

Florian Holzapfel and Stephan Theil (Eds.)

Advances in Aerospace Guidance, Navigation and Control

Selected Papers of the 1st CEAS Specialist
Conference on Guidance, Navigation and
Control

 Springer

Contents

Part I: Atmospheric Applications

A Decoupled Approach for Trajectory Generation for an Unmanned Rotorcraft	3
<i>Sven Lorenz, Florian M. Adolf</i>	
A Linear Parameter Varying Controller for a Re-entry Vehicle Benchmark	15
<i>Andrés Marcos, Samir Bennani</i>	
A Low Cost Small UAV Flight Research Facility	29
<i>Austin M. Murch, Yew Chai Paw, Rohit Pandita, Zhefeng Li, Gary J. Balas</i>	
Adaptive Nonlinear Flight Control and Control Allocation for Failure Resilience	41
<i>Thomas Lombaerts, Michiel van Schravendijk, Ping Chu, Jan Albert Mulder</i>	
Coordinated Road Network Search for Multiple UAVs Using Dubins Path	55
<i>Hyondong Oh, H.S. Shin, A. Tsourdos, B.A. White, P. Silson</i>	
Eigenstructure Assignment and Robustness Improvement Using a Gradient-Based Method	67
<i>Erik Karlsson, Stephan Myschik, Florian Holzapfel</i>	
Helical Flight Path Trajectories for Autopilot Evaluation	79
<i>Gertjan Looye</i>	

Maneuver Envelope Determination through Reachability Analysis	91
<i>E.R. van Oort, Q.P. Chu, J.A. Mulder</i>	
Modelica Landing Gear Modelling and On-Ground Trajectory Tracking with Sliding Mode Control	103
<i>Fabrizio Re</i>	
Obstacle Avoidance Strategy for Micro Aerial Vehicle	117
<i>Cezary Kownacki</i>	
Post-Optimal Sensitivities of Flight Trajectories with Respect to Selected Parameters	137
<i>C. Büskens, F. Fisch, F. Holzapfel</i>	
Simple Control Law Structure for the Control of Airplanes by Means of Their Engines	151
<i>Nicolas Fezens</i>	
The Development of Perspective Displays for Highly Precise Tracking Tasks	163
<i>Alexander Efremov, Mikhail Tjaglik</i>	
UAV Lab, Open Research Platform for Unmanned Aerial Vehicles	175
<i>Péter Bauer, Paw Yew Chai, Luigi Iannelli, Rohit Pandita, Gergely Regula, Bálint Vanek, Gary J. Balas, Luigi Glielmo, József Bokor</i>	
Visibility Cues for Communication Aware Guidance in Cluttered Environments	187
<i>H. Claus Christmann, Eric N. Johnson</i>	
 Part II: Guidance and Control	
Adaptive Control of a High Agility Model Airplane in the Presence of Severe Structural Damage and Failures	201
<i>Stephan Baur, Travis Gibson, Anuradha Annaswamy, Leonhard Höcht, Thomas Bierling, Florian Holzapfel</i>	
Adaptive Control of Non-minimum Phase Modal Systems Using Residual Mode Filters: Part I	213
<i>Mark J. Balas, Susan A. Frost</i>	
Adaptive Control of Non-minimum Phase Modal Systems Using Residual Mode Filters: Part II	223
<i>Mark J. Balas, Susan A. Frost</i>	

Global Tracking Control Structures for Nonlinear Singularly Perturbed Aircraft Systems	235
<i>Anshu Siddarth, John Valasek</i>	
Motion Planning for a Fixed-Wing MAV Incorporating Closed-Loop Dynamics Motion Primitives and Safety Maneuvers	247
<i>Michael Gros, M. Niendorf, A. Schöttl, W. Fichter</i>	
Novel Dynamic Inversion Architecture Design for Quadcopter Control	261
<i>Jian Wang, Thomas Bierling, Leonhard Höcht, Florian Holzapfel, Sebastian Klose, Alois Knoll</i>	
Parallel Implementation of Constrained Nonlinear Model Predictive Controller for an FPGA-Based Onboard Flight Computer	273
<i>Alexander Joos, Walter Fichter</i>	
Robust Linear-Parameter Varying Autopilot Design for a Tail/Thrust Vector Controlled Missile	287
<i>Berno J.E. Misgeld, Marco Darcis, Thomas Kuhn</i>	
 Part III: Sensors, Data Fusion and Navigation	
A Single Frequency Strapdown Algorithm for Integrating IMUs in ECEF-Frame	305
<i>Johann Dambeck, Benjamin Braun</i>	
Broadband Wind Estimation Algorithm for Gust Load Alleviation	321
<i>Arndt Hoffmann, Kai Loftfield, Robert Luckner</i>	
Interval Analysis as a System Identification Tool	333
<i>E. van Kampen, Q.P. Chu, J.A. Mulder</i>	
Investigation of the Attitude Error Vector Reference Frame in the INS EKF	345
<i>Stephen Steffes, Jan Philipp Steinbach, Stephan Theil</i>	
Nonlinear Filtering Using Sparse Grids	359
<i>Carolyn Kalender, Alfred Schöttl</i>	
Observability of Star Tracker / Gyro Based Attitude Estimation Considering Time-Variant Sensor Misalignment	373
<i>Stefan Winkler</i>	

Performance Comparison of Maneuver Detection Algorithms	385
<i>Sebastian Bayerl, Georg Herbold, Lorenzo Pettazzi</i>	
Spacecraft Attitude Estimation and Gyro Calibration via Stochastic H_∞ Filtering	397
<i>Daniel Choukroun, Lotan Cooper, and Nadav Berman</i>	
 Part IV: Space Applications	
Advanced Optical Terrain Absolute Navigation for Pinpoint Lunar Landing	419
<i>Marco Mammarella, Marcos Avilés Rodrígualvarez, Andrea Pizzichini, Ana María Sánchez Montero</i>	
Methodologies to Perform GNC Design and Analyses for Complex Dynamic Systems Using Multibody Software	431
<i>G. Baldesi, T. Voirin, A. Martinez Barrio, M. Claeys</i>	
Optimal Guidance and Control of Lunar Landers with Non-throtttable Main Engine	451
<i>Thimo Oehlschlägel, Stephan Theil, Hans Krüger, Matthias Knauer, Jan Tietjen, Christof Büskens</i>	
Spiraling Approach for Angles-Only Navigation within On-Orbit Servicing Missions	465
<i>J. Spurmann</i>	
Author Index	473
