Karl Farmer • Birgit Bednar-Friedl

Intertemporal Resource Economics

An Introduction to the Overlapping Generations Approach

Contents

Part I Basics

1	Intr	oduction	3
	1.1	Motivation	3
	1.2	Natural Resources and the Economic Production Process	4
	1.3	Natural Resources in the History of Economic Thought	6
		1.3.1 Classical Economics	6
		1.3.2 Neoclassical Economics	9
		1.3.3 Resource Economics and Politics since the 1970s	10
	1.4	Resource Scarcity, Market Equilibrium, Intergenerational	
		Efficiency and Equity	11
		1.4.1 Intergenerational Scarcity of Renewable Resources	11
		1.4.2 Intergenerational Efficiency and Intertemporal Market	
		Equilibrium	12
		1.4.3 Intergenerational Equity (Sustainability) versus	
		Intergenerational Efficiency	13
	1.5	General Equilibrium Models	14
	1.0	1.5.1 Intertemporal General Equilibrium Models	15
		1.5.2 Overlapping Generations versus Infinitely Lived Agents	15
		1.5.3 The Intergenerational Conflict and the Lack of Property	
	`	Rights	16
	16	Outline of the Book	16
	Refe	rences	17
	Ken		.,
2	Eco	nomic Growth and Natural Resources	19
	2.1	Introduction	19
	2.2	Economic Growth and the Use of Natural Resources: Differing	
		Views	19
	2.3	Political Economics of GDP Growth: A Digression	24
	2.4	Economic Growth and Non-Renewable Resources: An Overview	25
	2.5	Conclusions	29

	Ref	erences	29
Par	t II	Efficiency and Market Equilibrium under Resource Abundance	
3	Inte	ergenerational Efficiency in Log-linear Cobb-Douglas OLG	
	Мо	dels	33
	3.1	Introduction	33
	3.2	The Log-Linear Cobb-Douglas OLG Economy	33
	3.3	Intergenerational Efficiency	35
	3.4	First Order Conditions for Short-Run Intergenerational Efficiency	37
	3.3	Graphical inustration of FOCs for Short-Kun intergenerationally	40
	24	Complexition	40
	3.0 D.f		43
	Ref	erences	43
4	Inte	ertemporal Market Equilibrium and Short-Run	
	Inte	ergenerational Efficiency	45
	4.1	Introduction	45
	4.2	The Institutional Framework	46
	4.3	Individual Optimization Problems	47
	4.4	Market Clearing Conditions	49
	4.5	Intertemporal Equilibrium Dynamics	50
	4.6	Short-Run Intergenerational Efficiency of the Intertemporal	
		Market Equilibrium	51
	4.7	Conclusions	54
	Ref	erences	55
5	Ste	ady-State Market Equilibrium, Long-Run Intergenerational	
	Effi	ciency, and Optimality	57
	5.1	Introduction	57
	5.2	Steady-State Market Equilibrium	57
	5.3	Long-Run Intergenerational Efficiency	60
	5.4	Long-Run Intergenerational (In-)Efficiency of Steady-State	
		Market Equilibrium	63
	5.5	Intergenerational Efficiency versus Intergenerational Optimality	67
	5.6	Steady-State Economic Growth and Resource Saving	
		Technological Progress	69
	5.7	Conclusions	71
	Ref	erences	72

	6.2.2 The Sustainable Yield	79
	6.2.3 The Own Rate of Return	80
6.3	The Harvest Cost Function	81
6.4	Short-Run Intergenerationally Efficient Resource Harvesting	82
6.5	FOCs for Short-Run Intergenerational Efficiency	83
6.6	Long-Run Intergenerational Efficiency	86
6.7	Conclusions	89
Refe	erences	89
Inte Effic	rtemporal Market Equilibrium and Intergenerational ciency with Renewable Resources	91

7.1	Introduction	91
7.2	Intertemporal Market Equilibrium with a Privately Owned Resource	92
	7.2.1 Individual Optimization Problems	93
	7.2.2 First Order Conditions for Individual Maxima	94
	7.2.3 Market Clearing Conditions	95
7.3	Perfectly Competitive Markets with an Open-Access Renewable	
	Resource	96
7.4	Market Equilibrium and Intergenerational Efficiency under	
	Opposing Property Rights Regimes	97
	7.4.1 Privately Owned Resource Stocks and Short-Run	
	Intergenerational Efficiency of Market Allocation	97
	7.4.2 Open Access and the Inefficiency of Market Allocation	99
7.5	Conclusions I	00
Refe	erences	01

Part IV Intergenerational Equity and Market Equilibrium with Scarce Renewable Resources

8	Sust	ainable Economic Growth with Linear Resource Regeneration 105
	8.1	Introduction
	8.2	Individual Optimization and Market Clearing under Linear
		Regeneration
	8.3	Derivation of Intertemporal Equilibrium Dynamics
	8.4	Intertemporal-Equilibrium and Steady-State Growth Rates 110
	8.5	A Sustainable Economic Growth Path
,	8.6	Feasibility of Sustainable Growth and Sustainability Policy in
		Market Systems
	8.7	Conclusions
	Refe	erences
9	Stea	dy-State Sustainability under Logistically Regenerating
	Res	ources
	9.1	Introduction
	9.2	The Log-Linear CD OLG Model with Logistic Regeneration 118
	9.3	Intertemporal Equilibrium Dynamics 122

ix

9.4	The Existence of (Non-Trivial) Steady States
9.5	Stability of the Steady States
9.6	The Saddle Paths Converging to the Non-Trivial Steady State 129
9.7	Conclusions
Refe	rences

Part V Shocks to Harvest Technology and Natural Regeneration

10	Resource Use with Physical Harvest Costs	135
	10.1 Introduction	135
	10.2 An OLG model with Harvest Costs	136
	10.2.1 Dynamics of the Resource Stock	137
	10.2.2 Household and Firm Optimization	138
	10.2.3 Intertemporal Equilibrium Dynamics	140
	10.3 Derivation of Intertemporal Equilibrium Loci	141
	10.4 Existence of Non-Trivial Steady State	142
	10.5 Long-Run Intergenerational Efficiency of Non-Trivial Steady State .	144
	10.6 Stability of Non-Trivial Steady State	146
	10.7 Uniqueness of Non-Trivial Steady State	150
	10.8 Conclusions	152
	Appendix A: Individual Optimization and Market Clearing Conditions	
	with Endogenous Labor Supply	152
	Appendix B: Proof to Lemma 10.1	153
