

Rowland J. Mainstone

Developments
in
Structural Form

Architectural Press

OXFORD BOSTON JOHANNESBURG MELBOURNE NEW DELHI SINGAPORE

Preface to the first edition 11

Preface to the second edition 14

Part 1: Introductory

Chapter 1: Introduction 17

Natural and man-made forms 19

Practical limitations on the choice of man-made forms 20

Other aspects of choice 21

The development of structural forms 28

Chapter 2: Structural actions 31

Loads and their effects 31

Active and reactive loads 31

Associated movements and deformations 31

Dynamic and static loads 32

Internal actions 34

Tension, compression, bending, torsion, and shear 34

Actions of the human frame 35

Actions of the built structure 35

Structural requirements 35

The basic geometrical requirement 35

The complementary needs for adequate strengths and stiffnesses 36

Static equilibrium 37

The equilibrium of some structural elements acting in simple tension or compression 38

The catenary and the arch 39

Equilibrium calling for both tension and compression 40

The simply-supported beam 40

The domical shell and the dome 42

Buckling 44

Structural interdependence 44

Statically determinate behaviour 43

Statically indeterminate behaviour 45

Cracks and deformations as clues to structural actions 46

Chapter 3: Structural materials 47

| | |
|-------------------------|----|
| Stone | 50 |
| Brick | 52 |
| Concrete | 53 |
| Timber | 55 |
| Iron and steel | 57 |
| Reinforced concrete | 62 |
| Prestressed concrete | 63 |
| New composite materials | 64 |

Chapter 4: Construction and form 65

| | |
|--|----|
| Operational aspects | 67 |
| <i>Setting out</i> | 67 |
| <i>The use of in situ centering or formwork</i> | 67 |
| <i>The use of prefabricated elements or components</i> | 68 |
| <i>Intermediate possibilities</i> | 73 |
| <i>Other operational aspects</i> | 73 |
| Structural aspects | 73 |
| <i>Ensuring adequate strengths during construction</i> | 74 |
| <i>Ensuring the stability of the incomplete structure</i> | 75 |
| <i>The use of centring for arches and vaults</i> | 75 |
| <i>Construction without centring</i> | 76 |
| <i>The effects of deformations occurring during construction</i> | 77 |
| <i>Prestressing</i> | 80 |

Chapter 5: Structure and form 83

| | |
|--|----|
| Simple elemental forms | 85 |
| <i>Ties, struts, and columns</i> | 87 |
| <i>Plane membranes and walls</i> | 87 |
| <i>Catenaries and arches</i> | 87 |
| <i>Singly-curved membranes and vaults</i> | 87 |
| <i>Doubly-curved membranes, vaults, and shells</i> | 88 |
| <i>Beams</i> | 89 |
| <i>Slabs</i> | 89 |
| Trussed and framed analogues | 91 |
| <i>Portal frames</i> | 91 |
| <i>Plane trusses and space frames</i> | 91 |
| Proportions | 92 |
| Complete structures | 93 |

Part 2: Structural elements

Chapter 6: Arches and catenaries 97

- Origins 97
- Masonry and concrete arches 100
- Timber, iron, and steel arches 106
- Reinforced- and prestressed-concrete arches 110
- Catenaries 113

Chapter 7: Vaults, domes, and curved membranes 115

- Origins 116
- Concrete and masonry domes and related forms 117
- Concrete and masonry groined and ribbed vaults 130
- Masonry spires and fan vaults 133
- Thin reinforced-concrete shells 134
- Timber counterparts 138
- Slung membranes and cable nets 140
- Air-supported and pneumatic membranes 143

Chapter 8: Beams and slabs 145

- Early forms 145
- Later timber and iron and steel beams 146
- Reinforced-masonry beams 150
- Reinforced- and prestressed-concrete beams and related forms 152
- Floor and deck systems and slabs 156

Chapter 9: Trusses, portal frames, and space frames 159

- Origins 159
- Roof trusses 160
- Trussed equivalents of the beam and arch 163
- Portal frames 167
- Space frames 169

Chapter 10: Supports, walls, and foundations 175

- Early forms 175
- Later masonry and concrete and reinforced-concrete columns, piers, and walls 178
- Later timber and iron and steel columns and struts 182
- Hangers and ties 184
- Foundations 186

Part 3: Complete structures

Chapter 11: Early forms 193

- Primitive shelters and later house forms 195
- Column-and-beam temples and palace and public halls 196
- Tombs, pyramids, and some other structures 201

Chapter 12: Pre-nineteenth-century wide-span buildings 207

- Roman timber-roofed basilicas and large vaulted and domed halls 208
- Early domed churches and related later churches and mosques 214
- Pre-Gothic timber-roofed and stone-vaulted churches 223
- Timber barns and Gothic stone-vaulted churches 227
- Seventeenth- and eighteenth-century vaulted and domed churches 232

Chapter 13: Nineteenth- and twentieth-century wide-span buildings 237

- Halls with framed and trussed counterparts of arched and domed roofs 237
- Halls with reinforced-concrete arched and shell roofs 242
- Halls with beam, slab, truss, and space-frame roofs 246
- Halls with cable-supported beam, truss, or space-frame roofs 253
- Halls with cable-net and membrane roofs or canopies 254

Chapter 14: Bridges 261

- Masonry arch bridges 262
- Timber, iron, steel, and reinforced-concrete arch bridges 266
- Beam (including cantilever) bridges 270
- Simple cable and stressed-ribbon bridges 274
- Bridges with cable-supported decks 275
- Suspension bridges 276
- Cable-stayed bridges 282

Chapter 15: Multi-storey buildings and towers 287

- Towers 287
- Pre-twentieth-century bearing-wall buildings 291
- Nineteenth- and early-twentieth-century fully-framed buildings 294
- Later twentieth-century framed and bearing-wall buildings of medium height 300
- Taller framed and core-stiffened buildings of the 1960s and 1970s 305
- Later twentieth-century taller framed and core-stiffened buildings 312
- Alternative forms 313

Part 4: Design

Chapter 16: Structural understanding and design 317

Understanding and design up to the Renaissance 317

Growing understanding and its impact on design from the Renaissance to the eighteenth century 319

Further developments from the nineteenth century to the mid-twentieth century 322

The use of physical models and computers as aids to design in the later twentieth century 327

Changes and underlying continuities 329

Glossary of structural terms 333

Notes 341

Indexes 369
