# CONTENTS

## Section I :      Geodynamics

|        |                                                                                                                                                                                                                              |     |
|--------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| I . 1  | The Theory of Nutation and the Variation of Latitude<br>with H. Jeffreys (1957, <i>Mon. Not. R. Astron. Soc.</i> , <b>117</b> , 142-61)                                                                                      | 3   |
| I . 2  | The Theory of Nutation and the Variation of Latitude: the Roche<br>Model Core<br>with H. Jeffreys (1957, <i>Mon. Not. R. Astron. Soc.</i> , <b>117</b> , 162-73)                                                             | 25  |
| I . 3  | The Advantages of Planned Co-Operation in the International<br>Latitude Service<br>(1960, <i>On the Present State and the Future of Latitude<br/>Investigations</i> , 69-81, E. P. Fedorov, ed., Acad. Sci. USSR,<br>Moscow) | 39  |
| I . 4  | The Theory of Nutation and the Internal Constitution of the Earth<br>(1961, <i>Phys. and Chem. of the Earth</i> , <b>4</b> , 251-80)                                                                                         | 53  |
| I . 5  | The Elasticity of the Earth's Outer Core<br>(1962, <i>Rev. Fac. Cienc. Lisboa</i> , 2 <sup>a</sup> s, <b>8</b> , 277-86)                                                                                                     | 83  |
| I . 6  | A Dependência da Maré Terrestre da Estrutura do Núcleo da Terra<br>(1962, <i>Rev. Fac. Cienc. Lisboa</i> , 2 <sup>a</sup> s, <b>9</b> , 45-75)                                                                               | 93  |
| I . 7  | The Values of the Nutations and of the Period of the Variation of<br>Latitude<br>(1964, <i>Vistas in Astron.</i> , <b>5</b> , 1-10)                                                                                          | 125 |
| I . 8  | Nearly Diurnal Nutation of the Earth<br>with H. Jeffreys (1964, <i>Nature</i> , <b>204</b> , 120-1)                                                                                                                          | 135 |
| I . 9  | The Influence of the Core on Earth Tides<br>(1964, <i>Commun. Obs. R. Belg.</i> , No. 236, 40-63)                                                                                                                            | 141 |
| I 10   | Comparison of Forms of the Elastic Equations for the Earth<br>with H. Jeffreys (1966, <i>Acad. R. Belg., Cl. Sci. Mem.</i> <b>37</b> , 3-31)                                                                                 | 165 |
| I . 11 | The Energy of Elastic Strain in the Earth<br>with H. Jeffreys (1967, <i>Acad. R. Belg., Cl. Sci. Bull.</i> , <b>53</b> , 926-33)                                                                                             | 195 |
| I . 12 | Coordinates of the Pole (1899-1968) Referred to the Conventional<br>International Origin<br>with S. Yumi (1969, <i>Publ. Int. Latit. Obs. Mizusawa</i> , <b>7</b> , 41-50)                                                   | 203 |

|        |                                                                                                                                                                                                       |     |
|--------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| I . 13 | La Précession - Nutation et la Structure de la Terre<br>(1970, <i>Ciel et Terre</i> , <b>86</b> , 177-86)                                                                                             | 213 |
| I . 14 | Revised Values (1941-1962) of the Coordinates of the Pole Referred<br>to the CIO<br>with S. Yumi (1970, <i>Publ. Int. Latit. Obs. Mizusawa</i> , <b>7</b> , 109-12)                                   | 223 |
| I . 15 | La Rotation de la Terre - Théorie et Observations<br>(1971, <i>Publ. Staz. Astron. Int. Latit. Carloforte-Cagliari</i> ,<br>Nuov. Ser., N.16, 1-9)                                                    | 227 |
| I . 16 | Influence of the Core on the Nutations<br>(1971, <i>Mantle and Core in Planetary Physics</i> , 17-26,<br>J. Coulomb and M. Caputo, eds., Academic Press, New York)                                    | 237 |
| I . 17 | Revised Values (1941-1962) of the Coordinates of the Pole Referred<br>to the CIO<br>with S. Yumi (1972, <i>Rotation of the Earth</i> , 10-11, P. Melchior<br>and S. Yumi, eds., D. Reidel, Dordrecht) | 247 |
| I . 18 | The Need for a Standard Model of the Earth's Structure<br>(1973, <i>Bull. Geod.</i> , N. 107, 105-6)                                                                                                  | 251 |
| I . 19 | Inversion Methods for a Standard Earth Model<br>(1973, <i>Geophys. J. R. Astron. Soc.</i> , <b>35</b> , 353-5)                                                                                        | 253 |
| I . 20 | Maximum Entropy Spectrum of Long-Period Polar Motion<br>with R. G. Currie(1976, <i>Geophys. J. R. Astron. Soc.</i> , <b>46</b> , 67-73)                                                               | 257 |
| I . 21 | The Influence of Earth Tides on Earth's Coordinates<br>(1979, <i>Applications of Geodesy to Geodynamics</i> , 337-9,<br>I. I. Mueller, ed., OH State Univ., Dep. Geod. Sci. Rep. N. 280)              | 265 |
| I . 22 | The Earth's Constitution and the Nutations<br>(1980, <i>Nutation and the Earth's Rotation</i> , 139-51, E. P. Fedorov,<br>M. L. Smith and P. L. Bender, eds., D. Reidel, Dordrecht)                   | 269 |
| I . 23 | Foreword<br>of the book (1980, <i>Results of the International Latitude<br/>Service in a Homogeneous System</i> by S. Yumi and<br>K. Yokoyama, Central Bureau IPMS, Mizusawa)                         | 283 |
| I . 24 | An Analysis of the Homogeneous ILS Polar Motion Series<br>with C. R. Wilson (1980, <i>Geophys. J. R. Astron. Soc.</i> , <b>62</b> , 605-16)                                                           | 289 |

|        |                                                                                                                                                                                                                                                                              |     |
|--------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| I . 25 | Preamble<br>with E. R. Lapwood of the paper <i>Preliminary Reference Earth Model</i> by A. M. Dziewonski and D. L. Anderson (1981, <i>Phys. of the Earth and Planet. Inter.</i> , <b>25</b> , 297-356)                                                                       | 301 |
| I . 26 | Estimates of Chandler's Component of Polar Motion as Derived from Various Data Sets<br>with C. R. Wilson (1981, <i>Astron. Nachr.</i> , <b>302</b> , 227-32)                                                                                                                 | 307 |
| I . 27 | Advantages and Disadvantages of the MERIT Campaigns (1984, <i>Astron. Nachr.</i> , <b>305</b> , 31-2)                                                                                                                                                                        | 313 |
| I . 28 | Combination of Recent Polar Motion Observations<br>with C. R. Wilson (1985, <i>Proc. Int. Conf. on Earth Rotation and the Terrestrial Reference Frame</i> , 381-2, I. I. Mueller, conv., Dep. Geod. Sci. Surv., OH State Univ., Columbus)                                    | 315 |
| I . 29 | Polar Motion Estimates from Linear Combinations of Independent Series<br>with C. R. Wilson (1986, <i>Astron. Nachr.</i> , <b>307</b> , 137-47)                                                                                                                               | 317 |
| I . 30 | The Combination of Polar Motion Observations: Comparison of Conventional and Kalman Filter Methods<br>with C. R. Wilson (1987, <i>Proc. Int. Symp. Figure and Dynamics of the Earth, Moon and Planets</i> , 753-66, P. Holota, ed., Astron. Inst. Czech. Acad. Sci., Prague) | 329 |
| I . 31 | The Combination of Polar Motion Observations<br>with C. R. Wilson (1988, <i>The Earth's Rotation and Reference Frames for Geodesy and Geodynamics</i> , 247-55, A. K. Babcock and G. A. Wilkins, eds., D. Reidel, Dordrecht)                                                 | 343 |
| I . 32 | On the Usage of Maximum Entropy Spectral Analysis in the Determination of Earth Rotation Parameters<br>with E. Groten and H. Lenhardt (1990, <i>Z. Vermessungswes.</i> , <b>115</b> , 175-81)                                                                                | 353 |
| I . 33 | Maximum Likelihood Estimates of Polar Motion Parameters<br>with C. R. Wilson (1990, <i>Am. Geophys. Union, Geophys. Monogr.</i> , <b>59</b> , 151-5)                                                                                                                         | 361 |
| I . 34 | On the Variability of the Chandler Frequency<br>with C. R. Wilson (1997, <i>J. Geophys. Res.</i> , <b>102</b> , 20,439-20,445)                                                                                                                                               | 367 |

## Section II: Geodesy

- II . 1 The Possibilities of Detecting Motions of the Crust 377  
(1968, *Geophys. J. R. Astron. Soc.*, **14**, 475-8)
- II . 2 The Detection of Changes in the Coordinates of a Place on the Earth 381  
(1968, *Continental Drift, Secular Motion of the Pole and Rotation of the Earth*, 100, W. Markowitz and B. Guinot, eds., D. Reidel, Dordrecht)
- II . 3 Old and New Methods of Observing Polar Motion 383  
(1972, *Rotation of the Earth*, 133-5, P. Melchior and S. Yumi, eds., D. Reidel, Dordrecht)
- II . 4 Ellipsoidal Density Models and Hydrostatic Equilibrium: Interim Report 387  
with A. Marussi, H. Moritz and R. H. Rapp (1974, *Phys. of the Earth and Planet. Inter.*, **9**, 4-6)
- II . 5 The Calculation of the Nutations 391  
(1974, *Highlights of Astronomy*, 221-2, G. Contopoulos, ed., D. Reidel, Dordrecht)
- II . 6 Free and Forced Motions of the Earth 393  
(1975, *Boll. di Geod. e Sci. Affini*, **34**, 173-83)
- II . 7 Dynamics of Polar Motion and Plate Tectonics 405  
(1977, *Scientific Applications of Lunar Laser Ranging*, 143-8, J. D. Mulholland, ed., D. Reidel, Dordrecht)
- II . 8 Reference Systems in Geodynamics 411  
(1978, *Boll. di Geod. e Sci. Affini*, **37**, 309-13)
- II . 9 Geodetic and Geophysical Implications of the Homogeneous Reduction of Pole Coordinates (1899-1979) 417  
(1982, *Bull. Geod.*, **56**, 1-8)

## Section III: Astronomy

- III . 1 The Constant of Nutation and the System of Astronomical Constants 427  
(1965, *Bull. Astron.*, **25**, 109-13)
- III . 2 Le Noyau des Planètes 433  
(1970, *Ciel et Terre*, **86**, 486-92)

|          |                                                                                                                                                                                                                     |     |
|----------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| III . 3  | Observed and Theoretical Values of the Nutations<br>(1971, <i>Celest. Mech.</i> , <b>4</b> , 186-9)                                                                                                                 | 441 |
| III . 4  | The Need for a Homogeneous System of Coordinates of the Pole<br>(1972, <i>Rev.Fac. Cienc. Lisboa</i> , 2 <sup>a</sup> s. A, <b>14</b> , 5-8)                                                                        | 447 |
| III . 5  | Rotational Motions of the Terrestrial Planets<br>(1976, <i>Long-Time Predictions in Dynamics</i> , 307-20,<br>V. Szebehely and B.D.Tapley, eds., D.Reidel, Dordrecht)                                               | 451 |
| III . 6  | Internal Structure and Motions around the Centre of Mass of the<br>Terrestrial Planets<br>(1976, <i>Atti dei Convegni Lincei</i> , <b>25</b> , 61-4)                                                                | 465 |
| III . 7  | The Future of the Researches about the Earth's Rotation<br>(1979, <i>Time and the Earth's Rotation</i> , 1-6, D.D. McCarthy and<br>J.D. Pilkington, eds., D. Reidel, Dordrecht)                                     | 469 |
| III . 8  | Instabilities in Planetary Systems<br>(1979, <i>Instabilities in Dynamical Systems</i> , 211-25,<br>V.G. Szebehely, ed., D. Reidel, Dordrecht)                                                                      | 475 |
| III . 9  | Report of IAU Commission 19 (Rotation of the Earth) for 1976-79<br>(1979, <i>Trans. IAU.</i> , <b>17</b> , 123-32)                                                                                                  | 491 |
| III . 10 | Reference Systems for Earth Dynamics<br>(1982, <i>Applications of Modern Dynamics to Celestial Mechanics<br/>and Astrodynamics</i> , 131-44, V. Szebehely, ed., Reidel, Dordrecht)                                  | 501 |
| III . 11 | Instabilities in Planetary Systems<br>(1983, <i>Long-Time Prediction in Dynamics</i> , 235-44, C.W. Horton,<br>L.E.Reichl and V.G. Szebehely, eds., John Wiley and Sons, New York)                                  | 515 |
| III . 12 | The Stability of Some Asteroids<br>(1983, <i>Dynamical Trapping and Evolution in the Solar System</i> ,<br>137-9, V.V. Markellos and Y. Kozai, eds., Reidel, Dordrecht)                                             | 525 |
| III . 13 | Regions of Stability of Asteroids<br>with V. Szebehely and J. Lundberg (1983, <i>Dynamical Trapping<br/>and Evolution in the Solar System</i> , 123-36, V.V. Markellos and<br>Y. Kozai, eds., D. Reidel, Dordrecht) | 529 |
| III . 14 | Astrofísica, Astrometria e Geofísica versus Técnicas<br>Radiointerferométricas<br>with N.J. Schuch and M.A.G. Maia (1984, <i>Ciência e Cultura</i> ,<br><b>36</b> , 759-68)                                         | 543 |

|          |                                                                                                                                                                                                                                          |     |
|----------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| III . 15 | Stability and Origin of the Minor Bodies of the Solar System<br>(1985, <i>Stability of the Solar System and Its Minor Natural and Artificial Bodies</i> , 65-79, V.G. Szebehely, ed., D. Reidel, Dordrecht)                              | 553 |
| III . 16 | Stability and Evolution of the Minor Bodies of the Solar System<br>(1986, <i>Space Dynamics and Celestial Mechanics</i> , 155-63, K.B. Bhatnagar, ed., D. Reidel, Dordrecht)                                                             | 569 |
| III . 17 | Orbital Stability and Origin of the Minor Bodies of the Solar System<br>(1988, <i>Atti Accad. Sci. Torino, Cl. Sci. Suppl.</i> , +, 55-68)                                                                                               | 579 |
| III . 18 | On Precession and Nutation Values<br>(1991, <i>Proc. 127th Colloq. IAU</i> , 368-75, J. A. Hughes, C. A. Smith and G. H. Kaplan, eds., US Nav. Obs., Washington)                                                                         | 593 |
| III . 19 | Time Scales for the Solar System<br>(1992, <i>Rev. Inst. Geogr. Cadastral</i> , 11, 21-2)                                                                                                                                                | 603 |
| III . 20 | IAU (1991) Recommendations on Time Scales<br>(1992, <i>Rev. Inst. Geogr. Cadastral</i> , 11, 23-5)                                                                                                                                       | 605 |
| III . 21 | The Influence of Chaos on the Evolution of the Minor Bodies of the Solar System<br>(1995, <i>From Newton to Chaos</i> , 183-92, A.E. Roy and B.A. Steves, eds., Plenum Press, New York)                                                  | 609 |
| III . 22 | On the Precision of Celestial and Terrestrial Reference Systems<br>(1998, <i>Proc. 4th Int. Workshop Positional Astron. and Celest. Mech.</i> , 273-80, A. L. Garcia, L. I. Yagudin et al., eds., Obs. Astron. Univ. Valencia, Valencia) | 619 |

#### **Section IV: List of Miscellaneous Papers**

|        |                  |     |
|--------|------------------|-----|
| IV . A | Research Papers  | 629 |
| IV . B | University Texts | 629 |
| IV . C | Popular Science  | 630 |
|        | Author Index     | 631 |
