PLANNING AND ECONOMIC COMMISSION OF JIANGSU PROVINCE

Locational Requirements for Economic Development in Jiangsu's Riverside Zone

Final Report on a Co-operative Research Project

Zhang Yongqian

Wang Yinchu

Peter Treuner

Colin Gee

Stuttgart, July 1995

List of Contents

	<u>Page</u>
1. <u>Introduction</u> (<i>Peter Treuner, Zhang Yongqian</i>)	1
2. <u>The Challenge of Rapid Industrialization in Jiangsu's Riverside Zone</u> (<i>Zhang Yongqian</i>)	7
2.1 Economic Progress in Southern Jiangsu Province	7
2.2 Jiangsu's Riverside Zone and National Development	9
2.3 Major Infrastructure Investment	10
2.4 Other Infrastructure Investment at all Spatial Levels	12
3. <u>The Methodical Framework of the Study</u> (<i>Colin Gee, Wang Yinchu</i>)	15
3.1 Geographical Delineation of the Study Area	15
3.2 Overall Model Structure	18
4. <u>The Economic Model</u> (<i>Wang Yinchu</i>)	26
4.1 Objectives of the Model	26
4.2 Attributes of the Model	29
4.3 Structure of the Model	32
4.4 Calibration of the Model	39
4.4.1 Initial Calibration	39
4.4.2 Adjustments to the Coefficients	43
4.4.3 Accommodation of the Infrastructure Evaluations in the Productivity Equation	48
4.4.4 Other Preparations Made Before Using the Model for Forecasting	50
4.5 Results of the Model - Investment Multiplier Analysis for the Locations	53
5. <u>The Population, Evaluation and Allocation Models</u> (<i>Colin Gee</i>)	55
5.1 Population Model	55

5.1.1 Natural Population Change	56
5.1.2 Migration	58
5.2 Infrastructure Evaluation Model	62
5.2.1 Transportation Infrastructure	67
5.2.1.1 Roads	67
5.2.1.2 Waterways	70
5.2.1.3 Railways	71
5.2.1.4 Airports	73
5.2.2 Technical Infrastructure	73
5.2.2.1 Electrical Power Supply	74
5.2.2.2 Telecommunications	75
5.2.2.3 Water Supply	76
5.2.2.4 Disposal and Treatment of Waste Products	76
5.2.3 Social Infrastructure	78
5.2.3.1 Housing	78
5.2.3.2 Medical Facilities	79
5.2.3.3 Educational Facilities	80
5.2.4 Development Orientated Infrastructure	84
5.2.5 Aggregation of the Category Evaluations to a Single Value	86
5.2.6 Location Factors	94
5.3 The Allocation Model	100
 6. <u>The Information Requirements of the Models</u> (Wang Yinchu)	 104
6.1 Data Types	104
6.1.1 Transportation Network Data	104
6.1.2 Non-Transportation Infrastructure Data	106
6.1.3 Population Data	107
6.1.4 Economic Statistics	108
6.1.5 Development Goals	108
6.1.6 Weights and Parameters Used for Aggregation	108
6.1.7 Cost Information for Infrastructure Investment Proposals	109
6.2 Obtaining the Data	109
6.2.1 Transportation Data	110
6.2.2 Consulting Experts to Obtain Weights and Preference Parameters	110

	<u>Page</u>
6.2.3 Goals and Costs	111
6.2.4 Survey of the 61 Locations	111
6.3 Supplementary Data	114
6.4 Summarizing Remarks	115
 7. <u>The Results of the Overall Model</u> (<i>Colin Gee, Wang Yinchu</i>)	 117
7.1 Results of the Pre-Selection Process for Proposed Investments	118
7.1.1 Range of Investment Proposals Initially Considered	118
7.1.2 Methods Employed for Pre-Selection	122
7.1.3 Results of the Pre-Selection Process	125
7.2 Allocation Sampling Results - Distributions, Best and Worst Solutions	128
7.3 Best Results - Infrastructure Evaluation	152
7.4 Best Results - The Economy of the 61 Locations	157
7.5 Best Results - Population Change	164
7.6 Recommendations for Investment in Infrastructure	166
7.6.1 Statistical Analysis of the Sampling Allocation Results	166
7.6.1.1 Analysis of All the 47,400 Results	166
7.6.1.2 Analysis of the Best 250 Results	172
7.6.1.3 Analysis with Respect to Year of Allocation	179
7.6.2 Recommendations	184
 8. <u>Summary</u> (<i>Peter Treuner, Zhang Yongqian</i>)	 188
 Appendix 1 - The Formal Infrastructure Evaluation Processes	
Appendix 2 - Weights Used in the Evaluation Processes	
Appendix 3 - Factors α_j Used in the Evaluation Processes	
Appendix 4 - Objective Definitions Used in the Evaluation Processes	

Appendix 5 - Infrastructure Investment Costs Used in the Allocation Processes

Appendix 6 - Information Survey Conducted for the Seven Major Riverside Cities and 54 Selected Towns

**Appendix 7 - A: Calculation of Tertiary Sector Employment
B: Calculation of Employment in the Construction Branch**
