

MACROECONOMICS

An Integration of Monetary, Search, and Income Theories

CHARLES W. BAIRD

University of California, Los Angeles

Contents

	Preface	<i>xiii</i>
1	SETTING THE STAGE	1
	Economic Analysis	2
	Market Interaction	3
	Indifference Curves	9
2	NATIONAL INCOME ACCOUNTING AND PRICE INDICES	17
	The Concept of National Income Accounting	18
	How Are GNP Data Actually Collected?	24
	The National Income Accounting Identity	25
	Price Indices and Their Biases	26
	<i>Consumer Price Index</i>	26
	<i>The GNP Deflator</i>	29
	Summary	31
3	THE RELATIONSHIP BETWEEN PRODUCTION AND INCOME	33
	Say's Law	34
	Walras' Law	36
	The Keynesian Cross	38
	Summary	42
4	INFORMATION COSTS, UNEMPLOYMENT, AND EQUILIBRIUM INCOME	45
	Frictional Unemployment—the Natural Unemployment Rate	46
	Structural Unemployment and Minimum Wages	49
	Unemployment as a Result of Declining Aggregate Demand	50
	Summary	55

5	THE TWO-SECTOR KEYNES- WITHOUT-MONEY MODEL	57
	The Keynesian Cross and Equilibrium Income	58
	The Multiplier and the Saving Function	62
	Investment as a Function of Income	65
	Equilibrium and the Marginal Propensity to Spend	66
	Summary	68
6	THE THREE-SECTOR KEYNES-WITHOUT- MONEY MODEL AND FISCAL POLICY	69
	Adding the Government Sector to the Keynesian Cross	70
	Unit Multiplier Theorem	74
	Effects of an Income Tax	75
	Unit Multiplier Theorem with an Income Tax	76
	Generalized Three-Sector Model	78
	Fiscal Policy	79
	Full Employment Budget Concept	83
	Automatic Stabilizers	84
	Summary	85
7	MORE ON CONSUMPTION	87
	Is the Average Propensity to Consume Constant?	88
	<i>Absolute Income Hypothesis</i>	89
	<i>Permanent Income Hypothesis</i>	91
	Consumption and the Rate of Interest	95
	Summary	101
8	INVESTMENT AND THE IS CURVE	105
	Present Value Investment Decision Rule	106
	Internal Rate of Return Rule	111
	Superiority of the Present Value Rule	111
	<i>Time Paths</i>	112
	<i>Project Size</i>	113
	<i>Nonunique Internal Rate</i>	115

The Optimum Capital Stock	116
Investment	122
Derivation and Manipulation of the <i>IS</i> Curve	125
Summary	129

9 THE QUANTITY EQUATION OF EXCHANGE AND MONEY SUPPLY THEORY 131

Money and Transaction Costs	132
Quantity Equation of Exchange	133
The Old and New Quantity Theories	134
The New Quantity Theory	135
The Money Base	138
The Money Multiplier	141
The Money Multiplier and the Rate of Interest	144
Relationship between Money Base and Money Stock	146
Summary	149

10 THE DEMAND FOR MONEY 151

The Microeconomic Approach	152
Another (Keynesian) Approach to the Demand For Money	159
Developments of the Keynesian Approach	161
Summary	166

11 THE *LM* CURVE 169

Derivation of the <i>LM</i> Curve	170
The Money Supply Function and the <i>LM</i> Curve	172
The Demand for Money Function and the <i>LM</i> Curve	174
Velocity and the Rate of Interest	176
Summary	180

12 THE CONSTANT PRICE *IS-LM* MODEL 183

Construction of the Model	184
Manipulation of the Model	186
<i>Changes in the Willingness to Hold Money</i>	187

<i>Increase in Government Deposits at Commercial Banks</i>	188
<i>Worsening of Profit Expectations</i>	189
<i>Upward Shift of the Consumption Function</i>	190
Monetary and Fiscal Policy in the <i>IS-LM</i> Model	191
<i>The Monetary Implications of Fiscal Policy</i>	191
<i>The Effects of Monetary and Fiscal Policies in the IS-LM Diagrams</i>	193
The Transmission Mechanism of Monetary Policy	195
The Reverse Causation Hypothesis	197
Summary	200

13

MONETARY POLICY VERSUS FISCAL POLICY WITH FIXED PRICES AND WAGES 203

The Importance of the Degree of Variability of Velocity	204
Constant Velocity Case	205
Velocity as a Will-o'-the-Wisp	206
Velocity as a Stable Function	207
<i>Expansionary Pure Fiscal Policy</i>	207
<i>Restrictive Fiscal Policy</i>	209
<i>Expansionary Monetary Policy</i>	211
<i>Restrictive Monetary Policy</i>	212
Recent Experience with Monetary and Fiscal Policies	212
Summary	215

14

THE VARIABLE PRICE IS-LM MODEL 217

Effects of a Variable Price Level	218
The Labor Market	221
Changes of Money Stock and Price Level	224
General Equilibrium—Notional and Effective Demand	225
Shifts of the <i>IS</i> Curve and the Aggregate Production Function	229
Union Power and General Equilibrium	232
<i>Fixed Money Wage Case</i>	234
<i>Fixed Real Wage Case</i>	237
<i>Nonmonopoly Union Case</i>	238

Direct Effects of Changes of the Money Supply	240
Changes in the Expected Rate of Inflation	242
Effects on Interest Rate of Changes of the Money Supply	247
Summary	250

15	INFLATION	253
	The Price Level and Relative Prices	254
	Cost-Push Inflation	255
	Cost-Price Illusion	258
	Demand-Pull Inflation	260
	<i>Shifts of the LM Curve</i>	260
	<i>Shifts of the IS Curve</i>	261
	Wealth Transfers from Unanticipated Inflation	263
	Anticipated Inflation Is a Tax	265
	Efficiency Losses of Anticipated Inflation	268
	Inflationary Recession	268
	Open versus Repressed Inflation	276
	Wage-Price Guidelines	277
	Price Controls and Expectations	280
	Summary	283

16	THE NEW QUANTITY THEORY, INFORMATION COSTS, AND PHILLIPS CURVES: A SYNTHESIS	285
	General Background	286
	The St. Louis Model	288
	The Phillips Curve—A Phenomenon of Information Costs	295
	Conclusion	299

	APPENDIX A	303
	Positively Sloped <i>IS</i> Curves	

	APPENDIX B	307
	Permanent Income and the <i>IS-LM</i> Model
