# CONTENTS

<i>Preface</i>	<i>page</i> xiii
<b>1 Introduction and overview</b>	1
1.1 An example of an oligopoly	3
1.2 Oligopoly in comparison with other market forms	6
1.3 Outline of the remaining chapters	10
1.4 Further comments	14
<b>2 The Cournot model of oligopoly</b>	19
2.1 A historical note	20
2.2 Cournot's model: a two-firm simple example	22
2.3 Cournot's model: the general case	27
<i>Specification of the model</i>	27
<i>Cournot equilibrium and some of its characteristics</i>	29
<i>The significance of Cournot's insight</i>	32
2.4 Cournot and competitive equilibrium	34
2.5 Cournot's stability analysis and the genesis of the reaction function	40
<i>Stability in a two-firm example</i>	41
<i>Stability in the general model</i>	42
<i>Is stability meaningful in the Cournot model?</i>	44
	vii

2.6	Cournot's first reviewer and early critics	46
2.7	Summary	48
<b>3</b>	<b>Differentiated products models of oligopoly and monopolistic competition</b>	<b>50</b>
3.1	On the meaning of differentiated products	52
	<i>A note on the way products cluster into groups</i>	53
	<i>The features that cause differentiation</i>	54
	<i>Firms' choices in product design</i>	55
3.2	The Hotelling model of spatial duopoly	56
3.3	A more general model of differentiated products oligopoly	62
3.4	Chamberlin's two versions of monopolistic competition	71
3.5	A differentiated products model with output levels as the decision variables	73
3.6	Summary	75
<b>4</b>	<b>Product choice and location</b>	<b>77</b>
4.1	On the nature of the characteristics space	78
	<i>Combinable and noncombinable consumption</i>	78
	<i>A critique of the characteristics approach</i>	79
4.2	Further elaboration of the Lancaster approach	81
	<i>The producers</i>	81
	<i>Consumers and market equilibrium</i>	83
	<i>The efficiency of monopolistic competition</i>	86
4.3	A combinable consumption model	90
	<i>The conditions of production</i>	90
	<i>The consumers</i>	92
	<i>The spanning property</i>	92
4.4	Hotelling revisited	94
	<i>Locational choice in the Hotelling model</i>	95
	<i>The Hotelling model with a small modification</i>	96
	<i>A model of location on a circle</i>	99
4.5	Summary	102

<b>5</b>	<b>Reaction functions</b>	104
5.1	Atemporal reaction functions	106
	<i>Bowley's conjectural variation for two firms</i>	106
	<i>The Stackelberg leader-follower model</i>	107
	<i>Critique of conjectural variation in static models</i>	109
	<i>A one-period model with an elaborate decision process</i>	110
5.2	The naive extension of atemporal reaction functions into intertemporal models	114
5.3	Reasonable reaction function equilibria under complete information: the case of smooth adjustment	116
	<i>The optimal reaction function for a single firm</i>	117
	<i>Market equilibrium when firms choose reaction functions</i>	121
	<i>Reaction functions and time-dependent models</i>	122
5.4	Reasonable reaction function equilibria: the case of tacit collusion or self-enforcing agreements	123
	<i>A self-enforcing agreement for two firms</i>	124
	<i>A numerical example of a self-enforcing agreement</i>	127
	<i>Self-enforcing agreements for n firms</i>	130
	<i>Credible threats and self-enforcing agreements</i>	131
	<i>A special equilibrium on the profit frontier</i>	131
	<i>A further look at equilibria based on self-enforcing agreements</i>	132
5.5	Summary	134
<b>6</b>	<b>Oligopoly and advertising</b>	136
6.1	A provisional definition of advertising	137
6.2	Advertising and the consumer	138
	<i>Advertising as a means of transmitting information</i>	138
	<i>Advertising and tastes</i>	140

6.3	Advertising and its effect on consumer demand	142
	<i>The interfirm aspects of advertising</i>	143
	<i>The intertemporal aspects of advertising</i>	145
	<i>Advertising messages and advertising expenditures</i>	146
6.4	Formal models of advertising in monopoly and oligopoly	148
	<i>A static model of advertising for a monopolistic firm</i>	149
	<i>A model of advertising for a multiperiod monopolist</i>	150
	<i>A model of oligopoly with advertising</i>	152
6.5	Summary	160
<b>7</b>	<b>Oligopoly with capital</b>	162
7.1	Capital stock as productive capacity	163
7.2	Capital stock as the determinant of the marginal cost curve	166
7.3	A neoclassical cost structure combined with increasing marginal cost of investment	170
7.4	Natural asymmetric equilibria	170
7.5	Price leadership and the timing of firms' actions	174
7.6	Summary	178
<b>8</b>	<b>Entry</b>	180
8.1	Limit price models of entry	182
	<i>An example of the simplest limit price model</i>	182
	<i>Adjustment cost as a source of limit pricing</i>	183
	<i>Preentry pricing as an information source to the entrant</i>	186
8.2	Capital stocks and scale economies as entry barriers	192
	<i>Sylos-Labini's example of static entry</i>	192
	<i>A dynamic model of entry with a rational, maximizing entrant</i>	194
	<i>Comments on the dynamic entry model</i>	198
8.3	Sequential entry	201

<i>Contents</i>	xi
8.4 Exit	204
8.5 Summary	205
<b>9 Oligopoly and noncooperative game theory</b>	<b>207</b>
9.1 Overview of game theory	207
9.2 A model of a noncooperative game	210
<i>A formal description of a game</i>	211
<i>The meaning of strategy</i>	211
<i>The Nash equilibrium</i>	212
9.3 Applications of game theory to oligopoly	215
<i>The differentiated products price model</i>	215
<i>The Stackelberg leader-follower model</i>	216
<i>Smooth reaction functions in multiperiod models</i>	218
<i>A multiperiod model with advertising</i>	221
9.4 Perfect equilibrium points	222
9.5 Concluding comments	226
<i>Notes</i>	227
<i>References</i>	231
