

INSIDE THE FIRM

The Inefficiencies of Hierarchy

HARVEY LEIBENSTEIN

Harvard University Press

Cambridge, Massachusetts, and London, England

1987

Contents

1. Organization and the Procedural Perspective	1
The Procedural Perspective	6
The Connections of the Various Components of the Book	9
2. Decision Occurrences	11
The Inner Preference Set	12
Decision Procedures	13
Approximate Maximizing Procedures	15
Are Noncalculating Procedures Optimal?	16
The Yerkes-Dodson Law and Decision Procedures	18
The Emotion Spillover Theory of Decision Making	20
Inert Areas and Procedural Decisions	22
→ The Employment Contract and Commitment Decisions	22
Summary and Conclusions	24
3. On the Anatomy of Decisions	26
Decision Triggers and Finalizations	26
Options, Selection Rules, and Search Processes	28
Notes on Procedures and Procedure Sets	32
Conclusions	33
4. Economics of Inertia	35
Modeling Inertial Frames	37
Some Consequences of Inertia	41
5. Productivity: The Hidden Prisoner's Dilemma Analysis	43
Self-Interest and Trust: The Prisoner's Dilemma Example	44
The Productivity Problem in the Prisoner's Dilemma Framework	48
Peer Group and Golden-Rule Standards	52

The Twofold Prisoner's Dilemma Problem	57
Summary and Conclusions	58
6. Conventions, Coordination, and Decisions	60
The Theory of Conventions	62
Conventions as a Formalism	66
Does a Convention Have to Be Optimal?	71
Summary and Conclusions	75
7. Conventions as a Solution to the Intrafirm Prisoner's Dilemma Problem	77
The Effort Convention	79
Working Conditions and Wages	86
Wages: Convention or Negotiation?	91
On the Stability of Conventions	95
Summary and Conclusions	96
8. Intrafirm Effort Decisions: Monitoring and Sanctions	98
The Voluntarily Motivated Effort Hypothesis	99
Hierarchical Sanctions	102
Peer Sanctions and Sanction Levels	107
Sanctions and Nonmaximizing Behavior	114
Concluding Remarks	115
9. Equilibrium, Entrepreneurship, and Inertia	116
Equilibrium and Quasi-Equilibrium	117
What Do Entrepreneurs Do?	118
The Supply of Entrepreneurs and <i>n</i> Achievement Theory	120
Behavior of Firms under Loose Equilibrium	121
Summary and Conclusions	125
10. An Implications Sampler	127
Summary of Basic Postulates	129
Effort Convention Implications	130
Firm-Level Implications	131
11. The Power of Hierarchy	135
The Power and Size of Hierarchy	140
The Israeli Kibbutz: Size and Hierarchy	144
The Hierarchical Solution to the Size Problem	146

12. Specialization, Hierarchy, and Internal Inefficiency	150
Specialization, Effort, and Motivation	151
Process Cuts, Specialization, and Recombinings	154
Related Invisible "Cutouts"	158
Hierarchical Levels, Distance, and Separations	160
Controls, Incentives, and Motivations under Hierarchies	161
Motivational Interdependencies and Hierarchy	164
Vertical Groups	166
The Commitment Network	169
Internal Entrepreneurship and the Commitment Network	172
Factionalism	173
Autonomous Internal Organizations	174
Summary	174
13. On Japanese Ethos, Culture, and Management	177
Borrowing	179
More on Confucianism	182
The Social Anthropology Approach	185
The Theory of Amae	192
Summary	196
14. Japanese and Western Management Systems:	
The Contrasts	199
The Career Elements of the JMS	201
Lifetime Employment Ideal	203
Jobs, Training, and Unions	208
The Japanese Payment and Bonus System	212
Community, Authority, and Consensus	213
The Industrial Group	215
Summary and Conclusions	216
15. Putting It All Together	220
The Basic Model	220
Pressure, Hierarchy, and Effort	222
A Diagrammatic Treatment of the Model	231
Sources of Inefficiency	234
Efficiency Wages	238
Some Concluding Remarks	241
Appendix. Language, Choice, and Nonoptimization	245
Comparative Language Problems	248
Ex Ante versus Ex Post Arguments	249

The Revealed Preference Case	251
On Objective Function Misspecifications	252
Are Nonoptimal Choices Always Translatable?	254
The Disutility of Maximization	255
Inertia, Inert Areas, and Utility	258
Decision Making: Individuals versus Groups	261
Language and the Concept of Technical Inefficiency	261
Summary	262
 References	 263
 Index	 273
