# Contents

	<i>Paragraphs</i>
<b>Introduction</b>	1–3
<b>Definition and Interpretation</b>	4–5
<b>Requirements for use with the Noise Insulation Regulations</b>	6–9
<b>Section I – The prediction method (general procedures)</b>	10–29
<b>Dividing the road scheme into segments</b>	11
<b>Calculating the basic noise level for a road segment</b>	12–16
Traffic flow	13
Percentage heavy vehicles and traffic speed	14
Gradient	15
Road surface	16
<b>Propagation</b>	17–24
Distance correction	18
Unobstructed propagation	19
Ground cover correction	20
Obstructed propagation	21
Barriers	22
Safety fences	23
Buildings	24
<b>Site layout</b>	25–28
Reflection effects	26
Side roads	27
Size of segment	28
<b>Combining contributions from segments</b>	29
<b>Section II – The prediction method (additional procedures)</b>	30–36
Low traffic flows	30
End of scheme	31
Curved roads	32
Multiple roads including road junctions	33
Houses fronting onto a main road	34
Multiple screening	35
Combined screening and reflection effects	36
<b>Section III – The measurement method</b>	37–45
When to measure	38
Physical conditions for measurement	39
Measuring equipment	40
Measurement procedure	41
Analysis of data	42
<b>Shortened measurement procedure</b>	43–44
<b>Comparative measurements</b>	45
<b>Appendices</b>	
Type specification for measuring equipment	<i>Appendix 1</i>
Calibration of equipment	<i>Appendix 2</i>
Glossary of symbols	<i>Appendix 3</i>
<b>Procedural charts</b>	<i>Charts 1–16</i>
<b>Examples</b>	<i>Annexes 1–18</i>
