

EE

HANDBOOK OF PUBLIC ECONOMICS

VOLUME I

Edited by

ALAN J. AUERBACH
University of Pennsylvania

and

MARTIN FELDSTEIN
Harvard University

ELSEVIER

AMSTERDAM • LAUSANNE • NEW YORK • OXFORD • SHANNON • SINGAPORE • TOKYO

CONTENTS OF THE HANDBOOK

VOLUME I

Editors' Introduction

Chapter 1

A Brief History of Fiscal Doctrine
R.A. MUSGRAVE

Chapter 2

The Theory of Excess Burden and Optimal Taxation
ALAN J. AUERBACH

Chapter 3

Public Sector Pricing
DIETER BÖS

Chapter 4

Taxes and Labor Supply
JERRY A. HAUSMAN

Chapter 5

The Effects of Taxation on Savings and Risk Taking
AGNAR SANDMO

Chapter 6

Tax Policy in Open Economies
AVINASH DIXIT

Chapter 7

Housing Subsidies: Effects on Housing Decisions, Efficiency, and Equity
HARVEY S. ROSEN

Chapter 8

The Taxation of Natural Resources
TERRY HEAPS and JOHN F. HELLIWELL

VOLUME II

Chapter 9

Theory of Public Goods
WILLIAM H. OAKLAND

Chapter 10

Incentives and the Allocation of Public Goods
JEAN-JACQUES LAFFONT

Chapter 11

The Economics of the Local Public Sector
DANIEL RUBINFELD

Chapter 12

Markets, Government, and the “New” Political Economy
ROBERT INMAN

Chapter 13

Income Maintenance and Social Insurance
ANTHONY B. ATKINSON

Chapter 14

The Theory of Cost–Benefit Analysis
JEAN DRÉZE and NICHOLAS STERN

Chapter 15

Pareto Efficient and Optimal Taxation and the New New Welfare Economics
JOSEPH E. STIGLITZ

Chapter 16

Tax Incidence
LAURENCE KOTLIKOFF and LAWRENCE SUMMERS

CONTENTS OF VOLUME I

Introduction to the Series	v
Contents of the Handbook	vii
Editors' Introduction	xv

Chapter 1

A Brief History of Fiscal Doctrine

R.A. MUSGRAVE	1
1. Introduction	1
2. Public goods	2
2.1. The duties of the sovereign	3
2.2. The public economy	7
2.3. Subjective value and public provision	8
2.4. Pigouvian externalities	11
2.5. Pareto efficiency with public goods	12
2.6. Cost-benefit analysis	15
3. Equity in taxation	15
3.1. The benefit doctrine	16
3.2. The ability to pay doctrine	18
3.3. The index of equality	21
3.4. Unjust enrichment	24
4. Efficiency in taxation	25
5. Shifting and incidence	28
5.1. The precursors	29
5.2. The classics	30
5.3. The marginalists	35
5.4. Later developments	40
6. Stabilization and debt	44
6.1. Fiscal policy and stabilization	44
6.2. Public debt	49
7. Conclusion	53
References	54

Chapter 2

The Theory of Excess Burden and Optimal Taxation

ALAN J. AUERBACH	61
1. Introduction	61
1.1. Outline of the chapter	62

2. Measures of surplus and excess burden	63
2.1. Consumers' surplus and the Hicksian variations	63
2.2. Definitions of excess burden	67
3. Evaluating the measures of excess burden	73
3.1. Taylor approximations and informational requirements	73
3.2. Variations in producer prices	75
3.3. Aggregation and welfare comparisons	79
4. The empirical measurement of excess burden	83
4.1. Measurement with Taylor approximations	83
4.2. Exact measures	84
4.3. Simulation methods	85
5. The theory of optimal taxation	86
5.1. Basic optimal tax results	87
5.2. Minimizing excess burden through optimal taxation	93
5.3. Changing producer prices	95
5.4. Production efficiency	100
6. Optimal taxation and the structure of preferences	102
6.1. Optimal taxation from the dual perspective	102
6.2. Distributional objectives	107
7. Further topics in optimal taxation	110
7.1. Public goods provision	110
7.2. Externalities	112
7.3. Pre-existing distortions	113
7.4. Taxation and risk	115
8. Tax reform	118
8.1. Moving to lump sum taxation	119
8.2. Reform without lump sum taxation	123
References	124

Chapter 3

Public Sector Pricing

DIETER BÖS

1. Public pricing institutions	129
1.1. What is priced publicly in different countries?	129
1.2. Why public pricing?	131
1.3. Who fixes public prices?	132
1.4. What price schedule should be chosen?	134
2. Public pricing policies for welfare maximization	135
2.1. Theoretical foundation	135
2.2. Basic rules	147
2.3. Disequilibrium setting	165
2.4. Time dependent pricing	171
3. Public pricing policies to achieve politicians' and managers' aims	182
3.1. Theoretical foundation	182

3.2. Politicians and bureaucrats	184
3.3. Managers of public enterprises and unions	193
3.4. A set of axioms for prices to achieve a fair allocation of costs	199
4. Conclusion	204
5. Bibliographical note	205
References	206

Chapter 4

Taxes and Labor Supply

JERRY A. HAUSMAN

JERRY A. HAUSMAN	213
1. Introduction	213
2. The theory of labor supply with taxes	215
3. Tax systems	225
4. The econometrics of labor supply with taxes	232
5. Results	238
5.1. Prime-age males	239
5.2. Economic welfare	243
5.3. Wives	247
6. High-income groups	249
7. Evidence from NIT's and social security effects	253
References	261

Chapter 5

The Effects of Taxation on Savings and Risk Taking

AGNAR SANDMO

AGNAR SANDMO	265
1. Introduction	265
2. Taxation and saving: Models of individual choice	266
2.1. The two-period model: Perfect markets	266
2.2. The two-period model: Imperfect markets	272
2.3. Multi-period models and the bequest motive	274
2.4. Uncertainty	275
2.5. The role of labour supply	276
3. Taxation and saving: Aggregation and empirical estimation	280
4. Corporate savings	283
5. Social security, pensions and saving	283
6. The incidence of taxation	286
7. The optimum tax treatment of savings	288
8. Taxation and risk taking: Portfolio choice	293
8.1. A non-zero rate of interest	295
8.2. Several risky assets	297
8.3. Imperfect loss offset	298
8.4. Other tax forms in the pure portfolio model	298
8.5. Interaction with saving and labour supply decisions	300
9. Empirical studies of taxation and portfolio choice	302

10. Other dimensions of risk taking	303
11. General equilibrium and tax incidence	305
12. The optimum taxation of risky assets	306
13. Concluding remarks	308
References	309

✦ Chapter 6

Tax Policy in Open Economies

AVINASH DIXIT

1. Introduction	313
1.1. Outline of the chapter	314
1.2. Scope and limitations	315
1.3. Model structure and notation	316
2. Discrete comparisons of alternative equilibria	320
2.1. Potential gains from trade	320
2.2. Aggregate gains and revealed preference	322
2.3. Distortions and growth	325
2.4. Distribution for Pareto superiority	328
3. Optimum taxation and tariffs	331
3.1. The first-best optimum	331
3.2. Optimum without lump sum transfers	336
3.3. Optimum tariffs for revenue	339
4. Gradual reform of policies	341
4.1. Equilibrium and comparative statics	341
4.2. Directions of desirable reforms	344
4.3. Shadow prices of commodities and projects	346
4.4. Endogenous world prices	348
4.5. Non-tradeable commodities	350
5. Multi-country trade policy problems	352
5.1. Tariff setting with retaliation	352
5.2. Customs unions	355
5.3. Tax harmonization	356
6. Some further topics	357
6.1. Quotas and non-tariff barriers	357
6.2. Effective protection	360
6.3. Political economy	362
7. Empirical work	364
7.1. General issues and problems	365
7.2. Marshallian surplus calculations	366
7.3. Computable general equilibrium models	368
8. Concluding comment	370
References	370

Chapter 7

Housing Subsidies: Effects on Housing Decisions, Efficiency, and Equity

HARVEY S. ROSEN

1. Introduction	375
1.1. The U.S. housing stock	375
1.2. Government and housing	376
1.3. Rationalization for government intervention	377
2. Methodological issues	381
2.1. Specifying a model	381
2.2. Measuring quantity and price	385
2.3. Measuring "shift" variables	386
2.4. Summary	387
3. Housing behavior and the federal income tax	387
3.1. Housing related tax provisions	388
3.2. Effects on the cost of housing	390
3.3. Effects on behavior	395
3.4. Efficiency and equity implications	402
3.5. Proposals for reform	406
4. Housing assistance	408
4.1. Provisions	408
4.2. Production inefficiency	410
4.3. Consumption inefficiency	412
4.4. Distributional implications	415
4.5. Possibilities for reform	415
5. Conclusions	417
References	417

Chapter 8

The Taxation of Natural Resources

TERRY HEAPS and JOHN F. HELLIWELL

1. Introduction	421
2. Outline of issues and instruments	422
2.1. Efficiency effects	422
2.2. Other objectives of resource taxation	425
2.3. Taxes and other policy instruments	427
3. Fisheries	430
3.1. The common property problem	430
3.2. Open access equilibrium	433
3.3. Fleet profit maximizing equilibrium	434
3.4. A landings tax	435
3.5. A quota system	436
3.6. Subsidiary considerations	437
3.7. Appendix: Comparative statics of open access	439

4. Forestry	440
4.1. Forestry issues	440
4.2. Private sustained yield forestry	442
4.3. Public forest management	447
5. Mining	449
5.1. Mining issues	449
5.2. Optimal non-renewable resource extraction	450
5.3. Rent collecting taxes	453
6. Crude oil and natural gas	460
6.1. Economic rents in crude oil and natural gas	460
6.2. Oil and gas taxation in four countries	462
6.3. Comparative summary	466
7. Hydro-electricity	467
7.1. The scope and value of hydro-electricity	467
7.2. Electricity pricing and taxation	467
7.3. The impact of inflation on electricity pricing and taxation	469
8. Conclusion	470
References	471
Index	473
