Analytical Table of Contents

Chapter 1. History of Science	3
<i>Introduction</i>	3
A. The Uses of Nature	3
B. Interests, Values, and the Past of Science	4
C. The Structure of This Essay	6
I. The Historiography of Science	7
A. Its Prehistory	7
B. Nineteenth-Century Europe	8
C. The United States	12
D. The 1930s Marxists	14
E. The Idealist Program	15
F. The New Eclecticism	18
II. Some Central Domains in the History of Science	21
A. The Social Roots and Social History of Science	22
B. The Scientific Revolution	26
C. Ancient and Medieval Science	28
D. Science in Non-Western Cultures	29
E. National Studies	31
F. Discipline Histories	33
G. Science and Religion	36
H. Science, Medicine, and Technology	37
I. Philosophy, Psychology, and Sociology of Science	37
J. "Great Man" Studies	39
III. The Historiography of Science Revisited	40
<i>Bibliographic Introduction</i>	41
A. Archives	41
B. Bibliographies	42
C. Dictionaries and Encyclopedias	42
D. Journals	42
E. Museums	43
F. Sourcebooks	43
G. Introductory Texts	44

H. Classics	44	
I. Staple Reference Works	44	
<i>Bibliography</i>		45
Chapter 2. History of Technology		70
<i>Introduction</i>		70
A. History of Technology: Origin and Development	70	
B. Principal Traditions in Writing	74	
C. Dividing the History of Technology	78	
I. Some Problem Areas of Special Interest		80
A. Relation of Science to Technology	80	
B. Professionalization of Engineering	81	
C. Medieval Technology	82	
D. The American System of Manufactures	83	
E. Technology and the Rise of the Modern Corporate State	84	
F. Technology and Ideology	86	
G. The Development Phase of Technological Change	86	
H. Technology Transfer	87	
I. Technology Assessment	88	
J. Women and Technology	88	
K. Technology and Literature	89	
L. Technology and the Environment	90	
I. Relation of the History of Technology to Other Areas		91
A. History of Science	91	
B. Sociology of Science	92	
C. History of Medicine	92	
D. Popular Social Criticism of Technology	93	
E. Science Policy Studies	93	
F. General History	94	
III. Development of Scholarship Outside the United States		95
IV. Values and the History of Technology		97
<i>Bibliographic Introduction</i>		99
A. Physical Sites	99	
B. Museums	100	
C. Archives and Special Collections	100	
D. Bibliographies, Directories, Indexes	102	
E. Journals	102	
F. Historiographic Discussions	103	
G. Surveys	104	
H. Anthologies	105	
<i>Bibliography</i>		106
Chapter 3. History of Medicine		121
<i>Introduction</i>		121
I. History of the History of Medicine		124
A. Early Works	124	
B. The Johns Hopkins Institute of the History of Medicine	126	
Common Historical Approaches		129

A. Biography and the History of Medicine	129
B. The History of Ideas	130
C. Social History (the Professions; Hospitals; Psychiatry; Public Health; Quackery and Sectarianism)	133
III. New Techniques in the History of Medicine	140
A. Oral History	141
B. Demography	142
C. Paleopathology	144
D. Contemporary History	146
IV. The History of Medicine and Its Relationship to Other Fields	147
A. The History of Science	147
B. General History	149
C. Specialized Fields (Family History; Childhood and Child Rearing; Women's History; History of Education and Medical Education)	152
D. Sociology	155
E. Anthropology	156
F. Public Policy	157
G. Health and Human Values (including Bioethics)	159
H. Geography	160
I. The History of Art	161
V. Research Problems	162
VI. Teaching and Training in the History of Medicine	164
<i>Bibliographic Introduction</i>	166
A. Major Journals in the History of Medicine and in Related Fields	166
B. Major Bibliographies	167
C. Biographic Collections and Dictionaries	168
D. Collections of Readings	169
E. Representative Works in General History with Sections or Chapters on Aspects of the History of Medicine or Public Health	171
<i>Bibliography</i>	172
Chapter 4. Philosophy of Science: Historical, Social, and Value Aspects	197
<i>Introduction: Philosophy as Critical Thinking</i>	197
I. Overviews of the Subject	198
A. Historical Overview of the Philosophy of Science	198
B. Twentieth-Century Work outside the Anglo-American School: A Country-by-Country Survey (Austria, Belgium, Denmark, Finland, France, Germany, Italy, Japan, Norway, Poland, Rumania, Sweden, and Switzerland)	204
C. Frameworks for Philosophy of Science	217
1. Activities vs. Results	217
2. Functional and Formal	218
3. Broad Synthetic vs. Narrow Analytic	218
4. Descriptive and Prescriptive	219
5. Syntactic, Semantic, and Pragmatic	220
6. Approaches Emphasizing the Philosophical or Scientific Literature	220
7. The Philosophy of Particular Sciences, Methods, or Theories	221
II. Values in Science	222

III. Logic	223
IV. Topics in Anglo-American Analytical Philosophy of Science	224
A. Central Issues in the Logical Empiricist Tradition 225	
1. Scientific Significance 225	
2. Theory and Observation 227	
B. Discovery and Growth 233	
C. Current Issues 238	
1. Explanation 238	
2. Induction, Probability, and Utility 244	
V. Social Responsibility	250
<i>Bibliographic Introduction</i>	253
A. Journals, Centers and Societies 254	
B. A List of Basic Works 254	
<i>Bibliography</i>	254
Chapter 5. Philosophy of Technology	282
<i>Introduction</i>	282
I. History of the Philosophy of Technology	282
A. Background 282	
B. The West European School 285	
C. The Anglo-American School 293	
D. The Soviet-East European School 298	
E. Tensions and Limitations 304	
II. Problems in the Philosophy of Technology	305
A. Metaphysical Issues 305	
1. Technology as Object 306	
2. Technology as Process 308	
3. Technology as Knowledge 313	
4. Technology as Volition 316	
5. Ancient versus Modern Technology 322	
B. Ethical and Political Issues 323	
1. Technology and Work 323	
2. Technology and War 325	
3. Technology and Culture 326	
4. Technology and Religion 328	
5. Technology and Values 329	
6. Technology and the Environment 330	
7. Technology and Development 333	
8. Technology and Social-Political Theory 334	
C. Toward a Synthesis: The Question of Humanization 339	
<i>Bibliographic Introduction</i>	344
A. Non-Philosophical Source Materials 344	
B. Philosophy of Technology Source Materials 346	
<i>Bibliography</i>	350
Chapter 6. Philosophy of Medicine	364
<i>Introduction</i>	364
I. Excerpts from the History of the Field	367
II. Epistemological Issues in the Philosophy of Medicine	371

A. The Language and Concepts of Medicine	372	
B. Medical Theories and Medical Explanations	380	
C. Metatheory and Methodology of Clinical Judgment and Medical Decisionmaking	391	
D. Philosophy of Mind in Medicine	397	
III. Bioethics		401
A. Rights and Duties, Goods and Values for Physicians and Patients	405	
B. Definitions of "Person" and "Human": Some Ontological Problems in Medical Ethics	417	
C. Distributing Biomedical Goods and Harms	422	
D. Special Perspectives	425	
<i>Bibliographic Introduction</i>		428
A. Basic Sources	429	
B. Reference Sources	430	
C. Journals and Series	430	
<i>Bibliography</i>		431
Chapter 7. Sociology of Science and Technology		465
<i>Introduction: Social and Intellectual Contexts of Sociology of Science and Technology</i>		466
A. Science, Technology, and the Social Perspective	467	
B. Brief History of the Sociology of Science	468	
C. Brief History of the Sociology of Technology	470	
D. Problems of Ethics and Values in the Sociology of Science and Technology	471	
I. Sociology of Science		473
A. Sociological Models of Science	473	
1. The Mertonian Model	473	
2. The Kuhnian Model	475	
3. Merton, Kuhn, and Critics	477	
B. The Scientific Community	479	
1. Role Performance and Social Stratification in Science	479	
2. Social Processes in Science	482	
3. Social Control in Science	485	
C. Scientific Growth and Change	486	
1. Origins and Early Development of Science	486	
2. Disciplines, Specialties, Research Areas	488	
II. Research in the Sociology of Technology		490
A. Sociological Research on Technology	490	
B. Conditions Enhancing the Future of the Sociology of Technology	492	
C. Research Potential in Sociology of Technology	494	
III. Sociology of Science and Technology Outside the United States		495
IV. Science, Technology, and the Problem of Values		496
A. Science and Values	496	
B. Technology and Values	497	
C. Future Opportunities for Value Concern	498	
V. Conclusion		499
<i>Bibliographic Introduction</i>		500
A. Basic Works in Sociology of Science	500	
B. Bibliographic Sources	502	
C. Basic Works in Sociology of Technology	502	
<i>Bibliography</i>		502

Chapter 8. Medical Sociology and Science and Technology in Medicine	527
<i>Introduction</i>	527
I. The Specialty of Medical Sociology	528
A. Development of Medical Sociology	528
B. Roles of Medical Sociologists	531
C. Work of Medical Sociologists	533
1. Epidemiological Investigations	533
2. Orientations and Values in Health	533
3. Health Behavior	534
4. Selection and Socialization of Health Providers	534
5. Practitioner-Patient Relations	535
6. Organization of Medical Care	535
7. Delivery of Health Services	536
8. Program Evaluation	536
II. The Sociological Study of Science and Technology in Medicine	537
A. Research	539
1. Laboratory Research	539
2. Non-Laboratory Research	542
3. Ethical Issues	543
B. The Organization, Delivery, and Costs of Medical Care	547
1. Organization of Medical Practice	547
2. Economic Structure of Health Care	548
3. Modifying Organizational Arrangements	550
4. Costs and Benefits of Technology	553
5. Technology and Efforts at Cost Containment	556
C. Clinical Practice	562
1. Technology and Patient Care	563
2. Patient Rights	564
3. Prolongation of Life	565
III. Emerging Themes	567
<i>Bibliographic Introduction</i>	569
A. General Reviews, Texts, and Source Materials	571
B. Studies in Medical Sociology	571
C. Policy Analyses Relevant to Science, Technology, and Medicine	571
<i>Bibliography</i>	572
Chapter 9. Science Policy Studies	583
<i>Introduction: Studies of Science and Technology Policies</i>	583
A. The Subject	583
B. The Field	583
C. Approaches	585
I. The Nature and Determination of Policies for Science and Technology	586
A. The Nature of Science and Technology Policies	586
1. Allocation of Resources for Scientific and Technological Research	586
2. Rationales for the Allocation of Resources in R&D Budgets	589
B. Determination of Science and Technology Policies	590
1. Organization of High-Level Policymaking Bodies	590
2. High-Level Policymaking: Some Major Decisions	595

C.	Science and Technology Policies in Specific Sectors	596
1.	Agricultural Research and Development	597
2.	Military Research and Development	601
3.	Academic Research	606
4.	Civilian Research and Development	611
5.	Social Research and Development	614
6.	A Summing Up	619
II.	National Policies for Controlling the Impact of Science and Technology	621
A.	Differential Impacts of Science and Technology	621
B.	Policies for Controlling the Impact of Science and Technology	622
1.	Technical Controls	623
2.	Legislative and Regulatory Controls	624
III.	Value Issues in the Study of Science and Technology Policies	625
A.	An Overview	625
1.	Selection of Priorities	625
2.	The Scientist as Expert and Adviser	628
3.	Impacts of Science and Technology	629
B.	Issues in Assessing the Impact of Science and Technology on Society	630
C.	Roles and Responsibilities of Scientists, Technologists, and Laymen	631
1.	Political and Moral Dilemmas in the Roles of Expert and Adviser	631
2.	Responsibilities of Scientists and Technologists for the Impacts of Scientific and Technological Innovations	633
3.	Roles and Responsibilities of Laymen in the Determination of Science and Technology Policies	635
4.	Sources and Effects of Opposition to Science and Technology	637
IV.	Science, Technology and International Relations	639
A.	Emergence of Regional and International Science and Technology Policies	640
1.	Regional and International Policies for the Development and Utilization of Science and Technology at the National Level	640
2.	Regional and International Policies for the Development and Utilization of Science and Technology at the Global Level	641
B.	Influence of External Pressures on National Science and Technology Policies	642
	<i>Bibliographic Introduction</i>	643
A.	Introductions to the Field	643
B.	Reviews of the Literature	644
C.	Bibliographic Information	644
D.	Statistics	645
E.	Journals	645
	<i>Bibliography</i>	645
