Global Gravity Field Determination Using the GPS Measurements Made Onboard the Low Earth Orbiting Satellite CHAMP

Lars Prange

2010

Contents

List of Figures	v
List of Tables	ix
Frequently Used Acronyms	xi
1 Introduction	1
2 Measuring the Earth's gravity field	5
2.1 Terrestrial geodesy	5
2.2 Satellite geodesy	6
2.2.1 Optical observations	6
2.2.2 Microwave methods	7
2.2.3 Satellite Laser Ranging (SLR)	9
2.2.4 Satellite altimetry	10
2.2.5 High-low SST of CHAMP	12
2.2.6 Low-low SST with GRACE	16
2.2.7 Satellite gradiometry with GOCE	17
3 Orbit determination and gravity field recovery	19
3.1 Least squares adjustment	19
3.1.1 Basic concept	19
3.1.2 LSA techniques	21
3.2 Coordinate systems	24
3.2.1 Geocentric quasi-inertial system	24
3.2.2 Earth-fixed coordinate system	24
3.2.3 Satellite-fixed coordinate system	25
3.3 Satellite orbits	25
3.3.1 Dynamic orbits	26
3.3.2 Reduced-dynamic orbits	28
3.3.3 Kinematic orbits	28
3.4 The equation of motion	29
3.5 Spherical harmonic representation of the gravitational potential	30
3.6 Orbit and gravity field determination	33
3.6.1 Numerical integration of the primary equations	34
3.6.2 Numerical integration of the variational equations	35

4	Global Positioning System - GPS	37
4.1	History	37
4.2	Basic measurement principle	37
4.3	GPS orbit constellation and satellites	38
4.4	GPS signals	38
4.5	Modeling GPS observables	40
4.5.1	Observation equations	40
4.5.2	Observation differences	43
4.5.3	Linear combinations	44
4.6	The International GNSS Service (IGS)	44
4.7	Bernese GPS Software (BSW)	46
5	Data processing	49
5.1	Generation of the AIUB-CHAMP01S gravity field model	50
5.1.1	Data Screening	51
5.1.2	Gravity field recovery	52
5.1.3	The AIUB-CHAMP01S gravity field model	54
5.2	Generation of the AIUB-CHAMP02S gravity field model	57
5.2.1	GNSS model changes	57
5.2.2	GPS orbit reprocessing	59
5.2.3	GPS satellite clock reprocessing	60
5.2.4	CHAMP orbit determination	61
5.2.5	AIUB-CHAMP02S gravity field recovery	65
5.2.6	The AIUB-CHAMP02S gravity field model	66
5.3	Generation of the AIUB-CHAMP03S gravity field model	68
5.3.1	Estimation of high-rate GPS satellite clock corrections	70
5.3.2	CHAMP orbit determination	71
5.3.3	Data screening and gravity field recovery	74
5.3.4	The AIUB-CHAMP03S gravity field model	76
6	Studies and experiments	81
6.1	Studies related to AIUB-CHAMP01S	81
6.1.1	Orbit modeling with arc-specific parameters	82
6.1.2	Modeling of non-gravitational perturbations with dynamic force models	99
6.1.3	Accelerometer data	102
6.1.4	Simulation study	108
6.1.5	Observation weights	119
6.1.6	Influence of the a priori gravity field model	121
6.1.7	Screening the kinematic positions	122
6.1.8	Quality variations in monthly gravity field solutions	125
6.1.9	Summary and discussion of the AIUB-CHAMP01S-related studies	128

6.2	Experiments related to AIUB-CHAMP02S	131
6.2.1	The impact of GNSS model changes	131
6.2.2	Inconsistency in the low degree harmonics	133
6.2.3	Simulation study	139
6.2.4	Latitude dependency of the observation scenario	141
6.2.5	Summary and conclusion of the AIUB-CHAMP02S-related studies	144
6.3	Experiments related to AIUB-CHAMP03S	145
6.3.1	Influence of empirical PCV-models on gravity field recovery using CHAMP GPS data	146
6.3.2	Elevation-dependent weighting	151
6.3.3	Observation sampling	154
6.3.4	Inter-epoch correlations of kinematic positions	158
6.3.5	Position differences vs. positions	162
6.3.6	Impact of observations of eclipsing GPS satellites on CHAMP grav- ity field recovery	166
6.3.7	Temporal variations of the Earth's gravity field	168
6.3.8	Recovery of the low degree harmonics	175
6.3.9	Summary of the experiments related to AIUB-CHAMP03S	177
7	Gravity field validation	179
7.1	Validation methods	179
7.1.1	Formal errors	179
7.1.2	Comparison with other gravity field models	181
7.1.3	Comparison with ground data	182
7.1.4	Altimetry data	183
7.1.5	Orbit determination	183
7.2	Validation of AIUB-CHAMP01S	184
7.2.1	Internal validation	184
7.2.2	External validation	187
7.3	Validation of AIUB-CHAMP02S	189
7.3.1	Internal validation	189
7.3.2	External validation	190
7.4	Validation of AIUB-CHAMP03S	192
7.4.1	Internal validation	192
7.4.2	External validation	194
8	Summary and conclusions	199
