

TECHNIQUES AND INSTRUMENTATION IN ANALYTICAL CHEMISTRY — VOLUME 17

# QUALITY ASSURANCE FOR ENVIRONMENTAL ANALYSIS

**Method Evaluation within the Measurements  
and Testing Programme (BCR)**

Edited by

**Ph. Quevauviller**

**E.A. Maier**

**B. Griepink**

*European Commission, Measurements and Testing Programme,  
rue de la Loi 200, B-1049 Brussels, Belgium*

1995

**ELSEVIER**

Amsterdam — Lausanne — New York — Oxford — Shannon — Tokyo

## **CONTENTS**

Preface

## **CHAPTER 1. QUALITY ASSURANCE FOR ENVIRONMENTAL ANALYSIS**

by Ph. Quevauviller, E.A. Maier and B. Griepink

1.1.	Overview of quality assurance principles	2
1.1.1.	General	2
1.1.2.	Statistical control	2
1.1.3.	Comparison with results of other methods	3
1.1.4.	Use of certified reference materials	3
1.1.5.	Interlaboratory studies	4
1.2.	Sources of errors in environmental analyses	4
1.2.1.	Potential sources of error in inorganic analyses	4
1.2.1.1.	Sample digestion	5
1.2.1.2.	Other sample pre-treatment	6
1.2.1.3.	Final determination	6
1.2.2.	Potential sources of error in speciation analyses	7
1.2.2.1.	Extraction	7
1.2.2.2.	Derivatization	9
1.2.2.3.	Separation	10
1.2.2.4.	Detection	11
1.2.3.	Potential sources of error in organic analyses	12
1.2.3.1.	Pretreatment and extraction	12
1.2.3.2.	Clean-up and concentration	14
1.2.3.3.	Separation	15
1.2.3.4.	Final detection	18
1.2.3.5.	Calibration	19
1.3.	Conclusions	23
	References	23

## **CHAPTER 2. DEVELOPMENT OF ICPMS AND ID-ICPMS WITH THE DETERMINATION OF Pb AND Hg IN ENVIRONMENTAL MATRICES AS AN EXAMPLE**

*by M. Campbell*

2.2.	Choice of instrumentation . . . . .	28
2.3.	ID-ICP-MS . . . . .	29
2.3.1.	Precision and performance . . . . .	29
2.3.2.	Routine applications . . . . .	30
2.3.3.	More complicated applications . . . . .	32
2.3.4.	Speciation and metabolic studies . . . . .	35
	References . . . . .	37

## **CHAPTER 3. DETECTION OF SOURCES OF ERROR IN THE DETERMINATION OF Cr IN ENVIRONMENTAL MATRICES BY FAAS AND ETAAS**

*by A. Sahuquillo, R. Rubio and G. Rauret*

3.1.	Determination of chromium by FAAS . . . . .	40
3.1.1.	State of the art . . . . .	40
3.1.1.1.	Type of flame . . . . .	40
3.1.1.2.	Effect of burner height . . . . .	40
3.1.1.3.	Instrumental parameters . . . . .	41
3.1.1.4.	Effect of the oxidation state . . . . .	41
3.1.1.5.	Interferences in FAAS . . . . .	41
3.1.1.6.	Conclusions . . . . .	42
3.1.2.	Systematic study of chromium determination by FAAS . . . . .	42
3.1.2.1.	Type of flame and burner height . . . . .	42
3.1.2.2.	Interferences . . . . .	48
3.1.2.3.	Releaser agents . . . . .	49
3.1.2.4.	Conclusions . . . . .	50
3.1.3.	Procedure . . . . .	50
3.1.4.	Validation of the method . . . . .	51
3.2.	Determination of chromium by ETAAS . . . . .	51
3.2.1.	State of the art . . . . .	51
3.2.1.1.	Background correction . . . . .	52
3.2.1.2.	Effect of the interferences . . . . .	52
3.2.1.3.	Type of graphite furnace and use of L'vov platform . . . . .	53
3.2.1.4.	Effect of the oxidation state . . . . .	53
3.2.1.5.	Calibration mode . . . . .	53
3.2.1.6.	Conclusions . . . . .	53
3.2.2.	Systematic study of chromium determination by ETAAS . . . . .	54
3.2.2.1.	Instrumental conditions . . . . .	54
3.2.2.2.	Interferences . . . . .	55
3.2.3.	Procedures . . . . .	57
3.2.4.	Validation of the method . . . . .	57
3.3.	Conclusions . . . . .	58
	References . . . . .	60

## **CHAPTER 4. ANALYSIS OF ENVIRONMENTAL AND BIOLOGICAL SAMPLES BY ATOMIC SPECTROSCOPIC METHODS**

*by M. Hoenig and M.F. Guns*

4.1.	Preparation of samples . . . . .	64
4.1.1.	Liquid samples . . . . .	64

4.1.2.	Solid samples . . . . .	64
4.1.2.1.	Dry ashing methods . . . . .	64
4.1.2.2.	Wet digestion methods . . . . .	65
4.1.2.3.	Direct analysis of solid and solid slurried samples . . . . .	65
4.1.3.	Usual procedures . . . . .	67
4.1.3.1.	Plants . . . . .	67
4.1.3.2.	Animal tissues . . . . .	67
4.1.3.3.	Soils, sediments and particulate matter . . . . .	68
4.2.	Plasma atomic emission spectrometry . . . . .	68
4.2.1.	Basic principles and instrumentation . . . . .	68
4.2.2.	Interferences . . . . .	69
4.2.2.1.	Transport interferences . . . . .	69
4.2.2.2.	Chemical interferences . . . . .	69
4.2.2.3.	Ionization interferences . . . . .	69
4.2.2.4.	Spectral interferences . . . . .	70
4.3.	Atomic absorption spectrometry . . . . .	70
4.3.1.	Basic principles and instrumentation . . . . .	71
4.3.2.	Flame atomization . . . . .	72
4.3.2.1.	Nebulization . . . . .	72
4.3.2.2.	Flames . . . . .	73
4.3.2.3.	Flame microsampling . . . . .	74
4.4.	Vapour generation techniques . . . . .	74
4.4.1.	Hydride forming elements . . . . .	74
4.4.2.	Mercury . . . . .	74
4.4.2.1.	Determination . . . . .	74
4.4.2.2.	Sources of errors . . . . .	75
4.5.	Electrothermal atomization . . . . .	75
4.5.1.	General considerations . . . . .	75
4.5.2.	Atomizer . . . . .	76
4.5.3.	Electrothermal program . . . . .	76
4.5.4.	Interferences . . . . .	77
4.5.4.1.	Spectral interferences . . . . .	78
4.5.4.2.	Non-spectral interferences . . . . .	80
4.5.5.	Role of the graphite . . . . .	86
4.6.	Atomic absorption spectrometry / conclusions . . . . .	86
	References . . . . .	87

## CHAPTER 5. VALIDATION OF NEUTRON ACTIVATION ANALYSIS TECHNIQUES

by K. Heydorn

5.1.	Critical review . . . . .	90
5.1.1.	The BIPM philosophy . . . . .	90
5.1.2.	Advantages of NAA . . . . .	93
5.1.3.	Pitfalls . . . . .	93
5.1.4.	Sample homogeneity . . . . .	94
5.2.	Methods of validation . . . . .	94
5.2.1.	Uncertainty budget . . . . .	95
5.2.2.	Validation of computer programs . . . . .	96
5.2.3.	Validation of the calibration function . . . . .	99
5.3.	Practical validation . . . . .	100
5.3.1.	Experimental results for validation . . . . .	101

5.3.2. Verification and traceability . . . . .	107
5.4. Conclusions . . . . .	109
References . . . . .	110

## CHAPTER 6. FLOW-THROUGH (BIO)CHEMICAL SENSORS IN ENVIRONMENTAL ANALYSIS

by M.D. Luque de Castro and M. Valcárcel

6.1. Flow through (bio)chemical sensors based on integrated reaction and detection . . . . .	118
6.1.1. Sensors based on an immobilized biocatalyst: biosensors . . . . .	118
6.1.2. Sensors based on an immobilized non-biological catalyst . . . . .	120
6.1.3. Immunosensors . . . . .	122
6.1.4. Flow-through sensors based on consumption of the immobilized reagent . . . . .	124
6.1.5. Sensors based on an immobilized regenerable reagent . . . . .	126
6.2. Flow-through chemical sensors based on integrated separation and detection . . . . .	127
6.2.1. Flow-through sensors based on integrated gas-diffusion and detection . . . . .	128
6.2.2. Flow-through sensors based on integrated liquid-liquid separation and detection . . . . .	131
6.2.3. Flow-through sensors based on integrated sorption and detection . . . . .	134
6.2.4. Flow-through sensors for multideterminations based on integrated retention and detection . . . . .	139
6.2.5. Ion-selective electrodes and ion-sensitive field-effect transistors . . . . .	143
6.3. Flow-through chemical sensors based on integrated reaction, separation and detection . . . . .	148
6.3.1. Flow-through (bio)chemical sensors based on integrated reaction, gas diffusion and detection . . . . .	150
6.3.2. Flow-through sensors based on integrated reaction, liquid-liquid separation and detection . . . . .	152
6.3.3. Flow-through (bio)chemical sensors based on integrated reaction, sorption and detection . . . . .	154
6.4. Final remarks . . . . .	158
References . . . . .	159

## CHAPTER 7. FIBER OPTICAL SENSORS APPLIED TO FIELD MEASUREMENTS

by C. Cámará, C. Pérez-Conde, M.C. Moreno-Bondi and C. Rivas

7.1. Determination of target compounds . . . . .	167
7.2. Validity of sensors . . . . .	168
7.3. Instrumentation and design . . . . .	170
7.4. Water monitoring . . . . .	173
7.4.1. pH sensors . . . . .	174
7.4.2. Sensing cations and anions . . . . .	177
7.4.3. Organochlorides, aromatic hydrocarbons and mineral oils . . . . .	179
7.4.4. Pesticides . . . . .	183
7.4.5. Seawater gases . . . . .	184
7.5. Air pollution . . . . .	185
7.5.1. Carbon monoxide and dioxide . . . . .	185
7.5.2. Nitrogen oxides . . . . .	186
7.5.3. Hydrogen sulphide and sulphur dioxide . . . . .	187
7.5.4. Ammonia . . . . .	187
7.5.5. Methane . . . . .	188

7.5.6. Other air pollutants . . . . .	188
7.6. Conclusions . . . . .	189
References . . . . .	189

## **CHAPTER 8. CHROMIUM SPECIATION IN ENVIRONMENTAL AND BIOLOGICAL SAMPLES**

*by K. Vercoutere and R. Cornelis*

8.1. Different species of Cr and their toxicity . . . . .	195
8.2. Cr speciation in water . . . . .	197
8.2.1. Methods of final determination . . . . .	197
8.2.1.1. Atomic absorption spectrometry, atomic emission spectrometry . . . . .	198
8.2.1.2. Chemiluminescence . . . . .	198
8.2.1.3. Electrochemical methods . . . . .	198
8.2.1.4. Isotope dilution mass spectrometry (IDMS) . . . . .	199
8.2.1.5. Inductively coupled plasma mass spectrometry (ICP-MS) . . . . .	199
8.2.1.6. Neutron activation analysis . . . . .	200
8.2.1.7. Spectrophotometry . . . . .	200
8.2.2. Separation methods . . . . .	201
8.2.2.1. Solvent extraction . . . . .	201
8.2.2.2. Chromatography . . . . .	202
8.2.2.3. Coprecipitation . . . . .	204
8.3. Cr speciation in welding fumes . . . . .	205
8.4. Cr speciation in biological samples . . . . .	207
8.5. Use and availability of reference materials . . . . .	208
8.6. Future developments . . . . .	210
References . . . . .	211

## **CHAPTER 9. DETERMINATION OF ALUMINIUM SPECIES IN NATURAL WATERS**

*by B. Fairman and A. Sanz-Medel*

9.1. The toxic aluminium species in aquatic systems . . . . .	216
9.2. Analytical methods for the speciation of aluminium . . . . .	216
9.2.1. 8-Hydroxyquinoline extraction procedures . . . . .	217
9.2.2. Driscoll methods . . . . .	218
9.2.3. Chelex-100 based methods . . . . .	222
9.2.4. Fluoride electrode methods . . . . .	223
9.2.5. HPLC methods . . . . .	223
9.2.6. $^{27}\text{Al}$ NMR studies . . . . .	225
9.3. Water sampling for aluminium speciation analysis . . . . .	225
9.3.1. To filter or not to filter . . . . .	226
9.4. Validation of aluminium speciation analytical methods . . . . .	227
9.5. Conclusions and future perspectives . . . . .	229
References . . . . .	231

## CHAPTER 10. SELENIUM SPECIATION ANALYSES IN WATER AND SEDIMENT MATRICES

by C. Cámera, M.G. Cobo, M.A. Palacios, R. Muñoz and O.F.X. Donard

10.1	Selenium species in the environment . . . . .	237
10.2	Analytical methodology - General remarks . . . . .	240
10.3	Method validation . . . . .	240
10.4	Stability of selenium species . . . . .	241
10.5	Analytical methods for selenium speciation . . . . .	245
	10.5.1. Fluorimetric methods . . . . .	245
	10.5.2. Electrothermal atomic absorption spectrometry . . . . .	247
	10.5.3. Hydride generation / atomic detectors . . . . .	248
	10.5.3.1. Interferences . . . . .	251
	10.5.3.2. Ethylation . . . . .	251
	10.5.4. Hyphenated techniques . . . . .	252
	10.5.4.1. Liquid chromatography / atomic detectors . . . . .	252
	10.5.4.2. Gas chromatography . . . . .	254
	10.5.4.2.1. Air samples . . . . .	254
	10.5.4.2.2. Water samples . . . . .	255
	10.5.4.2.3. Soil samples . . . . .	256
	10.5.4.2.4. Biological samples . . . . .	257
	10.5.5. Electrochemical methods . . . . .	257
	10.5.6. Neutron activation analysis . . . . .	259
References	.....	259

## CHAPTER 11. ANTIMONY SPECIATION IN WATER

by M.B. de la Calle-Gutiñas, Y. Madrid and C. Cámera

11.1.	Stability of antimony species . . . . .	264
11.2.	Analytical methods for the determination of inorganic antimony . . . . .	266
	11.2.1. Liquid-liquid extraction . . . . .	266
	11.2.1.1. Spectrophotometric determination . . . . .	266
	11.2.1.2. Detection by electrothermal atomic absorption spectrometry . . . . .	269
	11.2.2. Complex formation with immobilized reagents . . . . .	275
	11.2.3. Selective generation of antimony hydride . . . . .	276
	11.2.3.1. By pH control . . . . .	276
	11.2.3.2. Other methods . . . . .	280
	11.2.4. Electroanalytical methods . . . . .	281
11.3.	Conclusions . . . . .	281
References	.....	282

## CHAPTER 12. ARSENIC SPECIATION IN ENVIRONMENTAL MATRICES

by A. Amran, F. Lagarde, M.J.F. Leroy, A. Lamotte, C. Demesmay, M. Ollé, M. Albert, G. Rauret and J.F. López-Sánchez

12.1.	Critical review of existing methods . . . . .	288
	12.1.1. Hydride generation method . . . . .	288
	12.1.1.1. Hydride generation and separation . . . . .	288

12.1.1.2.	Detection . . . . .	289
12.1.2.	Liquid chromatography coupled with specific detectors . . . . .	289
12.1.2.1.	Separation by ion-pair chromatography . . . . .	290
12.1.2.2.	Separation by ion-exchange chromatography . . . . .	290
12.1.2.3.	Detection by atomic absorption spectrometry . . . . .	290
12.1.2.4.	Detection by inductively coupled plasma atomic emission spectrometry . . . . .	291
12.1.2.5.	LC procedures involving hydride generation . . . . .	291
12.1.2.6.	HPLC coupled to ICP-MS . . . . .	292
12.2.	Means of validation . . . . .	292
12.3.	Description of a validated technique . . . . .	293
12.3.1.	Sample treatment . . . . .	294
12.3.1.1.	Analysis of seafood materials . . . . .	294
12.3.1.2.	Sediment analysis . . . . .	294
12.3.2.	Arsenic speciation . . . . .	296
12.3.2.1.	Procedures used: Laboratory 1 . . . . .	296
12.3.2.2.	Procedures used: Laboratory 2 . . . . .	297
12.3.2.3.	Procedures used: Laboratory 3 . . . . .	299
12.4.	Conclusions . . . . .	301
	References . . . . .	303

## CHAPTER 13. MERCURY SPECIATION IN BIOLOGICAL MATRICES

by I. Drabæk and Å. Iverfeldt

13.1.	Means of validation . . . . .	308
13.1.1.	Extraction . . . . .	309
13.1.2.	Separation . . . . .	310
13.1.3.	Derivatization . . . . .	311
13.1.4.	Detection . . . . .	311
13.1.5.	Primary calibrants . . . . .	312
13.2.	Critical review of derivatization methods . . . . .	312
13.3.	Advices on how to take up Hg speciation analyses . . . . .	314
13.4.	Conclusions . . . . .	315
	References . . . . .	316

## CHAPTER 14. SPECIATION ANALYSIS OF ORGANOLEAD COMPOUNDS. STATUS AND FUTURE PROSPECTS

by R. Łobiński, W.M.R. Dirkx, J. Szpunar-Łobińska and F.C. Adams

14.1.	Sources and concentrations of interest of organolead compounds . . . . .	320
14.1.1.	Atmosphere . . . . .	320
14.1.2.	Air gaseous phase . . . . .	321
14.1.3.	Air aerosol . . . . .	323
14.1.4.	Atmospheric deposits . . . . .	323
14.1.5.	Hydrosphere . . . . .	324
14.1.6.	Sediments, soil and dusts . . . . .	325
14.1.7.	Biological materials . . . . .	325
14.1.8.	Miscellaneous . . . . .	326
14.2.	Sample handling prior to measurement . . . . .	326

14.2.1.	<b>Sampling and storage</b>	326
14.2.1.1.	Air	326
14.2.1.2.	Water samples	328
14.2.1.3.	Sediments and soils	329
14.2.1.4.	Biological materials	330
14.2.2.	<b>Extraction</b>	330
14.2.3.	<b>Preconcentration</b>	331
14.2.4.	<b>Derivatization of ionic organolead compounds</b>	331
14.3.	<b>Instrumental aspects of the determination of organolead compounds</b>	332
14.3.1.	<b>Gas chromatography based hyphenated techniques</b>	332
14.3.1.1.	Sample introduction	332
14.3.1.2.	Separation of the analytes	333
14.3.1.3.	Transfer lines	336
14.3.2.	<b>Detection techniques</b>	336
14.3.2.1.	Atomic absorption spectrometry (AAS)	336
14.3.2.2.	Atomic emission spectrometry (AES)	337
14.3.2.3.	Mass spectrometry (MS)	340
14.3.3.	<b>Liquid chromatography (LC) based hyphenated techniques</b>	340
14.3.3.1.	LC-AAS coupling	340
14.3.3.2.	LC-MS coupling	342
14.3.4.	<b>Electrochemical techniques</b>	342
14.3.5.	<b>Summary of characteristics of hyphenated techniques used for organolead speciation analysis</b>	344
14.4.	<b>Analysis of environmental materials</b>	344
14.4.1.	<b>Analysis of water samples</b>	344
14.4.2.	<b>Sediments, soil and dust</b>	347
14.4.3.	<b>Biological tissues</b>	349
14.5.	<b>Accuracy</b>	349
14.5.1.	<b>Contamination risk</b>	349
14.5.2.	<b>Losses</b>	351
14.5.3.	<b>Calibrants</b>	351
14.5.4.	<b>Validation of the results</b>	351
14.6.	<b>Conclusions</b>	352
	<b>References</b>	352

## CHAPTER 15. SPECIATION ANALYSIS OF ORGANOTIN BY GC-AAS AND GC-AES AFTER EXTRACTION AND DERIVATIZATION

by W.M.R. Dirkx, R. Łobiński and F.C. Adams

15.1.	<b>Instrumentation</b>	360
15.1.1.	<b>Gas chromatography</b>	360
15.1.2.	<b>Interface design</b>	361
15.1.2.1.	GC - AES	361
15.1.2.2.	GC - quartz furnace AAS	361
15.1.2.3.	GC - graphite furnace AAS	363
15.1.3.	<b>Detectors</b>	365
15.1.3.1.	Atomic emission spectrometry	365
15.1.3.2.	Quartz furnace atomic absorption spectrometry	365
15.1.3.3.	Graphite furnace atomic absorption spectrometry	366
15.2.	<b>Operational conditions</b>	366
15.2.1.	<b>GC related parameters</b>	367
15.2.1.1.	Injections conditions	367

15.2.1.2.	Gas chromatographic separation . . . . .	374
15.2.2. Interface design . . . . .		377
15.2.2.1.	Packed column - quartz furnace interface . . . . .	377
15.2.2.2.	Megabore column - quartz furnace interface . . . . .	378
15.2.2.3.	Megabore column - graphite furnace interface . . . . .	379
15.2.2.4.	The GC - AES interface . . . . .	380
15.2.3. Detector design . . . . .		380
15.2.3.1.	Quartz furnace atomic absorption spectrophotometer . . . . .	380
15.2.3.2.	Graphite furnace atomic absorption spectrophotometer . . . . .	382
15.2.3.3.	Atomic absorption spectrometer . . . . .	387
15.3. Analytical characteristics . . . . .		389
15.3.1. Instrumental detection limits . . . . .		389
15.3.1.1.	Atomic emission spectrometry . . . . .	389
15.3.1.2.	Atomic absorption spectrometry . . . . .	389
15.3.2. Experimental detection limits . . . . .		391
15.3.3. Reproducibility . . . . .		392
15.3.4. Dynamic range . . . . .		392
15.4. Sample handling . . . . .		393
15.4.1. Water samples . . . . .		393
15.4.2. Sediment samples . . . . .		397
15.4.3. Biological materials . . . . .		397
15.5. Accuracy of the analysis . . . . .		400
15.5.1. Preparation and quantification of calibrants . . . . .		400
15.5.2. Interferences . . . . .		400
15.5.3. Sources of errors . . . . .		404
15.5.4. Comparison studies . . . . .		404
15.5.5. Interlaboratory studies . . . . .		406
15.6. Conclusions . . . . .		406
References . . . . .		407

## CHAPTER 16. HIGH PERFORMANCE LIQUID CHROMATOGRAPHY - ISOTOPE DILUTION - INDUCTIVELY COUPLED PLASMA - MASS SPECTROMETRY FOR LEAD AND TIN SPECIATION IN ENVIRONMENTAL SAMPLES

by S.J. Hill, A. Brown, C. Rivas, S. Sparkes and L. Ebdon

16.1.	Overview of speciation methods for lead and tin . . . . .	412
16.2.	Isotope dilution in HPLC-ICP-MS . . . . .	413
16.3.	Practical considerations in ID-HPLC-ICP-MS . . . . .	414
16.3.1.	Coupling HPLC to ICP-MS . . . . .	414
16.3.2.	Potential problems with gradient elution HPLC-ICP-MS . . . . .	420
16.3.3.	Organometallic calibrants for isotope dilution analysis . . . . .	424
16.3.3.1.	Preparation of enriched lead isotope calibrants . . . . .	424
16.3.3.2.	Preparation of enriched tin isotope calibrants . . . . .	426
16.3.4.	Data processing in HPLC-ICP-MS and ID-HPLC-ICP-MS . . . . .	426
16.3.5.	The determination of trimethyllead by HPLC-ICP-MS in a rainwater sample . . . . .	428
16.4.	Evaluation of the ID-HPLC-ICP-MS technique . . . . .	430
16.4.1.	Results . . . . .	433
References . . . . .		434

## **CHAPTER 17. SPECIATION OF ORGANOTIN COMPOUNDS IN ENVIRONMENTAL SAMPLES BY GC-MS**

*by R. Morabito, S. Chiavarini and C. Cremisini*

17.1.	Analytical methods for the environmental analysis of organotins . . . . .	437
17.1.1.	Extraction . . . . .	438
17.1.2.	Derivatization . . . . .	438
17.1.3.	Analytical techniques . . . . .	439
17.2.	GC/MS analysis of organotins . . . . .	439
17.2.1.	Which MS detector ? . . . . .	440
17.2.2.	Gas chromatographic characteristics of organotins . . . . .	440
17.2.3.	Mass spectral characteristics of organotins . . . . .	443
17.3.	Analytical methods . . . . .	452
17.3.1.	Reagents and materials . . . . .	452
17.3.2.	Instrumentation . . . . .	453
17.3.3.	Procedures . . . . .	454
17.3.3.1.	Sediment and mussel samples . . . . .	454
17.3.3.1.1.	Recovery tests from sediment samples . . . . .	454
17.3.3.1.2.	Recovery tests from mussel samples . . . . .	455
17.3.3.2.	Water samples . . . . .	456
17.3.3.2.1.	Liquid/liquid extraction . . . . .	456
17.3.3.2.2.	Solid phase extraction . . . . .	457
17.3.3.3.	Remarks on the procedures . . . . .	458
References . . . . .		460

## **CHAPTER 18. DEVELOPMENT OF SUPERCRITICAL FLUID EXTRACTION PROCEDURES FOR THE DETERMINATION OF ORGANOTIN COMPOUNDS IN SEDIMENT**

*by J.M. Bayona*

18.1.	Fundamental aspects . . . . .	466
18.1.1.	SFE instrumentation . . . . .	467
18.1.2.	Speciation techniques . . . . .	469
18.2.	Development of supercritical fluid extraction procedures . . . . .	470
18.2.1.	Variables in SFE . . . . .	470
18.2.2.	Method development . . . . .	471
18.2.3.	Method validation . . . . .	479
18.3.	Application and intercomparison between procedures . . . . .	482
18.3.1.	Intercomparison between SFE and atmospheric pressure extraction procedure . . . . .	482
18.3.2.	Application of the SFE procedures for the TBT extraction from real samples . . . . .	483
18.4.	Conclusions . . . . .	484
References . . . . .		486

## CHAPTER 19. HYDRIDE GENERATION FOR SPECIATION ANALYSES USING GC/AAS

by R. Ritsema, F.M. Martin and Ph. Quevauviller

19.1.	Hyphenated techniques using hydride generation . . . . .	490
19.2.	The on-line hydride generation technique in combination with GC/AAS . . . . .	491
19.2.1.	Reaction vessel . . . . .	491
19.2.2.	Reducing conditions . . . . .	491
19.2.3.	Stripping time/cryogenic focusing . . . . .	493
19.2.4.	Gas chromatography . . . . .	493
19.2.5.	Atomic absorption detection . . . . .	493
19.3.	Sample pre-treatment . . . . .	495
19.4.	Applications of hydride generation . . . . .	495
19.5.	Interferences in hydride generation . . . . .	496
19.5.1.	Spectral interferences . . . . .	496
19.5.2.	Chemical interferences . . . . .	496
19.5.2.1.	Interferences in organometallic speciation . . . . .	497
19.5.2.2.	Interferences during redox speciation . . . . .	498
19.6.	Other limitations . . . . .	499
19.7.	Conclusions . . . . .	500
	References . . . . .	500

## CHAPTER 20. SINGLE AND SEQUENTIAL EXTRACTION SCHEMES FOR TRACE METAL SPECIATION IN SOIL AND SEDIMENT

by A.M. Ure, C.M. Davidson and R.P. Thomas

20.1	General aspects of single and sequential extraction . . . . .	506
20.1.1.	Functionally defined speciation in soils . . . . .	506
20.1.2.	Operationally defined speciation . . . . .	507
20.1.3.	Metal speciation in sediments . . . . .	507
20.2.	Current methodologies . . . . .	508
20.2.1.	Single-step extraction . . . . .	508
20.2.2.	Sequential extraction procedures . . . . .	509
20.3.	Justification and validation of speciation by extraction . . . . .	509
20.3.1.	Validation of the relevance and specificity of extracting reagents . . . . .	509
20.3.2.	Objective . . . . .	511
20.4.	Development of agreed common extraction schemes . . . . .	511
20.4.1.	Sampling soils for analysis and the preparation of bulk soil samples as candidate reference materials for certification of extractable contents . . . . .	511
20.4.2.	Sediment sample preparation . . . . .	513
20.4.3.	Temporal stability of air dried soil extractable contents . . . . .	514
20.4.4.	Temporal stability of air dried sediment extractable contents . . . . .	515
20.4.5.	Other factors affecting the validity and reliability of extraction procedures for speciation . . . . .	516
20.4.6.	Validation of selective extraction procedures for metal speciation in soils and sediments . . . . .	517
20.5.	Protocols for valid extraction procedures for the elements Cd, Cr, Cu, Ni, Pb and Zn . . . . .	518
20.5.1.	Protocol for single-step extraction by 0.05 mol.l <sup>-1</sup> EDTA . . . . .	518
20.5.2.	Protocol for single-step extraction by 0.43 mol.l <sup>-1</sup> acetic acid . . . . .	519
20.5.3.	Protocol for BCR 3-step sequential extraction for sediment . . . . .	519

20.6. Conclusions . . . . .	520
References . . . . .	521

## CHAPTER 21. METHODS FOR THE DETERMINATION OF CHLORINATED BIPHENYLS IN AIR

by M. Morosini and K. Ballschmiter

21.1. Airborne chlorinated biphenyls . . . . .	526
21.1.1. Filter and absorbent systems . . . . .	528
21.1.1.1. Glass-fibre filters . . . . .	528
21.1.1.2. Organic filters . . . . .	528
21.1.1.3. Inorganic adsorbents . . . . .	528
21.1.1.4. Carbon adsorbents . . . . .	529
21.1.1.5. Polymeric adsorbents . . . . .	529
21.1.2. Other sampling systems . . . . .	530
21.1.2.1. Annular denuders . . . . .	530
21.1.2.2. Electrostatic precipitators . . . . .	530
21.1.2.3. Low-pressure cascade impactors . . . . .	530
21.2. Deposition of chlorinated biphenyls . . . . .	531
21.2.1. Dry depositions . . . . .	531
21.2.2. Wet depositions . . . . .	531
21.2.3. Vegetation samples . . . . .	531
References . . . . .	532

## CHAPTER 22. SAMPLE HANDLING AND DETERMINATION OF CARBAMATE PESTICIDES AND THEIR TRANSFORMATION PRODUCTS IN VARIOUS MATRICES

by M. Honing, D. Barceló, B.L.M. van Baar and U.A.Th. Brinkman

22.1. Sample preparation . . . . .	537
22.1.1. Aqueous samples . . . . .	537
22.1.2. Biological and soil samples . . . . .	540
22.2. Column chromatography . . . . .	542
22.2.1. Gas chromatography . . . . .	542
22.2.2. Column liquid chromatography . . . . .	544
22.2.3. Supercritical fluid chromatography . . . . .	546
22.3. LC detection methods . . . . .	546
22.3.1. Ultraviolet detection . . . . .	546
22.3.2. Electrochemical detection . . . . .	548
22.3.3. Fluorescence detection . . . . .	548
22.3.4. Mass spectrometric detection . . . . .	550
22.4. Conclusions . . . . .	554
References . . . . .	556

**CHAPTER 23. METHOD DEVELOPMENT FOR THE DETERMINATION OF  
POLYCYCLIC AROMATIC HYDROCARBONS (PAHs) IN  
ENVIRONMENTAL MATRICES**

by J. Jacob

23.1.	Availability of reference materials . . . . .	564
23.2.	Extraction of PAH . . . . .	566
23.3.	Enrichment and clean-up . . . . .	569
23.4.	Thin-layer chromatography (TLC) . . . . .	570
23.5.	High-performance liquid chromatography (HPLC) . . . . .	571
23.6.	Gas-liquid chromatography (GC) . . . . .	576
References . . . . .		586

**CHAPTER 24. METHOD VALIDATION FOR THE DETERMINATION OF  
DIOXINS**

by T. Rymen

24.1.	Review of existing methods for the determination of PCDD and PCDF . . . . .	594
24.1.1.	Extraction . . . . .	595
24.1.1.1.	Liquids . . . . .	595
24.1.1.2.	Solids and sediments . . . . .	596
24.1.1.3.	Solid sorbents and papers . . . . .	596
24.1.1.4.	Soot, particulates and fly ash . . . . .	597
24.1.1.5.	Biological samples . . . . .	601
24.1.2.	Clean-up . . . . .	601
24.1.2.1.	Acid/base clean-up . . . . .	601
24.1.2.1.1.	In batch treatments . . . . .	601
24.1.2.1.2.	Liquid chromatography on acid/base modified silica gel . . . . .	601
24.1.2.2.	Treatment with AgNO <sub>3</sub> . . . . .	602
24.1.2.3.	Liquid chromatography on silica gel . . . . .	602
24.1.2.4.	Liquid chromatography on Florisil . . . . .	604
24.1.2.5.	Liquid chromatography on neutral-, basic- or acidic-alumina . . . . .	604
24.1.2.6.	Gel permeation chromatography . . . . .	605
24.1.2.7.	Liquid chromatography on activated carbon . . . . .	605
24.1.2.8.	High pressure liquid chromatography . . . . .	605
24.1.2.9.	Clean-up procedures . . . . .	606
24.1.3.	Instrumental analysis . . . . .	606
24.1.3.1.	Capillary gas chromatography . . . . .	606
24.1.3.2.	Mass spectrometry . . . . .	613
24.1.3.3.	Data evaluation . . . . .	616
24.2.	Quality control and method validation . . . . .	616
24.2.1.	Internal quality control . . . . .	616
24.2.1.1.	Blanks for standard preparation equipment . . . . .	616
24.2.1.2.	Procedure blank . . . . .	617
24.2.1.3.	Spiking standards of <sup>13</sup> C12-labelled compounds . . . . .	617
24.2.1.4.	Calibration standard/detector linearity check . . . . .	617
24.2.1.5.	Quality control of chromatographic capillary columns . . . . .	618
24.2.1.6.	Extraction efficiency . . . . .	618
24.2.1.7.	Recovery check . . . . .	619
24.2.1.8.	Dioxin-dibenzofuran identification criteria . . . . .	620

24.2.1.9.	Limits of detection (LD) . . . . .	620
24.2.1.10.	Precision and accuracy . . . . .	621
24.2.1.11.	Internal quality control systems . . . . .	621
24.2.2.	Method validation . . . . .	621
24.3.	Validated methods . . . . .	625
24.3.1.	Analytical procedure for the quantitative determination of 2,3,7,8- chlorinated tetra-, penta- and hexachloro dioxins and dibenzofurans in municipal waste incinerator fly ashes . . . . .	625
24.3.1.1.	Cleaning of glassware . . . . .	625
24.3.1.2.	Materials and reagents . . . . .	626
24.3.1.3.	Method blank . . . . .	627
24.3.1.4.	Sample analysis . . . . .	628
24.4.	Conclusions . . . . .	633
References	.....	634
Subject index	.....	641
