CONTENTS

Foreword by T. W. Anderson	page	vii
1 Contributions of Denis Sargan to the theory of finite sample distributions and dynamic econometric models <i>Esfandiar Maasoumi</i>		1
Appendix A: a brief biography of Denis Sargan and a list of his published papers		15
2 A general approximation to the distribution of instrumental variables estimates (<i>with W. M. Mikhail</i>)		18
3 The finite sample distribution of FIML estimators (revised version of an unpublished paper)		57
4 Gram-Charlier approximations applied to t ratios of k -class estimators		76
5 Econometric estimators and the Edgeworth approximation (with errata and other corrections)		98
6 The existence of the moments of estimated reduced form coefficients, unpublished paper, No. A6, LSE		133
7 Some experience of numerical computation of Edgeworth approximations (<i>with Y. K. Tse</i>), unpublished paper, No. A21, LSE		158
8 Edgeworth approximations for 2SLS estimates of a dynamic model, unpublished paper, No. 25, LSE		172
9 Maximum likelihood estimation of regression models with first order moving average errors when the root lies on the unit circle (<i>with Alok Bhargava</i>)		182
10 Missing data in an autoregressive model (<i>with E. G. Drettakis</i>)		204
11 Some discrete approximations to continuous time stochastic models		226

- 12 The spectral estimation of sets of simultaneous equation systems with lagged endogenous variables (*with A. Espasa*) 246
- 13 Estimating dynamic random effects models from panel data covering short time periods (*with Alok Bhargava*) 270

Note: Editor's footnotes are in brackets at the foot of the corresponding pages.
