	104
4.2	Monopolistic Behaviour of the Cartel	106
4.3	Implications of Cartelization to the Profits of the Non-	100
	Cartel	109
5.	Oligopoly with Discrete Time Parameter	113
6	Conclusions	110
		117
		121
		121
01.10	SOPOLISTIC EXTRACTION WITH CONTINUOUS TIME.	121
1	Basic Model with Ouentity Strategies	122
1 1	Introduction of the Model	122
1 2	Algorithm for the Determination of a Nash Equilibrium	122
2.2	Specializations of the Pacia Model	120
2.	Bind December Charle	130
2.1	rixed Resource Stock	130
2.2	Deterministic Expandable Resource Stocks	142
3.	Oligopoly and Price Strategies	144
4.	Conclusions	148
