## **The Population Crisis**

|                                                                                      |    |
|--------------------------------------------------------------------------------------|----|
| Introduction                                                                         | 3  |
| Paul R. Ehrlich: Eco-Catastrophe!                                                    | 5  |
| Wayne Davis: Overpopulated America: Our Affluence Rests on<br>a Crumbling Foundation | 14 |
| Ben Wattenberg: The Nonsense Explosion: Overpopulation as a<br>Crisis Issue          | 18 |
| Francis S.L. Williamson: Population Pollution                                        | 26 |

## **The Relation of Population and Environment: A Debate**

|                                                                                        |     |
|----------------------------------------------------------------------------------------|-----|
| Introduction                                                                           | 37  |
| Paul R. Ehrlich and John P. Holdren: Impact of Population Growth                       | 40  |
| Barry Commoner, Michael Corr, and Paul J. Stamler: The Causes<br>of Pollution          | 51  |
| Paul R. Ehrlich and John P. Holdren: Critique                                          | 69  |
| Barry Commoner: Response                                                               | 86  |
| John P. Holdren and Paul R. Ehrlich: One Dimensional Ecology<br>Revisited: A Rejoinder | 113 |
| Garrett Hardin: Population Skeletons in the Environmental Closet                       | 119 |

## **Additional Evidence on Population and the Environment**

|                                                         |     |
|---------------------------------------------------------|-----|
| Introduction                                            | 129 |
