CONTENTS

Preface xiii

PART I PRELIMINARIES

1. Introduction 3

1.1 Scheduling Is Strategic!, 3
1.2 What Is Scheduling?, 6
1.3 Levels of Scheduling, 11
1.4 Types of Level 4 Scheduling Environments, 15

2. Approaches to Scheduling 20

2.1 Overview, 20
2.2 Past Approaches, 22
2.3 Newer Approaches, 26
2.4 Bottleneck Dynamics, 30

3. Book Summary 36

3.1 Preliminaries, 36
3.2 Book Summary, 36
3.3 Future Directions, 44

PART II ONE-MACHINE PROBLEMS

4. Single Machine: Foundations 47

4.1 Introduction, 47
4.2 Preliminaries, 47
4.3 Fundamental Propositions, 56
4.4 Regular Static Problems: Exact Cases, 61
4.5 Regular Static Problems: Further Partial Results, 69

5. Mathematical Solution Methods: Classic 75

5.1 Introduction, 75
5.2 Special Structure: Pairwise Interchange, Priorities, 76
5.3 Neighborhood Search, 82
(A) 5.4 Dynamic Programming, 88
5.5 Branch-and-Bound, 93

6. Mathematical Solution Methods: New Directions 102

6.1 Introduction, 102
6.2 Beam Search, Approximate DP, and Related Methods, 102
6.3 Extended Neighborhood Search: Tabu Search, Simulated Annealing, and Genetic Algorithms, 110
6.4 Lagrangian Relaxation; Neural Networks, 120
6.5 Bottleneck Dynamics: Single Resource, 129

7. Single Machine: Sequencing 137

7.1 Introduction, 137
7.2 Regular Static Problems: General, 138
(A) 7.3 Non-regular Static Problems, 146
7.4 Dynamic Problems: Exact Cases, 150
7.5 Dynamic Problem: No Inserted Idleness, 158
7.6 Dynamic Problem: Inserted Idleness, 163
(A) 7.7 Related Probabilistic Results, 169

8. Single Machine: Timing 171

8.1 Introduction, 171
8.2 Sequence-Dependent Setups, 172
8.3 Lot Sizing, 183
8.4 Dependent Jobs, Precedence Constraints, 187

8.5 Complex Preemption, 195
(A) 8.6 Related Probabilistic Results, 199

PART III MULTI-MACHINE PROBLEMS

9. Embedded Problems **203**
9.1 Introduction, 203
9.2 Serial Jobs (Classic Job Shop), 204
(A) 9.3 Other Models, 211

10. Mathematical Solution Methods: Bottleneck Approaches **216**
10.1 Introduction, 216
10.2 Forecast Myopic Dispatch Approach, 217
10.3 OPT-like Approaches, 221
10.4 Shifting Bottleneck Algorithm, 224
10.5 Bottleneck Dynamics, 226

11. Parallel Machines/Batch Machines **241**
11.1 Introduction, 241
11.2 Parallel Machines: Exact Results, 243
11.3 Parallel Machines: General Procedures and Heuristics for Equal/Proportional Cases, 255
11.4 Batch Machines, 264

12. Shop Routing **267**
12.1 Introduction, 267
12.2 General Parallel Machines: Utilization, 268
12.3 General Parallel Machines: Other Objectives, 280
12.4 Activity Routing, 284
12.5 Advanced Routing Issues, 289

PART IV FLOW SHOPS AND JOB SHOPS

13. Scheduling Flow Shops: Makespan **297**
13.1 Introduction, 297
13.2 Two- and Three-Machine Makespan Problems, 302
13.3 General Makespan, 309

14. Scheduling Flow Shops: Other Objectives and Extensions 324

14.1 Introduction, 324
14.2 Economic Makespan, 324
14.3 Flow and Tardiness Objectives, 327
14.4 Model Extensions, 344
14.5 Case: Nuclear Fuel Tube Shop, 353

15. Scheduling Job Shops: Basic Methods 359

15.1 Introduction, 359
15.2 Exact Methods, 366
15.3 One-Pass Heuristics, 372
15.4 Search Heuristics, 378

16. Scheduling Job Shops: Heuristic Testing 386

16.1 Introduction, 386
16.2 Early Dispatch and Iterated Dispatch Studies, 389
16.3 Search Makespan Studies, 396
16.4 Bottleneck Dynamics Studies, 405
16.5 Model Extensions: Mini-case, 411

PART V PROJECT SCHEDULING AND MANAGEMENT

17. Network Project Scheduling 425

17.1 Introduction to Network Ideas, 425
17.2 Deterministic Critical Path Methods, 432
17.3 Time/Cost Trade-offs (CPM), 440
17.4 Probabilistic Analysis, 446
17.5 Simple Resource Leveling, 457

18. Resource-Constrained Project Scheduling 463

18.1 Introduction, 463
18.2 Classic Project Job Shops, 465
18.3 Multiple Large Projects, 476
(A) 18.4 Resource/Cost Trade-off Models, 485
(A) 18.5 Model Extensions, 493
18.6 Case Example: Custom Optical Equipment, 500

PART VI. OTHER ISSUES

(S) 19. Complex Resources and/or Complex Activities 507

19.1 Introduction, 507
19.2 Multiple Machines per Resource, 509
19.3 Multiple Resources per Activity, 519
19.4 Case Example: Computer Card Line Sector, 526

(S) 20. Model Extensions 532

20.1 Introduction, 532
20.2 Other Types of Shops, 533
20.3 Push Versus Pull Systems, Just-in-Time, and Release/Due Dates, 539
20.4 Variable Speed Resources, 546

21. Planning, Scheduling, and Control 554

21.1 Introduction, 554
21.2 Heuristics for Reactive Scheduling, 556
21.3 Heuristics for Planning Level Systems, 563
21.4 Toward Integration of Planning and Scheduling, 574
21.5 Interactive Systems (DSS) and Expert Systems, 580

Appendix A. Bibliography 591

Appendix B. Glossaries 635

B.1 Acronym Glossary, 635
B.2 Symbol Glossary, 637

Appendix C. Getting Started with the Parsifal™ Software 641

C.1 Hardware Requirements, 641
C.2 Making a Backup Copy, 641
C.3 Installing Parsifal, 642
C.4 Starting Parsifal, 642
C.5 Technical Notes and Troubleshooting, 643
C.6 User Documentation, 643
C.7 Storing User Files, 644
C.8 Printing Reports, 644
C.9 Executing Customized Objective Functions and Heuristics, 645

Appendix D. Parsifal™ Software User Guide 646

D.1 Overview, 646
D.2 Getting Started, 647
D.3 The Single–Machine Problem, 648
D.4 The Parallel–Machines Problem, 673
D.5 The Flow Shop, 679
D.6 The Job Shop, 685

Index 687
