Intrinsic Geometry of Biological Surface Growth

Fachbereich Mathematik
Technische Hochschule Darmstadt
Bibliothek
Inv.-Nr. B 21107

Springer-Verlag
Berlin Heidelberg New York Tokyo

T A B L E O F C O N T E N T S

CHAPTER 1 : INTRODUCTION

1.1 General Introduction 1

1.2 Introduction from Mathematical Biology 3

1.3 Neuroanatomical Introduction 10

CHAPTER 2 : SOME GEOMETRICAL MODELS IN BIOLOGY

2.1 Introduction 15

2.2 Hemispherical Tip Growth 18

2.3 The Mouse Cerebral Vesicle 29

2.4 The Shape of Birds' Eggs 36

2.5 The Folding Pattern of the Cerebral Cortex 46

2.6 Surface Curvatures of the Cerebral Cortex 58

2.7 Coda 61

CHAPTER 3 : MINIMUM DIRICHLET INTEGRAL OF GROWTH RATE AS A METRIC FOR INTRINSIC SHAPE DIFFERENCE

3.1 Introduction 64

3.2 Isotropic and Anistropic Biological Growth 67

3.3 Some Properties of the Minimum Dirichlet Integral 71

3.4 Minimum Dirichlet Integral as a Metric for Shape 75

3.5 Comparison with other Dirichlet Problems 78

CHAPTER 4 : CURVATURE OF THE FERRET BRAIN

4.1 Material & Methods 84

4.2 Results and Interpretation 86

4.3 Discussion 95

4.4 The nearest plane region to a given surface 101

4.5 Conclusions 103

REFERENCES 106

APPENDIX A : NUMERICAL SURFACE CURVATURE 113
