H. Eschenauer: Welcome Address ........................................... 23
G. Rimbach: Welcome Address ............................................. 25
F. Niordson: Welcome Address ........................................... 27

Tuesday, October 12, 1982
Session I: Theoretical Aspects - Optimization Software
Chairmen: F. Niordson, E.J. Haug

J.S. Arora, USA: Optimum Structural Design through Solution Bounding Techniques .................................................. 29
E. Atrek, Turkey: A Matrix Approach to Optimum Structural Design .................................................. 35
P. Brousse, France: Associated Optimization Problems - Application to Structural Design .................. 47
C. Cinquini, R. Contro, G. Sacchi Landriani, Italy: Optimal Design in Anisotropic Membrane Problems ........ 54
A. Díaz, P. Papalambros, J.E. Taylor, USA: Structural Optimization Methods Applied to FEM Mesh Design .... 61
C. Fleury, V. Braibant, Belgium: Structural Optimization Involving Discrete Design Variables ............... 70
M.B. Fuchs, Israel: Optimal Trusses Using Explicit Optimum Design ............................................. 78
S. von Hoerner, USA: The Derivative Tensor of the Stiffness Matrix as a Tool for Optimizations .......... 84
P. Lac, P. Morlier, France: Optimization of Structures through the Related Structures Techniques ........ 91
N. Olhoff, Denmark: Bimodality in Optimizing the Shape of a Vibrating Shallow Arch ......................... 97
G.I.N. Rozvany, C.-M. Wang, Australia: Extensions of Prager's Layout Theory ............................................................. 103

M.A. Save, Belgium: Remarks on the Minimum-Volume Designs of a Three-Bar Truss ......................................................... 111

K. Schittkowski, FR Germany: Theory, Implementation, and Test of a Nonlinear Programming Algorithm ............................. 122

A.B. Templeman, D.F. Yates, Great Britain: A Linear Programming Approach to the Discrete Optimum Design of Trusses ........... 133

Wednesday, October 13, 1982

Session II: Multipurpose Optimization

Chairman : N. Olhoff

H. Baier, FR Germany: Structural Optimization in Industrial Environment: Applications to Composite Structures ...................... 140

H. Eschenauer, FR Germany: Vector-Optimization in Structural Design and its Application on Antenna Structures ..................... 146

U. Kirsch, Israel: Multilevel Optimal Design of Reinforced Concrete Structures ................................................................. 156

F. Mistree, USA: Design of Damage Tolerant Structural Systems 162

A. Osyczka, Poland: Multicriterion Decision Making with Min- Max Approach ................................................................. 169

A. Osyczka, Poland, J. Koski, Finland: Selected Works Related to Multicriterion Optimization Methods for Engineering Design ............................................................................. 175

P. Pedersen, Denmark: A Unified Approach to Optimal Design .... 182

H.-J. Sattler, FR Germany: Analysis and Optimization of Stiffened Parabolic Shells ................................................................. 188

W. Stadler, USA: Evolution as an Optimization Process: A Hypothesis and some of its Implications ........................................ 196
Wednesday, October 13, 1982

Session III: Shape Optimization

Chairman: P. Brousse

B. Bochenek, A. Gajewski, Poland: Certain Problems of Unimodal and Bimodal Optimal Design of Structures .......... 204

B. Jakubowska, Z.K. Lesniak, Poland: Shape Optimization of Double-Curved Shells ......................... 210

M.-S. Na, N. Kikuchi, J.E. Taylor, USA: Shape Optimization for Elastic Torsion Bars ....................... 216

Z. Mróz, K. Dems, Poland: On Optimal Shape Design of Elastic Structures .................................. 224

K. Wassermann, FR Germany: Structural Shape Optimization of Three-Dimensional Structures .............. 233

M. Weck, P. Steinke, FR Germany: A New Method in Shape-Optimization ........................................ 242

Y.M. Yoo, E.J. Haug, K.K. Choi, USA: Shape Optimal Design of Multiple Loaded Structural Components ............. 250

Thursday, October 14, 1982

Session IV: Structures and Materials

Chairmen: G.I.N. Rozvany, J.E. Taylor, C. Fleury

J.-L. Armand, France: Non Homogeneity and Anisotropy in Structural Design .................................. 256

M.P. Bendsøe, Denmark: G-Closure and Homogenization Problems Arising in Plate Optimization ............ 270

J. Blachut, Poland: Parametrical Optimal Design of Funicular Arches Against Buckling and Vibration ........... 276
R. Bogacz, Poland, O. Mahrenholtz, FR Germany: On the Optimal Design of Viscoelastic Structures Subjected to Circulatory Loading ........................................ 282

A. Borkowski, Poland: On Application of Ellipsoidal Methods in Rigid-Plastic Analysis and Design ................................................ 289

A.M. Brandt, Poland: On the Optimization of the Internal Structure of Fibre Reinforced Composite Materials ....................... 295

K.-T. Cheng, Y. Gu, China: Sequential Quadratic Programming and Dynamic Optimal Design of Rotating Blades ................. 301

C. Cinquini, Italy: Limit Analysis and Optimal Plastic Design of Circular Cylindrical Shells ............................................. 309

H. Gödel, H. Hörnlein, FR Germany: Structural Optimization Methods for Advanced Wings .................................. 319

S. Jendo, W. Marks, Poland: Nonlinear Stochastic Programming in Optimum Structural Design ...................................... 327

W. Krabs, P. Stange, FR Germany: On a Minimum Cost Design in Civil Engineering ........................................ 334

J.-M. Lagache, France: Abstract Convolution and Optimum Layout ..................................... 340

T. Lekszycki, Z. Mróz, Poland: Optimal Support Reactions in Viscoelastic Vibrating Structures .................................. 353

Ü. Lepik, USSR: Optimal Design of Rigid-Plastic Structures under Dynamic Loading ........................................... 360

Z.K. Lesniak, Poland, H. Schwarz, FR Germany: Optimization of Building Systems by Coordinated Decomposition .......... 366

K.I. Majid, Great Britain: Minimum Weight Design of Multi-Storey Frames for Sway .................................................. 372

F. Niordson, Denmark: Some New Results Regarding Optimal Design of Elastic Plates ........................................... 380

A.M. Samsonov, USSR: Optimal Design of Rib-Reinforced Plates ..................................... 387

K. Svanberg, Sweden: Weight Optimization of Beam Structures ... 403
G. Szefer, L. Demkowicz, Poland: Optimal Design of Elastic Nonlinear Plates by Means of the Min-Max Theory ................. 409
X. Tang, China: A New Method of Fully Stressed Design .......... 415
G. Thierauf, M. Lawo, FR Germany: Optimal Limit Design - Comparative Studies for Large Scale Problems ....................... 430
R. Zimmermann, FR Germany: Mass Minimization of Composite Material Cylindrical Shells and Curved Panels with Buckling Constraints ......................................................... 438
M. Zyczkowski, Poland: Recent Results on Optimal Design in Creep Conditions ................................................................. 444
N. Olhoff: Closure Address .................................................. 450
Author Index ...................................................................... 452
