Preface *page xi*

1	Introduction	1
1.1	Index Numbers and Economic Theory	1
1.2	Actions or Reactions? Quantity Versus Price Effects	6
1.3	Simple Input Deflation in More Detail	9
1.4	Homogeneity and Related Properties	12
1.5	A Uniqueness and Impossibility Theorem	16
1.6	Efficiency Measurement and Production Quantity Indexes	20
1.7	Productivity Measurement	23
1.8	Other Approaches	25
2	Principles of Price and Quantity Measurement: Outputs	27
2.1	The General Approach	27
2.2	Laspeyres and Paasche Indexes	31
2.3	New Goods and Other Corner Solutions	34
2.4	Modeling Production Opportunities: An Overview	39
2.5	“Optimistic” and “Pessimistic” PPFs	42
2.6	The Fully Closed Economy	45
2.7	The Fully Open Economy	47
2.8	The Hybrid Economy	50
2.9	General Factor Supply Conditions: The Monopsony Case	57
2.10	A Digression: Alternative Treatments of Monopoly	60
2.11	The General Competitive Case	65

3	Comparative Statics: Outputs	73
3.1	Introduction: The Production Possibility Map	73
3.2	The Fully Closed Economy: Hicks-Neutral Technical Change	78
3.3	The Fully Closed Economy: Changing Factor Supplies and Factor-Augmenting Technical Change	80
3.4	The Fully Closed Economy: General Technical Change	82
3.5	The Fully Open Economy: The PPM and Homotheticity	83
3.6	The Fully Open Economy: Changing Factor Prices	86
3.7	The Fully Open Economy: Factor-Augmenting Technical Change	90
3.8	The Fully Open Economy: Hicks-Neutral Technical Change	96
3.9	The Hybrid Economy: General Considerations	97
3.10	The Hybrid Economy: Changing Factor Prices	102
3.11	The Hybrid Economy: Factor-Augmenting Technical Change	105
3.12	The General Competitive Case	108
3.13	The Monopsony Case	114
3.14	Monopoly	120
4	Principles of Price and Quantity Measurement: Inputs	124
4.1	Introduction	124
4.2	Corner Solutions	128
4.3	Quality Change: The Repackaging Theorem	130
4.4	The Fully Open Case	134
4.5	General Demand Conditions: The Monopolistic Case	136
4.6	The General Competitive Case	139
5	Comparative Statics: Inputs	144
5.1	Introduction	144
5.2	The Fully Open Case: Formal Model	145
5.3	The Fully Open Case: Changing Output Prices	148
5.4	The Fully Open Case: Hicks-Neutral Technical Change	149
5.5	The Fully Open Case: Uniform Factor-Augmenting Technical Change	150
5.6	The Fully Open Case: Factor-Augmenting Change in a Single Industry	156
5.7	Monopoly	159

6	Aggregation	164
6.1	Introduction: Types of Aggregation	164
6.2	Horizontal Aggregation	165
6.3	Conglomerate Aggregation: Outputs	169
6.4	Conglomerate Aggregation: Inputs	173
6.5	Vertical Relationships: Combining Input-Price and Output-Price Indexes	178
	Appendix: On Perfect Aggregation in the National-Output Deflator and Generalized Rybczynski Theorems	183
	<i>References</i>	205
	<i>Index</i>	219
