Proceedings

1988 International Conference on Computer Languages

October 9-13, 1988

Castle Hotel and Resort
Miami Beach, Florida

Sponsored by The Computer Society
Computer Languages Technical Committee
Table of Contents

General Chairman’s Message ................................................................. iii
Program Chairman’s Message ............................................................... v
Organizing Committee ........................................................................ vii
List of Referees ..................................................................................... ix

Session 1: Application Languages
Chair: N. Gehani
An Intensional Language as the Basis of a 3-D Spreadsheet Design .................. 2
W.Du and W.W. Wadge
Programming through Pictorial Transformations ........................................ 10
Y.T. Hsia and A.L. Ambler

Session 2: Language Implementation
Chair: B. Weems
A Unifying Model for Lookahead LR Parsing ........................................... 18
M.E. Bermudez
Efficient Retargetable Compiler Code Generation ...................................... 25
P.J. Hatcher and J.W. Tuller
A Language for High-Level Programming of Mathematical Applications .......... 31
F. Grossman, R.J. Klerer, and M. Klerer
PNSOFT: A Menu-Driven Software Package for Petri-Net Modeling and Analysis ........ 41
G.S. Hum, M.A. Costarella, C.G. Buell, and M.M. Cvetanovic

Session 3: Language Design I
Chair: J. Urban
Programming the Connection Machine ................................................. 50
R. Bagrodia and K.M. Chandy
Structure and Generation of Computer Languages ..................................... 58
C. Mally
The FX-87 Interpreter ........................................................................... 65
P. Jouvelot and D.K. Gifford
Symbolic Dimension Bound Checking in a Matrix Language ...................... 73
V.J. de Jong

Session 4: Distributed and Parallel Programming
Chair: K. Tai
Distributed Programming with Shared Data .......................................... 82
H.E. Bal and A.S. Tanenbaum
High-Level Communication Primitives for Concurrent Systems .................. 92
V.K. Garg and C.V. Ramamoorthy
Describing Data Control in Programming Languages ............................ 100
M. Oudshoorn and C. Martin
Language Specification by Multi-Axiom Grammars ........................................ T. Rus and J.P. Le Peau

Session 5: Language Design II

Chair: D. Eckart

The Influence of Language Semantics on Program Slices .................................... J.C. Hwang, M.W. Du, and C.R. Chou

Generalized Logical Operators for Temporal Languages ......................................... M.A. Bassiouni and M. Llewellyn

The Elimination of Intermediate Containers in the Evaluation of First-Class Array Expressions . C. McCrosky

Experience with Rendezvous ....................................................................................... R. Kamel and N. Gammage

Languages in Electrotechnical Laboratory's Dataflow Machines ................................. J. Herath

Session 6: Panel - Specification Languages—Assessment and Trends

Chair: C.K. Chang; Panelists: J. Brackett, A.M. Davis, P. Grabow, T. Haizuka, P. Hsia

Specification Languages—Assessment and Trends (Summary) ..................................... C.K. Chang

Formal Specification Languages: A Marketplace Failure ............................................. J.W. Brackett

Specification Languages ............................................................................................. A.M. Davis

A Perspective on Specification Languages .................................................................... P.C. Grabow

Current Status of Specification Languages in Japan ................................................ T. Haizuka

Keynote Session: Directions in Computer Languages

Chair: C.V. Ramamoorthy

On the Representation of Problems in Artificial Intelligence ....................................... S. Amarel

Future Directions in Programming Languages .......................................................... S.A. DiNitto, Jr.

Report on a Business Definition Language System .................................................. R.T. Yeh

Session 7: Object-Oriented Languages

Chair: D. Rine

KSL: A Reflective Object-Oriented Programming Language .................................... M.H. Ibrahim and F.A. Cummins

The Precise Control of Inheritance and the Inheritance of Theory in the ADABTPL Language . T. Sheard and D. Stemple

Integrating Abstract Data Types with Object-Oriented Programming by Specification-Based Approach .......................................................... Y.L. Zhong, S. Ishizuka, and R. Enari
Session 8: Panel - Is Computer Language Obsolete?

Chair: T. Lewis; Panelists: T. Arshi, P. Hsia, U. Pooch, M. Tanik

Session 9: Object-Oriented Programming Environments

Chair: J. Navlakha

Language Aspects of ENVISAGER: An Object-Oriented Environment for the Specification of Real-Time Systems ................................. 214  
J.P. Diaz-Gonzalez and J.E. Urban

Object-Oriented Conceptual Programming Based on PROT Nets ................................. 226  
M. Baldassari, V. Berti, and G. Bruno

Data Security in an Object-Oriented Environment such as Smalltalk-80 ................................. 234  
R.S. Tosten

Object-Oriented Programming (OOP) and Its Relevance to Designing Intelligent Software Systems ................................. 242  
H. Wechsler and D. Rine

Session 10: Specification Languages and Applications

Chair: A. Soceneatu

A Naming Specification Language for Syntax-Directed Editors ................................. 250  
S. Vorthmann and R.J. LeBlanc

A Specification Language for Real-Time Distributed Systems ................................. 258  
C.K. Chang, T.M. Jiang, and M. Aoyama

The Design of Software Interfaces in Spec ................................. 266  
V. Berzins

Session 11: Real-Time and Prototyping System Languages

Chair: S. Yau

FLEX: Towards Flexible Real-Time Programs ................................. 272  
S. Natarajan and K.J. Lin

TXL: A Rapid Prototyping System for Programming Language Dialects ................................. 280  
J.R. Cordy, C.D. Halpern, and E. Promislow

Execution of Structured Analysis Specifications with an Object-Oriented Petri Net Approach ................................. 286  
P.J. Pulli

Session 12: (Invited) AI and Computer Languages

Chair: R. Ashany

Array Theory, Logic and the Nial Language ................................. 296  
J.L. Glasgow and M.A. Jenkins

Languages for Intelligent Specification Systems ................................. 304  
F. Golshani, W.T. Scott, and P.D. White

*High Concurrency and Object-Oriented Languages for Large AI Systems ................................. 312  
R. Ashany
Keynote Session: Directions in Computer Languages

Chair: D. Rine

Programming Parallel Computers .................................................. 314
K. M. Chandy

Visual Languages and Software Specifications .................................. 322
S. S. Yau and X. Jia

*Languages for Coping with Uncertainty and Imprecision .................. 329
L. Zadeh

Session 13: Extending AI Languages

Chair: J. Herath

Common Lisp Relations: An Extension of Lisp for Logic Programming ........... 332
P. Thrift

Using Obviously Synchronizable Series Expressions Instead of Loops .......... 338
R. C. Waters

Type Inference by Program Transformation and Partial Evaluation ............ 347
T. W. Frühwirth

Session 14: Methodology and Support Environments

Chair: N. Bourbakis

Architectural Design Methodology for Supporting High-Level Programming Languages ................. 356
S. Aletan and W. Lively

Adapting Modules to an Integrated Programming Environment .................. 364
N. H. Madhavji, J. Deshamais, L. Pinsonneault, and K. Toubache

Specifications for the Development of a Software Environment for Evaluation and Translation of Assembly Languages .................................. 372
N. G. Bourbakis

APAS: The Ada Programming Assistant System .................................. 379
M. H. Kim, Y. C. Shim, and C. V. Ramamoorthy

Session 15: Hardware Description Languages

Chair: V. Yamaguchi

The Use of aFP to Design Regular Array Algorithms ............................ 388
Y. C. Lin and F. C. Lin

Using Higher Order Logic and Functional Languages to Synthesize Correct Hardware ............. 396
S. K. Chin, E. P. Stabler, and K. J. Greene

TOBOL—A New Methodology for the TOp-to-BOttom Level Hardware Description in VLSI Design-Automation Systems .................................. 404
C. Y. R. Chen

Session 16: Knowledge & Requirements Engineering

Chair: W. Tsai

A Declarative Approach to Software Requirement Specification Languages .................. 414
J. J. P. Tsai, T. Weigert, and M. Aoyama

Software Requirements Specification from a Cognitive Psychology Perspective .................. 422
J. G. Snodgrass and D. Y. Y. Yun
