

# **The Econometric Analysis of Time Series**

**A C HARVEY**

*The London School of Economics*

**Second Edition**

**PHILIP ALLAN**

New York London Toronto Sydney Tokyo Singapore

# Contents

<b>Preface</b>	<b>ix</b>
<b>List of Abbreviations</b>	<b>xii</b>
<b>1 Introduction</b>	<b>1</b>
1.1. Estimation, Testing and Model Selection	1
1.2. Time Series Observations	7
1.3. Mathematical and Statistical Preliminaries	14
1.4. Asymptotic Theory	19
1.5. Time Series Analysis and Model Building	23
1.6. Econometric Models	33
<b>2 Regression</b>	<b>37</b>
2. 1. Linear Regression Models	37
2. 2. Least Squares Estimation	40
2. 3. Properties of the Ordinary Least Squares Estimator	44
2. 4. Generalised Least Squares	48
2. 5. Prediction	51
2. 6. Recursive Least Squares	52
2. 7. Residuals	56
2. 8. Test Statistics and Confidence Intervals	58
2. 9. Systems of Equations: Seemingly Unrelated Regression Equations	65
2.10. Multivariate Regression	72
2.11. The Method of Instrumental Variables	75
2.12. Autoregression	79
<b>3 The Method of Maximum Likelihood</b>	<b>84</b>
3.1. Introduction	84
3.2. Sufficiency and the Cramér – Rao Lower Bound	89
3.3. Properties of the Maximum Likelihood Estimator	93
3.4. Maximum Likelihood Estimation of Regression Models	95
3.5. Dependent Observations	104
3.6. Identifiability	111
3.7. Robustness	116

<b>4</b>	<b>Numerical Optimisation</b>	<b>122</b>
4.1.	Introduction	122
4.2.	Principles of Numerical Optimisation	123
4.3.	Newton–Raphson	130
4.4.	Maximisation of a Likelihood Function	133
4.5.	Two-Step Estimators	140
4.6.	Test Statistics and Confidence Intervals	143
<b>5</b>	<b>Test Procedures and Model Selection</b>	<b>146</b>
5.1.	Introduction	146
5.2.	Tests of Misspecification	150
5.3.	Classical Test Procedures: The Likelihood Ratio Test	160
5.4.	Wald Tests	166
5.5.	The Lagrange Multiplier Test	169
5.6.	Non-Nested Models	177
5.7.	Post-Sample Predictive Testing	181
5.8.	A Strategy for Model Selection	185
<b>6</b>	<b>Regression Models with Serially Correlated Disturbances</b>	<b>191</b>
6.1.	First Order Autoregressive Disturbances	191
6.2.	Comparison of Estimators	195
6.3.	Testing for First Order Autoregressive Disturbances	200
6.4.	Higher Order Autoregressive Disturbances	204
6.5.	Moving Average and Mixed Disturbances	207
6.6.	Tests Against Serial Correlation	210
6.7.	Prediction	213
6.8.	Systems of Equations	216
6.9.	ARCH Disturbances	219
<b>7</b>	<b>Dynamic Models I</b>	<b>225</b>
7.1.	Introduction	225
7.2.	Systematic Dynamics	232
7.3.	Estimation of Transfer Function Models with Independent Disturbances	238
7.4.	Serial Correlation	245
7.5.	Model Selection	246
7.6.	Trend and Seasonality	250
7.7.	Prediction and Forecasting	253
7.8.	Polynomial Distributed Lags	257
<b>8</b>	<b>Dynamic Models II: Stochastic Difference Equations</b>	<b>264</b>
8.1.	Introduction	264
8.2.	Estimation	267
8.3.	Testing for Serial Correlation	275
8.4.	Model Selection	280
8.5.	Error Correction Models and Co-Integration	289
8.6.	Systems of Equations	296
8.7.	Causality	303
8.8.	Exogeneity	309

<b>9</b>	<b>Simultaneous Equation Models</b>	<b>313</b>
9.1.	Introduction	313
9.2.	Identifiability	318
9.3.	Maximum Likelihood Estimation	329
9.4.	Two-Stage and Three-Stage Least Squares	332
9.5.	Testing the Validity of Restrictions on the Model	340
9.6.	Dynamic Models	342
9.7.	Estimation and Identification of Dynamic Models	346
9.8.	Forecasting, Prediction and Control	351
	<b>Appendix on Matrix Algebra</b>	<b>359</b>
	<b>Tables</b>	<b>361</b>
	<b>Answers to Selected Exercises</b>	<b>369</b>
	<b>References</b>	<b>371</b>
	<b>Subject Index</b>	<b>380</b>
	<b>Author Index</b>	<b>386</b>
