Contents

Preface

1 Purpose and concepts 1

Goals of the study 3

Organization and external environment 4

The individual in the internal environment 11

2 The study sites and research design 19

Criteria for the selection of sites 19

The external environment of manufacturing plants 21

The external environment of research laboratories 26

Effective and less effective manufacturing plants 30

Effective and less effective research laboratories 31

Research methods 35

3 Organization members and the external environment 37

Job mastery and a sense of competence 37

Members' sense of competence within manufacturing environments 39

Members' sense of competence within research laboratories 42

Differences in members' sense of competence: summary and three alternative explanations 46

Members' characteristics and the external environment: a summary 56

4 The internal environment of manufacturing plants 61

Organization members and internal environments of production units 61

Members' time and goal orientation 63

Members' influence and control over work activities 66

Summary of members' characteristics and the external and internal environments in the plants 81

5 The internal environment and organization members within research laboratories 87

Time and goal orientations 88

Formal control 91

Differences in the internal environments of the research laboratories 106

6 Contingency theory and administration 111

Summary and interpretation of findings 111

Implications for management practice and research 117

Broader implications for understanding man and organization	138
Methodological appendix	145
The external environment	145
Characteristics of organizational unit members	148
The internal environment	156
Index	169
