

User-Designed Computing

**Free-Enterprise
Application Design**

TECHNISCHE HOCHSCHULE DARMSTADT	
Fachbereich 1	
<u>Gesamtbibliothek</u>	
<u>Betriebswirtschaftslehre</u>	
Inventar-Nr. :	35.204
Abstell-Nr. :	A 18/1376
Sachgebiete:	1.7.3.3

Louis Schlueter, Jr.
Sperry Univac

LexingtonBooks
D.C. Heath and Company
Lexington, Massachusetts
Toronto

Contents

	Figures and Tables	ix
	Preface	xi
	Acknowledgments	xv
Chapter 1	Computer Programming and Users	1
Chapter 2	Real-Time Information	5
	Real-Time Information Processing without Computers	6
	Computerizing Real-Control Information	7
Chapter 3	Program Specifications	9
Chapter 4	Report-Processing Systems	11
Chapter 5	An Unstructured, Real-Time, Reporting Application	15
	Life Cycle of an Unstructured Report-Processing Application	16
	Specifying in Free Enterprise Computing Application Design	19
Chapter 6	Report-Processing System Coordination	23
Chapter 7	The Evolution of a User: Report-Generator (RPG) Designer	31
Chapter 8	Coordination of Report-Generator Design and Use	35
Chapter 9	Data-Base Concepts and Standardization	43
Chapter 10	Free Enterprise Computing Data-Base Theory	49
Chapter 11	Distributed Processing: Cure or Cancer?	55
Chapter 12	Free Enterprise Report Processing instead of Distributed Processing	59

Chapter 13	Implications for Data Processing	61
	Report-Processing Systems as Application Design Languages	63
	Developing Data-Processing Personnel for Report-Processing Application Design	64
Chapter 14	Auditing Report-Processing Services	67
Chapter 15	Purchase Considerations for User-Oriented Software Systems	71
	Growth Potential	72
	Functional Comparison	74
	History of Support	75
	Security Techniques	76
	Education and Documentation	78
	Automatic History Production	79
	The Communication System	79
	Display Terminals	80
	Auxiliary-Device Support	81
	Tools for System Coordination	82
Chapter 16	Putting Free Enterprise Computing in Your Operation	87
Chapter 17	Rights to Support Free Enterprise Computing	89
Chapter 18	The MAPPER System: Proof of Free Enterprise Computing Concepts	91
	Sperry Univac MAPPER 1100 CRT Report-Processing System	91
	MAPPER and the 1100 Environment	93
	MAPPER Software	98
	Function Program Characteristics	99
	Tutorial Aids	99
	System Coordination, Security, and Data-Base Management	99
	MAPPER 1100 Report-Processing System: Sperry Univac, Roseville Operations	100
Chapter 19	Evolution of the Report-Processing Concept	103

Chapter 20	Santa Fe Railway's OX Project: The World's Largest User-Developed Computer System <i>Stephen M. Anderson with Jim C. Shepard, K.K. Langfeld, and W.D. Thomson</i>	111
Chapter 21	GTE Automatic Electric Operations, Management, and MAPPER <i>Neil Biteler</i>	127
	GTE Automatic Electric Environment	127
	The Approach to the Problem	128
	Results Achieved	139
	Conclusion	140
Chapter 22	Free Enterprise Computing: In Summary	141
	Index	143
	About the Author	147
