CONTENTS

PREFACE.....	vii
CHAPTER 1. THE NATURE OF THE CARBONATE DEPOSITIONAL SYSTEM	1
THE BASIC NATURE OF CARBONATE SEDIMENTS AND SEDIMENTATION	1
Introduction	1
Origin of carbonate sediments	1
The reef: a unique depositional environment	3
Unique biological control over the texture and fabric of carbonate sediments	4
Carbonate grain composition	5
Carbonate rock classification	6
Efficiency of the carbonate factory and its impact on patterns of carbonate sedimentation	9
Carbonate platform types and facies models	12
SUMMARY	16
CHAPTER 2. CONCEPTS OF SEQUENCE STRATIGRAPHY AS APPLIED TO CARBONATE DEPOSITIONAL SYSTEMS	19
INTRODUCTION	19
SEQUENCE STRATIGRAPHY	19
Eustasy, tectonics and sedimentation: the basic accommodation model	19
Hierarchy of Stratigraphic Cycles	25
Introduction to Carbonate Sequence Stratigraphic Models	25
The Ramp Sequence Stratigraphic Model	25
The Rimmed Shelf Sequence Stratigraphic Model	27
The Escarpment Margin Sequence Stratigraphic Model	28
Sequence Stratigraphic Model of Isolated Platforms	29
High-Frequency Cyclicity on Carbonate Platforms: Carbonate Parasequences	32
THE CONSEQUENCES OF THE HIGH-CHEMICAL REACTIVITY OF CARBONATE SEDIMENTS AND ROCKS DURING EXPOSURE AT SEQUENCE BOUNDARIES	33
Carbonate minerals and their relative stability	33
Controls over the mineralogy of carbonate sediments, today and in the past	34
Mineralogy of ancient limestones: the concept of early progressive mineral stabilization and porosity evolution	35
SUMMARY	36
CHAPTER 3. THE CLASSIFICATION OF CARBONATE POROSITY	37
INTRODUCTION	37
THE NATURE AND CLASSIFICATION OF CARBONATE POROSITY	37
Choquette and Pray porosity classification	39

The Lucia rock fabric/petrophysical carbonate porosity classification	43
THE NATURE OF PRIMARY POROSITY IN MODERN SEDIMENTS	48
Intergrain porosity	48
Intragrain porosity	49
Depositional porosity of mud-bearing sediments	49
Framework and fenestral porosity	50
SECONDARY POROSITY	52
Introduction	52
Secondary porosity formation by dissolution	52
Secondary porosity associated with dolomitization	55
Secondary porosity associated with breccias	58
Secondary porosity associated with fractures	59
SUMMARY	59
CHAPTER 4. DIAGENETIC ENVIRONMENTS OF POROSITY MODIFICATION AND TOOLS FOR THEIR RECOGNITION IN THE GEOLOGIC RECORD	61
INTRODUCTION	61
Marine environment	62
Meteoric environment	63
Subsurface environment	63
Petrography-cement morphology	65
Petrography-cement distribution patterns	68
Petrography-grain-cement relationships relative to compaction	70
Trace element geochemistry of calcite cements and dolomites	71
Stable isotopes	78
Strontium isotopes	84
Fluid Inclusions	88
CHAPTER 5. NORMAL MARINE DIAGENETIC ENVIRONMENTS	93
INTRODUCTION	93
SHALLOW WATER, NORMAL MARINE DIAGENETIC ENVIRONMENTS	95
Abiotic shallow marine carbonate cementation	95
Recognition of ancient shallow marine abiotic cements	98
Biologically mediated marine carbonate cementation and diagenesis	101
Diagenetic setting in the intertidal zone	102
Modern shallow water submarine hardgrounds	104
Recognition and significance of ancient hardgrounds	106
Diagenetic setting in the modern reef environment	106
Recognition of reef-related marine diagenesis in the ancient record	110
Early marine lithification of the Permian Capitan reef complex New Mexico, USA	113

Porosity evolution of the Golden Lane of Mexico and the Stuart City of Texas	115
Porosity evolution of Devonian reefs: Western Canadian Sedimentary Basin	123
SLOPE TO DEEP MARINE DIAGENETIC ENVIRONMENTS	128
Introduction to diagenesis in the slope to deep marine environment	128
Carbonate diagenesis associated with ramp to slope mud mounds	128
Carbonate diagenesis of mounds near hydrothermal and hydrocarbon vents.	133
Carbonate diagenesis associated with escarpment shelf margins: Enewetak Atoll ..	136
Carbonate diagenesis of steep escarpment shelf margins: Bahama Platform	139
SUMMARY	143
CHAPTER 6. EVAPORATIVE MARINE DIAGENETIC ENVIRONMENTS	145
INTRODUCTION	145
Introduction to diagenesis in evaporative marine environments	145
THE MARGINAL MARINE SABKHA DIAGENETIC ENVIRONMENT	148
Modern marginal marine sabkhas	148
Diagenetic patterns associated with ancient marginal marine sabkhas	151
Ordovician Red River marginal marine sabkha reservoirs, Williston Basin, USA ...	153
Mississippian Mission Canyon marine sabkha reservoirs, Williston Basin, USA ...	154
Ordovician Ellenburger marine sabkha-related dolomite reservoirs, west Texas, USA	158
Criteria for the recognition of ancient marginal marine sabkha dolomites	161
MARGINAL MARINE EVAPORATIVE LAGOONS REFLUX DOLOMITIZATION 162	
The marginal marine evaporative lagoon as a diagenetic environment	162
Permian Guadalupian west Texas, USA: an ancient evaporative lagoon complex ...	164
Permian reservoirs of the South Cowden Field, Texas: reflux dolomitization	166
Jurassic Smackover dolomitization, Texas, USA: a reflux dolomitization event....	170
Criteria for the recognition of ancient reflux dolomites	174
Regional evaporite basins, coastal salinas, their setting and diagenetic environment	175
The MacLeod salt basin	175
The Elk Point Basin of Canada	177
Michigan Basin, USA	178
Jurassic Hith Evaporite and the Arab Formation, Middle East	179
SUMMARY	182
CHAPTER 7. DIAGENESIS IN THE METEORIC ENVIRONMENT	185
INTRODUCTION	185
GEOCHEMICAL AND MINERALOGICAL CONSIDERATIONS	185
Geochemistry of meteoric pore fluids and precipitates	185
Isotopic composition of meteoric waters and meteoric carbonate precipitates	188
Mineralogic drive of diagenesis within the meteoric environment	190

Implications of kinetics of the CaCO ₃ -H ₂ O-CO ₂ system in meteoric environments	190
Climatic effects	192
Hydrologic setting of the meteoric diagenetic environment	194
THE VADOSE DIAGENETIC ENVIRONMENT	197
Introduction	197
Upper vadose soil or caliche zone	197
Lower vadose zone	199
Porosity development in the vadose diagenetic environment	199
THE METEORIC PHREATIC DIAGENETIC ENVIRONMENT	200
Introduction	200
Immature hydrologic phase: island-based and land-tied floating meteoric water lenses developed in mineralogically immature sediments	200
Bermuda, a case study of an island with a permanent floating fresh water lens	202
Meteoric diagenesis in Quintana Roo, Mexico strandplains	205
The Oaks Field, meteoric diagenesis in a Jurassic shoreline, Louisiana, USA	206
The mature hydrologic phase: regional meteoric water systems in sea level lowstands.	209
Mature hydrologic system: regional system in a sea level lowstand: Bahama Bank	209
Mature hydrologic system: regional gravity-driven system developed during relative sea level lowstand on a land-tied carbonate shelf	213
Porosity development and predictability in regional meteoric aquifer environments	215
Geochemical trends characteristic of a regional meteoric aquifer system	217
Mississippian grainstones of southwestern New Mexico, USA: a case history of porosity destruction in a regional meteoric aquifer system	219
KARST PROCESSES, PRODUCTS AND RELATED POROSITY	222
Introduction	222
Solution, cementation, and porosity evolution in a mature karst system	225
Yates Field, Texas, USA: case history of an unconformity-related karsted reservoir	225
DOLOMITIZATION ASSOCIATED WITH METEORIC AND MIXED METEORIC-MARINE WATERS	232
Introduction	232
Meteoric-marine mixing, or Dorag model of dolomitization	232
Concerns about the validity of the mixing model of dolomitization	233
Modern mixing zone dolomitization	234
Pleistocene to Miocene mixing zone dolomitization	237
Mississippian North Bridgeport Field, Illinois Basin, USA: mixed water dolomite reservoirs	238
Where do we stand on mixing zone dolomitization today?	242
SUMMARY	243

CHAPTER 8. SUMMARY OF EARLY DIAGENESIS AND POROSITY MODIFICATION OF CARBONATE RESERVOIRS IN A SEQUENCE STRATIGRAPHIC AND CLIMATIC FRAMEWORK	245
INTRODUCTION	245
RESERVOIR DIAGENESIS AND POROSITY EVOLUTION DURING 3RD ORDER SEA LEVEL LOWSTANDS (LST)	246
Introduction	246
Diagenesis/porosity model of a carbonate ramp during sea level lowstand (LST) ...	246
Diagenesis/porosity model of a steep-rimmed carbonate shelf during sea level lowstand (LST)	249
Diagenesis/porosity model of a rimmed isolated carbonate platform during sea level lowstand (LST)	251
RESERVOIR DIAGENESIS AND POROSITY EVOLUTION DURING 3RD ORDER SEA LEVEL RISES (TST)	253
Introduction	253
Diagenesis/porosity model for a ramp in a rising sea level (TST)	253
Diagenesis/porosity model for a rimmed shelf during a rising sea level (TST)	255
Diagenesis/porosity model of a rimmed isolated carbonate platform during sea level rise (TST)	257
RESERVOIR DIAGENESIS AND POROSITY EVOLUTION DURING 3RD ORDER SEA LEVEL HIGHSTANDS (HST)	259
Introduction	259
Diagenesis/porosity model for a ramp during a sea level highstand (HST)	259
Diagenesis/porosity model for a rimmed shelf during a sea level highstand (HST) .	263
Diagenesis/porosity model for an isolated carbonate platform during a sea level highstand (HST)	265
DIAGENESIS AND POROSITY AT THE PARASEQUENCE SCALE	265
Introduction	265
Cumulative diagenesis associated with parasequence stacking patterns in a 3rd order sequence	266
DIAGENESIS AND POROSITY AT THE SUPERSEQUENCE (2ND ORDER) SCALE: SEQUENCE STACKING PATTERNS	268
Introduction	268
Progradational sequence set and diagenesis	268
Aggradational sequence set diagenesis	269
Retrogradational sequence set and diagenesis	269
DIAGENESIS AND POROSITY AT THE 1ST ORDER SCALE: ICEHOUSE VERSUS GREENHOUSE	270
Introduction	270

Long-term temporal changes in carbonate mineralogy: impact on diagenesis and porosity evolution	271
The architecture of sedimentary sequences and their diagenesis/porosity evolution as a function of long-term climatic cycles (icehouse versus greenhouse)	272
CASE HISTORIES	274
Introduction	274
Controls over porosity evolution in Upper Paleozoic shelf limestones, Southwest Andrews area, Central Basin Platform of the Permian Basin, USA: porosity development as a function of subaerial exposure during an icehouse time	275
Stratigraphic controls over porosity development in an Albian ramp sequence, offshore Angola, Africa: Porosity evolution under greenhouse conditions in a mixed siliciclastic/carbonate/evaporite setting	281
SUMMARY	287
CHAPTER 9. BURIAL DIAGENETIC ENVIRONMENT	291
INTRODUCTION	291
THE BURIAL SETTING	291
Introduction	291
Pressure	292
Temperature	293
Deep burial pore fluids	295
Tectonics and basin hydrology	295
PASSIVE MARGIN BURIAL REGIMEN	297
Introduction	297
Mechanical compaction and de-watering	297
Chemical compaction	300
Factors affecting the efficiency of chemical compaction	305
Subsurface cements in a passive margin setting	307
Petrography of burial cements	308
Geochemistry of burial cements	310
Impact of late subsurface cementation on reservoir porosity	312
Subsurface dissolution in a passive margin setting	312
The North Sea Ekofisk Field: a case history of porosity preservation in chalks	313
THE ACTIVE OR COLLISION MARGIN BURIAL REGIMEN	318
Introduction	318
Lower Ordovician Upper Knox Dolomite of the southern Appalachians, USA	318
Dolomitization in Devonian carbonates, Western Canada Sedimentary Basin, Alberta, Canada	324
THE POST TECTONIC DIAGENETIC REGIMEN	329
Introduction	329

Mississippian Madison Aquifer of the mid-continent, USA	329
Post orogenic aquifer system in Paleozoic carbonates of the Greater Permian Basin	332
PREDICTING CHANGES IN POROSITY WITH DEPTH	335
SUMMARY	339

CHAPTER 10. POROSITY EVOLUTION FROM SEDIMENT TO RESERVOIR: CASE

HISTORIES	341
INTRODUCTION	341
THE MISSISSIPPIAN MADISON AT MADDEN FIELD WIND RIVER BASIN, WYOMING, USA	341
Introduction	341
General setting	342
Stratigraphic and depositional setting	343
Correlation of surface exposures into the deep subsurface at Madden	346
Burial history of the Madison	350
Porosity/permeability of Madison reservoirs and outcrop dolomites	350
Diagenetic history of the Madison, Wind River Basin	351
Conclusions and lessons learned from the Madison at Madden Field, Wyoming	354
THE UPPER JURASSIC SMACKOVER AND RELATED FORMATIONS, CENTRAL U.S. GULF COAST: A MATURE PETROLEUM FAIRWAY	355
Introduction	355
General setting	356
Sequence stratigraphic and depositional framework of the Upper Jurassic	358
Early diagenesis and porosity modification related to depositional sequences and sea level	365
Burial diagenesis and subsurface porosity evolution, Oxfordian reservoirs, central Gulf of Mexico	367
Upper Jurassic exploration and production constraints and strategies, central Gulf of Mexico	368
Conclusions and lessons learned from the Smackover of the central Gulf of Mexico	371
THE TERTIARY MALAMPAYA AND CAMAGO BUILDUPS, OFFSHORE PALAWAN, PHILIPPINES: 3-D RESERVOIR MODELING	372
Introduction	372
Geologic setting	373
Lithofacies and depositional model	375
Diagenetic history	376
Reservoir rock types as model input parameters	377
The model	378
Conclusions and lessons learned from the 3-D modeling of the Tertiary Malampaya	

and Camago buildups 379
