

The Distribution and Redistribution of Income

A Mathematical Analysis

Second Edition

Peter J. Lambert

Manchester University Press

Manchester and New York

Distribution exclusively in the USA and Canada by St. Martin's Press

Contents

Preface to the Second Edition	vii
Preface to the First Edition	ix
Glossary	xi
1 Introduction and Summary	1
1.1 Introduction	1
1.2 How to Use this Book	2
1.3 Chapter Summaries	4
1.4 Prerequisites	9
<i>Appendix: some basic analytical concepts and results</i>	10
2 The Size Distribution of Income	13
2.1 Data Sources	14
2.2 Mathematical Representation	22
2.3 Inequality of Income	30
2.4 Lorenz Curves Mathematically	39
2.5 Income Tax and the Concept of Redistribution	47
3 Lorenz Curves and Welfare Comparisons	54
3.1 Comparing Lorenz Curves: The Atkinson Theorem	54
3.2 Generalized Lorenz Dominance and Social Welfare	59
3.3 Generalized Lorenz Curve Configuration and Attitudes to Inequality	68
3.4 Social Welfare when Generalized Lorenz Curves Cross Once	73
3.5 Multiple Crossings of Generalized Lorenz Curves	78
<i>Appendix: differences in need and sequential generalized Lorenz dominance</i>	82
4 Social Welfare and Inequality Aversion	88
4.1 Individualistic Social Welfare: A Simple Case	88
4.2 The Veil of Ignorance	89
4.3 Social Preference and Social Welfare: Some General Considerations	91
4.4 Lerner's Probabilistic Social Welfare Function	96
4.5 Measuring Inequality Aversion	97
4.6 Constant Inequality Aversion and Rawlsian Leximin	100
4.7 Generalized Lorenz Curve Configurations Again	105
5 Abbreviated Social Welfare Functions	109
5.1 The Equality–Efficiency Trade-Off	110

vi Contents

5.2	Abbreviating the Social Welfare Function	112
5.3	Indices of Relative Inequality	116
5.4	Social Welfare and the (Generalized) Gini Coefficient	123
5.5	Social Welfare and the Atkinson Index	131
6	Progressive Income Taxation	139
6.1	Income Tax Progression: Justifications and Objectives	139
6.2	The Typical Real-World Income Tax	143
6.3	Distributive, Welfare and Revenue Effects of Progressive Income Taxation	146
6.4	The Degree of Progression	159
	<i>Appendix: an alternative perspective</i>	164
7	Income Tax Progression and Distribution	170
7.1	Departure from Proportionality	172
7.2	Redistributive Effect	180
7.3	The Typical Real-World Income Tax: Base and Rate Effects	191
7.4	The Gain from Splitting	194
	<i>Appendix: progression and savings</i>	197
8	Income Tax Progression and Revenue Growth	202
8.1	Measuring Revenue Responsiveness	203
8.2	Equiproportionate Income Growth, Progressivity and Stabilization	205
8.3	Nonequiproportionate Income Growth	209
8.4	Equiproportionate Post-Tax Income Growth and Progressivity: The Gross Earnings Deflator	213
8.3	The Typical Real-World Income Tax: Computing Revenue Responsiveness	216
9	Income Tax Reform and Social Welfare	224
9.1	A Tax Cut/Hike for Everyone	225
9.2	Single-Crossing Tax Reform	230
9.3	Double-Crossing Tax Reform	238
10	The Net Fiscal System	244
10.1	Attributing Benefits	245
10.2	Benefit Regressivity	249
10.3	Net Fiscal Incidence Progressivity	255
11	Endogenizing the Income Distribution	266
11.1	The No-Tax Model	266
11.2	The Income Unit's With-Tax Decision	270
11.3	A Distributive Model	274
11.4	How Much Redistribution?	277
11.5	Optimal Income Taxation	280
	Extended Bibliography	285
	Index	303
