

Martín Abadi Takayasu Ito (Eds.)

Theoretical Aspects of Computer Software

Third International Symposium, TACS'97
Sendai, Japan, September 23-26, 1997
Proceedings

Springer

Contents

Invited Talk 1

Strong Normalisation in Higher-Order Action Calculi	1
<i>Robin Milner</i>	

Session 1

Extending ML with Semi-explicit Higher-Order Polymorphism	20
<i>Jacques Garrigue and Didier Rémy</i>	
Optimal Representations of Polymorphic Types with Subtyping	47
<i>Alexander Aiken, Edward L. Wimmers, and Jens Palsberg</i>	
Cyclic Lambda Calculi	77
<i>Zena M. Ariola and Stefan Blom</i>	

Invited Talk 2

Type System for Specializing Polymorphism	107
<i>Atsushi Ohori</i>	

Session 2

On Strictness and Totality	138
<i>Mario Coppo, Ferruccio Damiani, and Paola Giannini</i>	
Sound Specialization in the Presence of Computational Effects	165
<i>Julia L. Lawall and Peter Thiemann</i>	

Session 3

An Axiomatic Approach to Binary Logical Relations with Applications to Data Refinement	191
<i>Yoshiki Kinoshita, Peter W. O'Hearn, A. John Power, Makoto Takeyama, and Robert D. Tennent</i>	
Infinitary Domain Logic for Finitary Transition Systems	213
<i>Marcello M. Bonsangue and Joost N. Kok</i>	

Invited Talk 3

Some Results in the Join-Calculus	233
<i>Jean-Jacques Lévy</i>	

Session 4

Local Model Checking for Value-Passing Processes	250
<i>Julian Rathke and Matthew Hennessy</i>	

Data Refinement of Remote Procedures	267
<i>Kaisa Sere and Marina Waldén</i>	

A Type-Theoretic Approach to Deadlock-Freedom of Asynchronous Systems	295
<i>Samson Abramsky, Simon Gay, and Rajagopal Nagarajan</i>	

Invited Talk 4

Composable Semantic Models for Actor Theories	321
<i>Carolyn L. Talcott</i>	

Session 5

“Classical” Programming-with-Proofs in λ_{PA}^{sym} : An Analysis of Non-confluence	365
<i>Franco Barbanera, Stefano Berardi, and Massimo Schivalocchi</i>	

Environments, Continuation Semantics and Indexed Categories	391
<i>John Power and Hayo Thielecke</i>	

Session 6

Comparing Object Encodings	415
<i>Kim B. Bruce, Luca Cardelli, and Benjamin C. Pierce</i>	

System F with Width-Subtyping and Record Updating	439
<i>Erik Poll</i>	

Invited Talk 5

Relational Interpretations of Recursive Types in an Operational Setting	458
<i>Lars Birkedal and Robert Harper</i>	

Session 7

Extending a Logical Framework with a Modal Connective for Validity	491
<i>Seán Matthews</i>	
Using Reflection to Build Efficient and Certified Decision Procedures	515
<i>Samuel Boutin</i>	
Sets in Types, Types in Sets	530
<i>Benjamin Werner</i>	

Session 8

Combining Petri Nets and PA-Processes	547
<i>Richard Mayr</i>	
Symbolic Model-Checking Method Based on Approximations and Binary Decision Diagrams for Real-Time Systems	562
<i>Satoshi Yamane and Kazuhiro Nakamura</i>	
Types and Models for Higher-Order Action Calculi	583
<i>Philippa Gardner and Masahito Hasegawa</i>	

Invited Talk 6

Finite-State Transducers as Regular Böhm Trees	604
<i>Gérard Huet and Henri Laulhère</i>	

TACS Open Lecture

Secrecy by Typing in Security Protocols	611
<i>Martín Abadi</i>	

Author Index	639
