ORGANISATION FOR ECONOMIC CO-OPERATION AND DEVELOPMENT

Table of contents

Chapter 1

Aim and Scope of the Manual

1.1	A preliminary word to the user of R&D data	15
1.2	Coverage of the Manual and the uses of R&D statistics	15
1.3	The relationship between the Frascati Manual and other international standards	16
1.4	R&D input and output	18
1.5	R&D and related activities	18
	 1.5.1 Research and experimental development (R&D) 1.5.2 Scientific and technological activities (STA) 1.5.3 R&D and scientific and technological innovation 1.5.4 R&D administration and other supporting activities 	18 18 19 21
1.6	Natural sciences and engineering (NSE) and social sciences and humanities (SSH)	21
1.7	Measures of R&D inputs	22
	1.7.1 R&D personnel1.7.2 R&D expenditures1.7.3 R&D facilities1.7.4 National R&D efforts	22 23 23 23
1.8	Classification systems for R&D	24
	1.8.1 Institutional classifications 1.8.2 Functional distributions	24 25
1.9	R&D surveys, reliability of data and international comparability	26
1.10	Government budget appropriations or outlays for R&D (GBAORD)	27
1.11	A final word to the user of R&D data	27

Chapter 2

Basic Definitions and Conventions

0.1	D 1 1				`

Chapter 3 Institutional Classifications

3.1	The approach	47
3.2	The reporting unit and the statistical unit	47
	3.2.1 The reporting unit	47 47
3.3	Sectors	48
	3.3.1 Reasons for sectoring 3.3.2 Choice of sectors 3.3.3 Problems of sectoring	48 48 49
3.4	Business enterprise sector	49
	3.4.1 Coverage 3.4.2 The principal sector subclassification 3.4.2.1 The classification list 3.4.2.2 The statistical unit 3.4.2.3 Criteria for classification 3.4.2.3.1 Firms 3.4.2.3.2 R&D units serving enterprises	49 50 51 51 51 51 54
	3.4.3 Other institutional subclassifications	54
	3.4.3.1 Type of institution	54 55
3.5	Government sector	55
	 3.5.1 Coverage	55 56 56 56 57 57 57
3.6	Private non-profit sector	57
	 3.6.1 Coverage	57 58 58 59 59 59
3.7	Higher education sector	59
	 3.7.1 Coverage	59 61 61 62 63 63

	3.7.2.2 The statistical unit	53
	3.7.2.3 Criterion for classification	54
	3.7.3 Other institutional subclassifications	54
3.8	Abroad	54
	3.8.1 Coverage	54 55
	3.8.3 Other institutional subclassifications	55 55
	3.8.4 Geographic area of origin or destination of funds	<u>í</u> 5

Functional Distribution

4.1	The approach	67
4.2	Type of activity	67
	4.2.1 Use of distribution by type of activity 4.2.2 The distribution list	67 68
	4.2.2.1 Basic research	68
	4.2.2.2 Applied research	69 70
	4.2.3 Criteria for distinguishing between types of activity	70
	4.2.3.1 Examples from the natural sciences and engineering	70
	4.2.3.2 Examples from the social sciences and humanities	71
	4.2.3.3 Examples from software development	71
4.3	Product fields	72
	4.3.1 Use of distribution by product fields 4.3.2 The distribution list	72 72
	4.3.3 Criteria for distribution	73
	4.3.3.1 Nature of product	73
	4.5.5.2 Use of product	75
4.4	Product and process R&D	74
	4.4.1 Utilisation $4.4.2$ Product \mathbb{R} \mathbb{R} \mathbb{D}	74
	4.4.3 Process R&D	75
4.5	Detailed fields of science and technology	75
	4.5.1 Use of distribution by detailed fields of science and technology	75
	4.5.2 The distribution list	76
	4.5.3 The criteria for distribution	76
4.6	Socio-economic objectives	76
	4.6.1 Use of distribution by socio-economic objectives	76
	4.6.2 Minimum recommended breakdown	/6 77
	4.6.2.2 Control and care of the environment	77
	4.6.3 The distribution list	77
	4.6.4 The criteria for distribution	78

Measurement of Personnel Devoted to R&D

5.1	General introduction	79
5.2	Initial coverage of R&D personnel	81
	 5.2.1 Definition	81 81 81 81
5.3	Measurement	82
	 5.3.1 Introduction 5.3.2 Headcount data 5.3.2 Headcount data 5.3.2 Possible approaches and options 5.3.3 Full-time equivalence (FTE) data 5.3.3.1 Reasons for the approach 5.3.3.2 Measurement in person-years 5.3.3 FTE on a fixed date 5.3.4 Specific problems in the higher education sector 5.3.4.1 General 5.3.4.2 Definition of working time 5.3.4.3 Calculation of full-time equivalence 	82 82 83 83 83 83 83 84 84 84 84 84
5.4	Categories of R&D personnel	85
	 5.4.1 Introduction	85 86 86 86 87 87 87 87 87 87 87 88 88 88 88 88 88
5.5	National aggregates	88
5.6	Cross-qualification between occupation and qualification	88
5.7	Other personnel classifications	90

Measurement of Expenditures Devoted to R&D

6.1	Introduction	91
6.2	Intramural expenditures	91
0.2	 6.2.1 Definition . 6.2.2 Current expenditures . 6.2.2.1 Labour costs of R&D personnel . 6.2.2.1 Labour costs of postgraduate students engaged in R&D . 6.2.2.2 Other current costs . 6.2.2.3 Indirectly paid current costs . 6.2.2.3 Indirectly paid current costs and pensions for R&D personnel 6.2.2.3 Social security costs and pensions for R&D personnel 6.2.2.4 Value Added Tax (VAT) . 6.2.2.5 Exclusion of depreciation . 6.2.3 Instruments and equipment . 6.2.3 Conventions for distinguishing between current and capital items 6.2.3.4 Identifying the R&D content of capital expenditures . 6.2.3.5 Sale of R&D capital goods . 	91 92 92 92 93 93 93 94 95 95 95 95 96 96
6.3	Sources of funds	96
	 6.3.1 Methods of measurement	96 97 97 98 99 99 99
6.4	Extramural expenditures	100
6.5	National totals	101
	6.5.1 Gross domestic expenditure on R&D (GERD)16.5.2 Gross national expenditure on R&D (GNERD)1	101 101

Chapter 7

Survey Procedures

7.1	Surveys and estimates	105
7.2	Core and marginal R&D resources	105
7.3	Questions for inclusion in surveys	106

7.4	Identifying survey respondents	106
	7.4.1 Business enterprise sector	107
	7.4.2 Government sector	107
	7.4.3 Private non-profit sector	107
	7.4.4 Higher education sector	108
7.5	Working with correspondents	108
	7.5.1 Encouraging co-operation	108
	7.5.2 Estimating procedures	109
	7.5.3 Operational criteria	109
7.6	The surveying agency	110
	7.6.1 Responsibilities to respondents	110
	7.6.2 Editing procedures	111
	7.6.3 Estimations	111
	7.6.3.1 Non-respondents	111
	7.6.3.2 The higher education sector	111
	7.6.4 Reporting to the OECD and to other international agencies	112

Government Budget Appropriations or Outlays for R&D by Socio-economic Objectives

8.1	Introduction	113
8.2	Relationship with other international standards	114
8.3	Sources of data on the socio-economic objectives of GBAORD	114
8.4	Coverage of R&D	114
	8.4.1 Basic definition	114 114 114
8.5	Definition of government	115
8.6	Coverage of government budget appropriations and outlays 8.6.1 Intramural and extramural expenditures 8.6.2 "Funding" and "performer-based" reporting 8.6.3 Budgetary and extra-budgetary funds 8.6.3.1 Receipts for R&D performed for other sectors 8.6.3.2 Other extra-budgetary funds 8.6.4 Direct and indirect funding 8.6.4.1 Treatment of public general university funds (GUF) 8.6.4.2 Loans and indirect funding of industrial R&D 8.6.5 Type of expenditures 8.6.5.1 General coverage 8.6.5.2 Money carried forward 8.6.6 Stages of government R&D appropriations and outlays	115 115 115 116 116 116 116 116 116 117 117 117

8.7	Distri	bution by	socio-economic objectives	117
	8.7.1	The crite	ria for distribution	117
		8.7.1.1	Purpose or content	117
		8.7.1.2	Primary and secondary objectives	118
		8.7.1.3	Identifying primary objectives	118
	8.7.2	The unit	distributed (statistical unit)	118
	8.7.3	The distr	ibution	119
		8.7.3.1	Introduction	119
	8.7.4		The list of socio-economic objectives	119
		8.7.4.1	Development of agriculture, forestry and fishing	119
		8.7.4.2	Promotion of industrial development	119
		8.7.4.3	Production and rational use of energy	120
		8.7.4.4	Development of the infrastructure	121
			8.7.4.4.1 Transport and telecommunications	121
			8.7.4.4.2 Urban and rural planning	122
		8.7.4.5	Control and care of the environment	122
			8.7.4.5.1 The prevention of pollution	122
			8.7.4.5.2 Identification and treatment of pollution	122
		8.7.4.6	Health (excluding pollution)	122
		8.7.4.7	Social development and services	122
		8.7.4.8	Exploration and exploitation of the Earth and atmosphere	122
		8.7.4.9	General advancement of knowledge	123
			8.7.4.9.1 Advancement of research	123
			8.7.4.9.2 General university funds (GUF)	123
		8.7.4.10	Civil space	123
		8.7.4.11	Defence	123
	8.7.5	Principal	areas of difficulty	123
		8.7.5.1	Civil space	124
		8.7.5.2	Mining	124
		8.7.5.3	Construction	124
		8.7.5.4	Production and rational use of energy	124
8.8	Main	differenc	es between GBAORD and GERD data	125
	881	General	differences	125
	882	GBAOR	D and government-financed GERD	125
	8.8.3	GBAOR	D and GERD by socio-economic objectives	125
	5.0.5	<i>22.10</i> K		120

Annexes

1.	Brief History and Origins of the Present Manual and of R&D Methodological Work		
	by Other International Bodies	127	
2.	Other Science and Technology Indicators	133	
3.	Issues of Specific Relevance to the Higher Education Sector	141	
4.	Software Issues	155	
5.	Social Sciences and Humanities Definitions	157	

6.	Decision Tree for Sectoring R&D Units	159	
7.	Keys between R&D Personnel Categories in the frascati Manual and ISCED and ISCO-88	161	
8.	R&D Funding in the Manual and in Studies of Government Subsidies	163	
9.	Practical Methods of Providing Up-to-date Estimates and Projections of Resources Devoted to R&D	167	
10.	R&D Deflators and Currency Converters	171	
11.	The Treatment of R&D in the United Nations System of National Accounts and the Construction of Satellite Accounts	179	
12.	Supplementary Guidance on the Classification of Large R&D Projects with Special Reference to the Defence and Aerospace Industries	205	
13.	Revised Industrial Classification for Resources Devoted to R&D in the Business Enterprise Sector in OECD R&D Surveys	215
