Preface v

one What Is Economics All About? 1

1 What Is Economics? 3

IDEAS FOR BEYOND THE FINAL EXAM 4

Idea 1: The Illusion of High Interest Rates Idea 2: Economic Principles to Protect the Environment
Idea 3: Inflation and Unemployment Idea 4: Increasing Equality May Require Sacrificing Output
Idea 5: The Crisis in Urban Services Idea 6: Interferences with the "Laws" of Supply and Demand
Idea 7: A New Way to Measure Costs Idea 8: The Surprising Principle of Comparative Advantage
Idea 9: The Importance of Marginal Analysis Idea 10: Stabilizing the Economy Without "Big Government"
Idea 11: The Consequences of Budget Deficits Idea 12: Why Speculation Can Be a Good Thing
Epilogue

INSIDE THE ECONOMIST'S TOOL KIT 10

What Economists Do The Role of Abstraction Some Illustrations of the Need for Abstraction
The Role of Economic Theory What Is an Economic "Model"? The Concept of "Rational" Behavior
Reasons for Disagreements: Imperfect Information and Value Judgments
The Economist's Odd Vocabulary

2 The Use and Misuse of Graphs 20

GRAPHS USED IN ECONOMIC ANALYSIS 21

Two-Variable Diagrams The Definition and Measurement of Slope
Rays Through the Origin and 45° Lines Squeezing Three Dimensions into Two: Contour Maps

PERILS IN THE INTERPRETATION OF GRAPHS 27

The Interpretation of Growth Trends Distorting Trends by Choice of the Time Period
Dangers of Omitting the Origin Unreliability of Steepness and Choice of Units

Contents

3 Scarcity and Choice: *The Economic Problem* 37

The "Indispensable Necessity" Syndrome Scarcity, Choice, and Opportunity Cost
Scarcity and Choice for the Household Geometry of the Available Choices: The Budget Line
 Scarcity and Choice for the Firm Scarcity and Choice for the Government
Scarcity and Choice in Other Parts of the Economy Scarcity and Choice for the Whole Economy
Opportunity Cost Once More Application: Unemployment and Other Wastes of Resources
 Application: Economic Growth

4 Supply and Demand: An Initial Look 50

Applications: Attempts to Control the Price Mechanism The Demand Curve
The Supply Curve Demand, Supply, and Price Application: Who Really Pays a Sales Tax?
 Shifts in Demand and Supply Curves Attempts to Restrain the Market Mechanism
Regulation of Taxicabs in Chicago Disadvantages of Interference with the Market Mechanism

two Introduction to Macroeconomics: Basic Concepts 67

5 Macroeconomics and Microeconomics 69

Drawing a Line Between Macroeconomics and Microeconomics Aggregation and Macroeconomics
 The Line of Demarcation Revisited Supply and Demand in Macroeconomics
The Gross National Product The Economy on a Roller Coaster The Great Depression of the 1930s
 The American Economy since World War II The Great Recession and Its Aftermath
 The Problem of Macroeconomic Stabilization

6 Unemployment and Inflation: The Twin Evils of Macroeconomics 85

THE SOCIAL COSTS OF UNEMPLOYMENT 86

Unemployment Insurance: The Invaluable Cushion The Economic Costs of High Unemployment
Counting the Unemployed: The Official Statistics How Much Employment Is "Full Employment"?

THE SOCIAL COSTS OF INFLATION 95

Inflation: The Myth and the Reality Inflation as a Redistributor of Income and Wealth
Real Versus Nominal Interest Rates Usury Laws, Interest Rate Ceilings, and Other Legal Impediments
Money Illusion and Interest Rates Other Costs of Inflation Creeping Versus Galloping Inflation
 The Costs of Creeping Versus Galloping Inflation
Creeping Inflation Does Not Necessarily Lead to Galloping Inflation

APPENDIX 107

HOW STATISTICIANS MEASURE INFLATION

Index Numbers for Inflation The Consumer Price Index
How to Use a Price Index to "Deflate" Monetary Figures The GNP Deflator

Contents

7 Aggregate Demand and the Powerful Consumer 112

- Aggregate Demand, National Product, and National Income
- The Circular Flow of Spending, Production, and Income
- Demand Management and the Powerful Consumer
- Consumer Spending and Income: The Important Relationship
- The Consumption Function and the Marginal Propensity to Consume
- Movements Along Versus Shifts of the Consumption Function Are All Consumers Alike?
- Why Tax Policy Failed in 1968 and 1975 The Predictability of Consumer Behavior

APPENDIX 131

THE SAVING FUNCTION AND THE MARGINAL PROPENSITY TO SAVE

three The National Economy: Income Determination and Stabilization Policy 135

8 Income Determination: Unemployment, Inflation, or Both? 137

- The Extreme Variability of Investment A Simplified Circular Flow
- The Meaning of Equilibrium Income Income Determination: The Equilibrium Level of GNP
- Constructing the Expenditure Schedule The Mechanics of Income Determination
- Equilibrium Income and the Price Level Equilibrium Income and Full Employment
- Adjusting to an Inflationary Gap: Inflation Demand Inflation and Stagflation
- An Example from Recent History: The United States from 1966 to 1970
- Adjusting to a Recessionary Gap: Deflation or Unemployment?
- Does the Economy Have a Self-Correcting Mechanism? The Coordination of Saving and Investment

APPENDIX 160

THE SAVING AND INVESTMENT APPROACH

- Graphical Analysis Induced Investment

9 Multiplier Analysis: Changes in Output and Prices 163

- The Magic of the Multiplier Demystifying the Multiplier: How It Works
- Algebraic Statement of the Multiplier The Multiplier Effect of Consumer Spending
- Aggregate Supply and Prices: A Digression Inflation and the Multiplier
- The Multiplier in Reverse The Paradox of Thrift

10 Managing Aggregate Demand Through Fiscal Policy 177

- How Budget Decisions Are Made Government Purchases and Equilibrium Income
- Income Taxes and the Consumption Schedule Tax Policy and Equilibrium Income
- Multipliers for Tax Policy Government Transfer Payments and Fiscal Policy
- The Multiplier Revisited Automatic Stabilizers Planning Expansive Fiscal Policy
- Planning Restrictive Fiscal Policy The Choice Between Spending Policy and Tax Policy
- Should the Budget Be Balanced? The Inflationary Effects of Budget Deficits
- Some Harsh Realities

Contents

11 Banking and the Creation of Money 197

Policy Issue: Why Regulate the Banks? Barter Versus Monetary Exchange
The Conceptual Definition of Money What Serves as Money?
How the Quantity of Money Is Measured How Banking Began
Principles of Bank Management: Profits Versus Safety Bank Regulation
How Bankers Keep Books The Limits to Money Creation by a Single Bank
Multiple Money Creation by a Series of Banks
The Process in Reverse: Multiple Contractions of the Money Supply
Why the Money Creation Formula Is Oversimplified

12 Central Banking and Monetary Policy 217

The Federal Reserve System: Origins and Structure The Independence of the Fed
Controlling the Money Supply: Reserve Requirements Some Difficulties with the Reserve Ratio
Controlling the Money Supply: Open Market Operations
Controlling the Money Supply: Lending to Banks
Tightening Monetary Control: Some Suggested Reforms
The Money Supply Mechanism: A Summary The Demand for Money
Equilibrium in the Money Market Monetary Policy and Interest Rates
Controlling the Money Supply Versus Controlling Interest Rates: The Policy Dilemma
What Should the Fed Do? Conclusion and Preview

13 Money and the National Economy 235

Money and Income: The Concept of Velocity The Quantity Theory of Money
The Determinants of Velocity Monetarism: The Quantity Theory Modernized
Money and Aggregate Demand in the Keynesian Model Monetary Policy in the Keynesian Model
Money and the Price Level: The Complete Keynesian Model
Why the Aggregate Demand Curve Slopes Downward Fiscal Policy and Interest Rates
Reconciling the Keynesian and Monetarist Views The Crowding-Out Controversy

14 The Keynesian–Monetarist Debate over Stabilization Policy 254

Keynesians Versus Monetarists: Fiscal Versus Monetary Policy Lags in Fiscal and Monetary Policy
Keynesians Versus Monetarists: Should the Government Intervene?
Lags and the Rules-Versus-Discretion Debate
Stabilization Policy: Discretionary Measures or Fixed Rules?
Other Dimensions of the Rules-Versus-Discretion Debate
Economic Forecasting: The Use of Econometric Models
Other Techniques of Economic Forecasting The Accuracy of Economic Forecasts
Keynesians Versus Monetarists: The Aggregate Supply Curve

15 The Trade-Off Between Inflation and Unemployment 274

Demand Inflation: A Review Observing the Trade-Off: The Question of Timing
The Economy's Self-Correcting Mechanism: More Review
Fighting Recessions Through Fiscal and Monetary Policy Ford Versus Carter: Who Was Right?
Fighting Demand Inflation Through Fiscal and Monetary Policy A Recapitulation
The Phillips Curve Supply Inflation The Policymaker's Response to Supply Inflation

Contents

16	Further Controversies over Stabilization Policy	294
CAN WE IMPROVE THE TRADE-OFF BETWEEN UNEMPLOYMENT AND INFLATION? 295		
Incomes Policy	Other Policies Designed to Shift the Trade-Off Indexing	Tax-Based Incomes Policy Indexing and the Social Costs of Inflation
ARE THERE POLITICALLY INDUCED BUSINESS CYCLES? 302		
Lags in Economic Behavior	The Political Business Cycle: Theory The Political Business Cycle: Evidence	
IS THE NATIONAL DEBT A BURDEN? 306		
Some Facts about the National Debt	Bogus Arguments about the Burden of the Debt The Real Burden of the National Debt	
17	Measurement in Macroeconomics	314
National Income Accounting	The Gross National Product: Definition Exceptions to the Rules	
GNP as the Sum of All Factor Payments	GNP as the Sum of Final Goods and Services GNP as the Sum of Values Added	
Alternative Measures of the Income of the Nation	Limitations of the GNP: What GNP Is Not From Little Acorns, Big Oak Trees Grow	
	Econometric Models	
four	Consumers, Firms, and Markets: Introduction to Microeconomics	331
18	The Nature of Consumer Demand	333
A Real Application of Demand Analysis	Demand Depends on Many Variables	
The Demand Curve	The Time Dimension of the Demand Curve and Decision Making	
Aggregation of Demand Curves	Responsiveness to Price Changes: Elasticity of Demand	
Elasticity, Price Changes, and Revenues	Substitutes and Complements	
	Statistical Analysis of Demand Relationships	
	Our Real Illustration: The Advertising–Demand Relationship	
19	The Common Sense of Consumer Choice	349
A Puzzle: Rising Wages and Falling Supply of Labor	Marginal Utility	
The “Law” of Diminishing Marginal Utility	The Optimal Amount for a Consumer to Buy	
Marginal Utility and Demand Curves	Income and Demand: Inferior Goods	
Income and Substitution Effects of a Price Change	Application: The Labor-Supply Paradox	
	APPENDIX	360
	INDIFFERENCE CURVE ANALYSIS	

Contents

Geometry of the Available Choices: The Budget Line	Properties of the Budget Line
What the Consumer Prefers: The Indifference Curve	Properties of the Indifference Curves
The Slopes of an Indifference Curve and the Budget Line	The Consumer's Choice
Consequences of Price Changes	Consequences of Income Changes: Inferior Goods

20 The Common Sense of Business Decisions: Outputs and Prices 371

Two Illustrative Cases	Price and Quantity—One Decision, Not Two
Profit Maximization as the Objective of Firms	
Average and Total Revenue as Affected by Quantity Supplied	Average and Total Cost
Total Profit: The Important Difference	Digression: Do Firms Always Try to Make Optimal Decisions?
Marginal Profit: Guide to an Optimum	Geometric Interpretation
Some Possible Misinterpretations	The Arithmetic of Optimal Output—Price Decisions
Fixed and Variable Costs	The Relationship Between Total, Average, and Marginal Data
Graphic Representation of Marginal and Average Curves	
Marginal Analysis in Real Decision Problems	
Conclusion: The Fundamental Role of Marginal Analysis	

21 The Common Sense of Business Decisions: Input Choices 392

The Crucial Contribution of Marginal Analysis	A Puzzle: Side Effects of Regulatory Profit Ceilings
Another Puzzle: Evidence on Economies of Scale	
Inputs and Outputs: The "Law" of Diminishing Returns	
Diminishing Returns and Marginal Physical Product	
Diminishing Returns and the Population Problem	
Marginal Product and the Optimal Quantity of an Input	Diminishing Returns Once More
Choice of Input Proportions: The Production Function	
Diminishing Returns and Economies of Scale	The Choice of Input Combinations
Rate of Return Regulation and Input Proportions	
Input Prices, Production Functions, and Cost Curves	
The Time Element: Short, Intermediate, and Long Runs	Historical Versus Analytical Cost Curves

APPENDIX 411

PRODUCTION INDIFFERENCE CURVES

Characteristics of the Production Indifference Curves	The Choice of Input Combinations
Effects of Changes in Input Prices	

— 22 The Firm in the Marketplace 417

Application: Advertising under Competition	Pure Competition
The Competitive Firm and the Competitive Industry	The Competitive Firm and Its Demand Curve
Short-Run Equilibrium of the Competitive Firm	Long-Run Equilibrium of the Competitive Firm
Zero Economic Profit: The Opportunity Cost of Capital	
Equilibrium of the Firm under Monopolistic Competition	
Excess Capacity and Monopolistic Competition	Oligopoly
Why Oligopolistic Behavior Is So Hard to Analyze	The Kinked Demand Curve Model
The Game-Theory Approach	Advertising, Oligopoly, and Pure Competition

Contents

23 The Industry under Pure Competition and Monopoly 434

Application: Tax Shifting and Pollution Control
Industry Demand and Supply under Perfect Competition
Supply–Demand Equilibrium of the Competitive Industry
Why We Cannot Analyze the Industry under Monopolistic Competition The Pure Monopoly
Scale Economies and Natural Monopoly
Some Further Comparisons Between Monopoly and Competition
Monopoly and the Allocation of Resources Monopoly and the Shifting of Pollution Charges

five Big Business and Public Policy 447

24 The Corporation and the Stock Market 449

Firms in the United States Proprietorships Partnerships Corporations
Financing Corporate Activity The Financing of Corporate Activity: Stocks and Bonds
Bond Prices and Interest Rates Types of Stocks and Bonds
Other Types of Securities: Options Buying Stocks and Bonds and Following Their Performance
Stock Exchanges and Their Functions Stock Exchanges and Corporate Capital Needs
The Issue of Speculation Stock Prices as Random Walks

25 Limiting Market Power: Antitrust Policy 471

The Public Image of Business When Antitrust Laws Were Born The Antitrust Laws
Developments since the 1930s Issues in Concentration of Industry
Evidence on Concentration of Industry The Pros and Cons of Bigness
Other Government Programs Related to Bigness Issues in Antitrust Policy

26 Limiting Market Power: Regulation of Industry 487

Monopoly, Regulation, and Nationalization Practical Problem: Price Floors Versus Price Ceilings
Who Is Regulated by Which Agencies? Why Regulation?
Has Rate Regulation Made a Difference? Why Should Regulators Raise Prices?
Marginal Versus Full-Cost Rate Floors Problems of the Regulatory Process
Modifications in Regulatory Arrangements: Preserving Productive Efficiency
Modifications of Regulatory Arrangements: Price Floors Revamping the Legal Procedures
Some Final Comments on the Regulatory Process A Word on Nationalization

six Factor Markets and the Distribution of Income 507

27 The Labor Market and Wages 509

Are Wages Too Low? Minimum Wage Laws and Unemployment
Marginal Productivity and the Demand for Labor
The Negative Slope of the Derived Demand Curve for Labor The Supply of Labor

Contents

The Competitive Determination of Wages	Why Wages Differ	
Labor as Capital: The Theory of Human Capital	The Effects of Minimum Wage Legislation	
Unionism in America	Unions as a Labor Monopony	Monopsony and Bilateral Monopony
Collective Bargaining and Strikes	Collective Bargaining in the Public Sector	

APPENDIX 531

THE EFFECTS OF MINIMUM WAGES AND UNIONS UNDER MONOPSONY

The Hiring Decisions of a Monopsonist	Minimum Wages under Monopsony
Unions under Monopsony	

28 Rent, Interest, and Profits 536

Rent: What Determines Johnny Carson's Salary?	The Rent of Land	
Rent Controls: The Misplaced Analogy	Are Interest Rates Too High? The Issue of Usury Laws	
The Demand for Funds	Discounting and Present Value	
The Downward-Sloping Demand for Funds	Supply of Funds and Determination of Interest Rate	
Are Profits Too High?	The Issue of Profits Taxation	Reasons for Profit
Profits and Profits Taxation	Marginal Productivity Theory in General	

APPENDIX 553

DAVID RICARDO'S THEORY OF INCOME DISTRIBUTION

29 Poverty, Inequality, and Discrimination 556

The Politics and Economics of Inequality	The Facts: Poverty	The Facts: Inequality
Depicting Income Distributions: The Lorenz Curve	The Facts: Discrimination	
Some Reasons for Unequal Incomes	The Optimal Amount of Inequality	
The Trade-Off Between Equality and Efficiency	Policies to Combat Poverty	
The Negative Income Tax	The Negative Income Tax and Work Incentives	
The Personal Income Tax	Some Tax Loopholes	Death Duties and Other Taxes
Policies to Combat Discrimination		

seven Resource Allocation: The Invisible Hand and Visible Interferences 579

30 The Price System and the Case for Laissez Faire 581

Scarcity and the Need to Coordinate Economic Decisions	Pricing and Resource Allocation
An Illustration: Pricing of Bridges near San Francisco	Three Coordination Tasks in the Economy
Input-Output Analysis: The Arithmetic of Production Planning	Supply, Demand, and Prices
The Concept of Efficient Resource Allocation	Efficient Output Selection: What to Produce
Fairness Versus Efficiency: The San Francisco Bridge Prices	
Toward Assessment of the Price Mechanism	

APPENDIX 599

THE INVISIBLE HAND IN THE DISTRIBUTION OF GOODS AND IN PRODUCTION PLANNING

Efficient Distribution of Commodities: Who Gets What?	
Efficient Production Planning: Allocation of Inputs	Conclusion

Contents

31 Shortcomings of the Market Mechanism and Government Attempts to Remedy Them 603

Three Major Problems That Beset the Market Mechanism
The Basic Problem of Resource Allocation: An Alternative Interpretation Externalities
Public Goods Evaluative Comments

32 Taxation and Resource Allocation 621

Taxes in America: An Overview The Federal Tax System
The Payroll Tax and the Social Security System The State and Local Tax System
Fiscal Federalism First Concept of Equity in Taxation: Horizontal Equity
Second Concept of Equity in Taxation: Vertical Equity
Third Concept of Equity in Taxation: The Benefits Principle The Concept of Efficiency in Taxation
Shifting the Burden of Taxation: Tax Incidence The Incidence of Excise Taxes
The Incidence of the Payroll Tax The Incidence of the Corporate Income Tax
When Taxation Can Improve Efficiency Equity, Efficiency, and the Optimal Tax

eight Economic Growth and the Quality of Life 645

33 Economic Growth: Causes, Virtues, and Vices 647

Some Issues in the Analysis of Growth How to Measure Growth: Total Output or Output Per Capita?
On Growth in Population: Is Less Really More?
The Crowded Planet: Exponential Population Growth
Exponential Resource Depletion and Pollution Is More Growth Really Better?
Requirements for Increased Growth
Accumulating Capital by Sacrificing Consumption: The Case of Soviet Russia
The Payoff to Growth: Higher Consumption in the Future
Growth Without Sacrificing Consumption: Something for Nothing?
Saving as the Enemy of Growth: The Paradox of Thrift Resolution of the Saving Enigma

34 The Economics of Environmental Protection 666

The Delaware: How *Not* to Clean Up a River
The Environment in Perspective: Is Everything Getting Steadily Worse?
The Law of Conservation of Matter and Energy The Edifice Complex
The Environment as a Public Good Pollution as an Externality
Supply-Demand Analysis of Environmental Problems Basic Approaches to Environmental Policy
Voluntarism Direct Controls Versus Pollution Charges
Other Financial Devices to Protect the Environment
On the Equity and Cost of Some Current Programs

Contents

35 Economic Problems of the Cities 686

Some Sources of Urban Problems Policy Problem: Urban Renewal
Economic Functions of a City Technological Change and the City's Lost Advantages
 Suburban Homes for Upper Income Groups and Quality of Services
 Why Do the Wealthy Have Both Lower Tax Rates and Better Services?
The Courts and Equal Opportunity Exodus of Taxpayers as a Cumulative Process
The Cost Disease of Municipal Services Externalities and the Ailments of the City
 Rent Control in New York City Rent Controls: General Conclusions
Some Policy Proposals: Poverty and Unemployment Some Proposals on Housing

nine

The World Economy

707

36 International Trade and Comparative Advantage 709

Issue: The Competition of "Cheap Foreign Labor" Why Trade?
International Versus Intranational Trade: Mobility of Inputs Mutual Gains from Trade
Comparative Advantage: The Fundamental Principle of Specialization
 The Arithmetic of Comparative Advantage
 Comparative Advantage and Competition of Cheap Foreign Labor
 Supply-Demand Equilibrium and Pricing in Foreign Trade
Tariffs, Quotas, and Other Interferences with Trade Why Inhibit Trade?
Restricting Trade to Protect Particular Industries What Import Price Levels Benefit a Country?
Conclusion: A Last Look at the "Cheap Foreign Labor" Argument

37 The International Monetary System: Order or Disorder? 730

What Are Exchange Rates? Exchange Rate Determination in a Free Market
 The Purchasing-Power Parity Theory: The Long Run
 Economic Activity and Exchange Rates: The Medium Run
 Interest Rates and Exchange Rates: The Short Run
 Market Determination of Exchange Rates: Summary
Fixed Exchange Rates and the Definition of "The Balance of Payments"
Defining the Balance of Payments in Practice The U.S. Balance of Payments Accounts
 A Bit of History: The Gold Standard
 The Bretton Woods System and the International Monetary Fund
Adjustment Mechanisms under the Bretton Woods System Why Try to Fix Exchange Rates?
 The Current Mixed System Recent Developments in International Financial Markets
 Concluding Remark: Where Do We Go from Here?

38 Problems of the Less Developed Countries 752

Living in the LDCs Recent Trends Impediments to Prosperity in the LDCs
What LDCs Can Do to Help Themselves How the Industrialized Economies Can Help the LDCs
 Loans and Grants by the United States and Others

39 Marxian Economics 769

Application: Rescuing Firms from Bankruptcy	The Marxian Framework—Historical Materialism
On the Nature of Communist Society	Commodities, Productive Labor, and Capital
Marx's Value Theory: Surplus as the Source of Accumulation	The Ethics of Surplus Value
The Marxian Analysis of Pricing and Profit	The Purpose of the Marxian Price–Value Analysis
Alienation	Will the Business Cycle Kill Capitalism?
Marxian Crisis Theory	Conclusion
Bankruptcy and the Vigor of Capitalist Society	

40 Comparative Economic Systems: What Are the Choices? 785

The Challenge to Modern Capitalism	Economic Systems: Two Important Distinctions
The Market or the Plan? Some Issues	The Market or the Plan? The Scoreboard
Capitalism or Socialism?	Socialism, Planning, and Freedom
A Catalog of Blueprints	
Sweden's Welfare State	France: Planning by Consensus
Workers' Management in Yugoslavia	
The Soviet Economy: Historical Background	Central Planning in the Command Economy
Markets and Prices in Soviet Economic Life	The Five-Year and One-Year Plans
Performance and Problems of Soviet Planning	Revolutionary Communism: China

41 Dissenting Opinions: Conservative, Moderate, and Radical 813

The Libertarian Credo	The Libertarian Economics of Milton Friedman
Libertarian Economics and Public Policy	John Kenneth Galbraith: The Economist as Iconoclast
The Galbraithian Critique of Conventional Economic Theory	
The Galbraithian Critique of the American Economy	A Critique of the Critique
The Radical Economics of the New Left	
The Problem with Mainstream Economics: Point and Counterpoint	
The Radical Critique of the American Economy	What Is the Radical Alternative?

42 Economic Problems of the Next Century 835

The Future of Entrepreneurship	Protection of the Firm and Emasculation of the Market
Patterns of Land Use	Quality of Life and the Personal Services
Are We Running Out of Everything?	The Stubborn Trade-Off Between Inflation and Unemployment
The Struggle for Equality	In Closing
