

Mergers, Sell-Offs, and Economic Efficiency

DAVID J. RAVENSCRAFT

F. M. SCHERER

THE BROOKINGS INSTITUTION

Washington, D.C.

Contents

1. Introduction	1
The Rationale of Mergers	2
Research Methodology	17
Plan of the Book	18
2. The Contours of Merger Activity Since 1950	20
Merger Trends in Manufacturing and Mineral Industries	20
The Sample Companies and Their Diversification	24
The Conglomerates	36
The Structural Correlates of Merger Activity	45
Conclusion	54
3. The Profitability of Acquired Companies	56
Prior Research	56
New York Stock Exchange Listing Application Evidence	58
Further Evidence	64
Summary	73
4. Post-Merger Financial Performance	75
The Line of Business Merger Data Link	75
Asset Values and the Choice of Accounting Method	78
Sample Composition	82
Variables and Model Specification	83
The Cross-Sectional Results	85
Matched Pre- Versus Post-Merger Analysis	111
Merged Unit Growth	117
Expenditures on Research and Development	119
Conclusion	122
5. The Economics of Sell-Off: Case Study Evidence	123
Methodology	123

The Sample	127
The Reasons for Merger	129
What Went Wrong?	132
The Sell-Off Decision	144
Developments after Sell-Off	149
Conclusion	157
 6. The Economics of Sell-Off: Statistical Evidence	 159
The Frequency of Sell-Off	159
The Determinants of Sell-Off	166
Pre-Divestiture Investment Behavior	187
Conclusion	190
 7. Pulling the Threads Together	 192
The Efficiency Consequences	192
Were Mergers Profitable for the Acquirers?	204
Merger Performance and Merger Motives	210
 8. Broader Implications	 216
The Importance of Understanding	216
Is History Irrelevant?	218
The Policy Instruments	221
 Appendixes	
A. Predicting the Merger Accounting Method	229
B. Narrative Summary of the Case Studies	239
C. Mnemonics Used in the Principal Statistical Analyses	280
 Index	 285
 Tables	
2-1. Distribution of Assets Acquired in Acquisitions of Large Manufacturing and Mining Companies by FTC Merger Type Classification, 1948-77	23
2-2. Distribution of Manufacturing Industry Assets Acquired, by Experience-Oriented Merger Category, 1950-77	24
2-3. Manufacturing Sales and Line of Business Counts in 1950 and 1975 for the 471 Companies in the FTC's 1975 Line of Business Survey	28
2-4. Diversification of Top 200 Companies of 1950 and 1975, Ranked by Sales Quintile	30

2-5. Diversification of the 148 Top 200 Companies of 1950 Surviving in the 1975 Line of Business Survey, Ranked by 1950 Sales Quintile	32
2-6. Accounting for Changes in the Number of Lines of Business for the 148 Top 200 Companies of 1950 Surviving in the 1975 Line of Business Survey	34
2-7. Percentage of Added Lines of Business Attributed to Internal Growth Versus Acquisition for the 148 Top 200 Companies of 1950 Surviving in the 1975 Line of Business Survey, Ranked by 1950 Sales Quintile	36
2-8. The Leading Merger-Making Companies in the Line of Business Survey, Ranked by Number of Acquisitions, 1950-78	38
2-9. Cumulated Stock Market Value of \$1,000 Investments in Thirteen Leading Conglomerates, 1965-83 and 1968-83	40
2-10. Value in 1983 of a \$1,000 1965 Investment in Each of Thirteen Leading Conglomerates in the S&P Industrials Portfolio	43
2-11. Average Industry Characteristics of Newly Acquired and Original Lines of Business for Ninety Merger-Active Companies	50
2-12. Regression Equations Relating Measures of Industrywide Merger Activity to Industry Characteristics	54
3-1. Average Supranormal Profitability of Acquired Companies before Merger, by Year of Acquisition and Merger Accounting Method	61
3-2. Operating Income as a Percentage of Assets for All Manufacturing Companies in the FTC's Quarterly Financial Report, 1962-77	66
4-1. Distribution of Lines of Business by the Number of Nonequals Acquisitions Surviving into 1977	77
4-2. Basic Merger Effect Regressions	86
4-3. Merger Effect Regressions for 1977 with Continuous Industry Controls and Categorical Merger Activity Variables	90
4-4. Merger Effect Regressions Testing Additional Variables, with Fixed Industry Effects, 1977 Operating Income/Assets as Dependent Variable	96
4-5. Sensitivity Analyses Testing Additional Accounting Variables, <i>MERGSHR</i> Growth Variants, and Adjusted Sample Coverage, with 1977 Operating Income/Assets as Dependent Variable	104
4-6. Best-Fitting Time Lag Structure Regressions	109
4-7. Distribution of Asset Growth <i>MERGSHR:G</i> Values for Post-1950 Lines of Business with Acquisitions	119
4-8. Regressions with Ratios of 1977 Company-Financed R&D Outlays to Sales as Dependent Variable	121
5-1. Merger and Divestiture Highlights for Fifteen Case Study Units Sold Off between 1977 and 1984	128
5-2. Profitability of Eleven Case Study Companies in the Year before Their Acquisition	129

5-3. Characteristics of New Buyers in Fifteen Sell-Off Cases	150
6-1. Number of Manufacturing Lines of Business Sold Off per Year, 1974-81	163
6-2. Average Operating Income as a Percentage of Assets for Lines of Business with Sell-Offs, by Interval between the Date of Profit Report and Initiation of Sell-Off, 1974-81	167
6-3. Deviations of Divested Lines' Profitability from the Average Operating Income/Assets Percentages of Nondivested Lines in the Same Industry, by Interval between the Date of Profit Report and Initiation of Sell-Off, 1974-81	168
6-4. Annual Turnover Rates for Chief Executive Officers of Companies in the Line of Business Sample, 1973-80	171
6-5. Recapitulation of Explanatory Variables Used in the Analysis of Full Sell-Offs	174
6-6. Availability (X) and Gaps (O) in Data for Estimating a Four-Year Lagged Relationship between Profitability and Line of Business Sell-Offs, 1970-80	175
6-7. Logit and Ordinary Least Squares (OLS) Regressions Explaining Full Sell-Offs	180
6-8. Changes in the Probability of Sell-Off Indicated by Logit Regression (1a) in Table 6-7 with a Four-Standard-Deviation Increase in Individual Variables, Other Variables Held at Their Mean Values	182
6-9. Multinomial Logit Results from Analysis of Partial and Full Sell-Offs for 2,683 Lines of Business	186
6-10. Average Deviations of the Ratios of R&D to Sales and Advertising to Sales from Industry Norms for Fully Divested Lines of Business, by Years before Sell-Off	189
7-1. Derivation of Asset-Weighted Deviations of Post-Merger from Pre-Merger Profitability of 634-Company Sample	198
7-2. Internal Rates of Return as of 1983 from Investments Financing the Leading Conglomerates' Acquisition Activity, 1962-78	210
A-1. Logit Regressions Predicting the Probability of Pooling Accounting for All Manufacturing Acquisitions, 1950-79	235
A-2. Logit Regressions Predicting the Probability of Pooling Accounting for Acquisitions with Both Asset and Consideration Paid Data, 1950-79	237

Figures

1-1. Normalized Weekly Stock Price Movements of Typical Acquiring and Acquired Firms in Time Period Surrounding the Merger Announcement	4
2-1. Constant-Dollar Volume of Manufacturing and Mineral Firm Acquisitions, 1895-1985	21
2-2. Stock Price Movements of a Portfolio of Thirteen Merger-Prone Conglomerates and the Standard & Poor's Industrials Portfolio, 1964-83	41

4-1. Pooling Merger Effect Lag Structures from Regressions in Tables 4-2 and 4-6	110
4-2. Capital Allocation Decisions under Capital Rationing and Elastic Capital Market Conditions	112
6-1. Trends in Sell-Off and Merger Activity, 1965-85	161
7-1. Pre-Merger Profitability as a Function of Acquired Company Size	196
