## PART ONE VALUE

|                  |  |           |
|------------------|--|-----------|
| <b>Chapter 1</b> | <b>Why Finance Matters</b>   | <b>3</b>  |
| 1-1              | Why Finance Is Challenging and Interesting<br><i>The importance of capital markets / Understanding value / Time and uncertainty / Understanding people</i>   | 3         |
| 1-2              | Who Is the Financial Manager?  | 5         |
| 1-3              | Topics Covered in This Book  | 7         |
| 1-4              | Summary  | 8         |
|                  | Quiz   | 8         |
| <b>Chapter 2</b> | <b>Present Value and the Opportunity Cost of Capital</b>   | <b>11</b> |
| 2-1              | Introduction to Present Value<br><i>Calculating present value / Net present value / A comment on risk and present value / Present values and rates of return</i>   | 12        |
| 2-2              | Foundations of the Net Present Value Rule<br><i>How the capital market helps to smooth consumption patterns / Now we introduce productive opportunities / A crucial assumption / Imperfect capital markets</i> | 15        |
| 2-3              | A Fundamental Result<br><i>Other corporate goals</i>   | 22        |
| 2-4              | Summary  | 23        |
|                  | Further Reading  | 24        |
|                  | Quiz   | 24        |
|                  | Questions and Problems   | 26        |
| <b>Chapter 3</b> | <b>How to Calculate Present Values</b>   | <b>29</b> |
| 3-1              | Valuing Long-Lived Assets<br><i>Valuing cash flows in several periods / Why the discount factor declines as futurity increases—and a digression on money machines / How present value tables help the lazy</i> | 29        |
| 3-2              | Looking for Shortcuts—Perpetuities and Annuities<br><i>How to value growing perpetuities / How to value annuities</i>  | 33        |

|                  |  |           |
|------------------|--|-----------|
| 3-3              | Compound Interest and Present Values<br><i>A note on compounding intervals</i>   | 36        |
| 3-4              | Summary  | 40        |
|                  | Further Reading  | 42        |
|                  | Quiz   | 42        |
|                  | Questions and Problems   | 43        |
| <b>Chapter 4</b> | <b>Present Value of Bonds and Stocks</b>   | <b>47</b> |
| 4-1              | A Quick Look at How Bonds Are Valued   | 47        |
| 4-2              | How Common Stocks Are Valued<br><i>Today's price / But what determines next year's price?</i>  | 49        |
| 4-3              | A Simple Way to Estimate the Capitalization Rate<br><i>Using the DCF model to set electricity prices / Some warnings about constant-growth formulas</i>  | 52        |
| 4-4              | The Link between Stock Price and Earnings per Share<br><i>Calculating the present value of growth opportunities for Fledgling Electronics / A general expression linking dividends and growth opportunities / What do price-earnings ratios mean? / What do earnings mean?</i>     | 56        |
| 4-5              | Summary  | 61        |
|                  | Appendix: Valuing a Business by Discounted Cash Flow<br><i>Forecasting free cash flow for a business / Valuation format / Estimating horizon value / A further reality check / Conclusion</i>  | 62        |
|                  | Further Reading  | 66        |
|                  | Quiz   | 67        |
|                  | Questions and Problems   | 68        |
| <b>Chapter 5</b> | <b>Why Net Present Value Leads to Better Investment Decisions than Other Criteria</b>  | <b>71</b> |
| 5-1              | A Review of the Basics   | 71        |
| 5-2              | Net Present Value's Competitors  | 73        |
| 5-3              | Payback<br><i>The payback rule / Discounted payback</i>  | 73        |
| 5-4              | Average Return on Book Value   | 75        |
| 5-5              | Internal (or Discounted Cash Flow) Rate of Return<br><i>Pitfall 1—Lending or borrowing? / Pitfall 2—Multiple rates of return / Pitfall 3—Mutually exclusive projects / Pitfall 4—What happens when we can't finesse the term structure of interest rates? / The verdict on IRR</i> | 77        |
| 5-6              | Profitability Index or Benefit-Cost Ratio  | 85        |
| 5-7              | Summary  | 86        |
|                  | Further Reading  | 88        |
|                  | Quiz   | 88        |
|                  | Questions and Problems   | 90        |

|                  |   |           |
|------------------|---|-----------|
| <b>Chapter 6</b> | <b>Making Investment Decisions with the Net Present Value Rule</b>  | <b>93</b> |
| 6-1              | What to Discount<br><i>Only cash flow is relevant / Estimate cash flows on an incremental basis / Treat inflation consistently</i>  | 93        |
| 6-2              | Example—IM&C Project<br><i>Separating investment and financing decisions / A further note on estimating cash flow / A further note on depreciation / A final comment on taxes / A final comment on project analysis</i>                               | 98        |
| 6-3              | Project Interactions<br><i>Case 1—Optimal timing of investment / Case 2—Choosing between long- and short-lived equipment / Case 3—Deciding when to replace an existing machine / Case 4—Cost of excess capacity / Case 5—Fluctuating load factors</i> | 105       |
| 6-4              | Choosing the Capital Expenditure Program when Resources Are Limited<br><i>Profitability index under capital rationing / Some more elaborate capital rationing models / Uses of capital rationing models</i>   | 110       |
| 6-5              | Summary   | 114       |
|                  | Appendix: Some Embellishments to the Capital Rationing Model<br><i>Cash carry-forward / Mutually exclusive projects / Contingent projects / Constraints on nonfinancial resources / Constraints on nonfinancial output</i>                            | 115       |
|                  | Further Reading   | 116       |
|                  | Quiz  | 116       |
|                  | Questions and Problems  | 118       |

## **PART TWO RISK**

|                  |  |            |
|------------------|--|------------|
| <b>Chapter 7</b> | <b>Introduction to Risk, Return, and the Opportunity Cost of Capital</b>   | <b>125</b> |
| 7-1              | Sixty Years of Capital Market History in One Easy Lesson<br><i>Using historical evidence to evaluate today's cost of capital</i> | 125        |
| 7-2              | Measuring Portfolio Risk<br><i>Variance and standard deviation / Measuring variability / How diversification reduces risk</i>    | 127        |
| 7-3              | How Individual Securities Affect Portfolio Risk<br><i>Market risk is measured by beta</i>  | 133        |
| 7-4              | Relationship between Risk and Return<br><i>Using the capital asset pricing model to calculate expected returns</i>               | 136        |
| 7-5              | Diversification and Value Additivity<br><i>Value additivity and the capital asset pricing model—An example</i>                   | 140        |
| 7-6              | Summary  | 143        |
|                  | Further Reading  | 144        |
|                  | Quiz   | 144        |
|                  | Questions and Problems   | 146        |

|   |  |            |
|---|--|------------|
| <b>Chapter 8</b>  | <b>More about the Relationship between Risk and Return</b>   | <b>149</b> |
| 8-1   | Harry Markowitz and the Birth of Portfolio Theory<br><i>Combining stocks into portfolios / Choosing portfolios from many stocks / Limits to diversification / Contribution to portfolio risk / Borrowing and lending</i>   | 149        |
| 8-2   | The Relationship between Risk and Return<br><i>What would happen if a stock did not lie on the market line?</i>  | 159        |
| 8-3   | Validity and Role of the Capital Asset Pricing Model<br><i>Tests of the capital asset pricing model / Assumptions behind the capital asset pricing model / Arbitrage pricing theory</i>  | 161        |
| 8-4   | Summary  | 165        |
|   | Further Reading  | 165        |
|   | Quiz   | 166        |
|   | Questions and Problems   | 168        |
| <b>Chapter 9</b>  | <b>Capital Budgeting and the Capital Asset Pricing Model</b>   | <b>173</b> |
| 9-1   | Measuring Betas<br><i>Stability of betas over time / Using a beta book / Industry betas and the divisional cost of capital</i>   | 175        |
| 9-2   | How to Estimate Philadelphia Electric's Cost of Capital—An Example<br><i>Asset betas and equity betas / Calculating Philadelphia Electric's asset beta and company cost of capital / Business and financial risk</i>   | 182        |
| 9-3   | Setting Discount Rates When You Can't Use a Beta Book<br><i>Avoiding fudge factors in discount rates / What determines asset betas? / Searching for clues</i>  | 187        |
| 9-4   | Another Look at Discounted Cash Flow<br><i>Certainty equivalents / Certainty equivalent and risk-adjusted discount rate formulas for long-lived assets / Using risk-adjusted discount rates—An example / When you cannot use a single risk-adjusted discount rate for long-lived assets / A common mistake</i> | 191        |
| 9-5   | Summary  | 196        |
|   | Appendix: Using the Capital Asset Pricing Model to Calculate Certainty Equivalents   | 198        |
|   | Further Reading  | 199        |
|   | Quiz   | 199        |
|   | Questions and Problems   | 201        |
| <b>PART THREE PRACTICAL PROBLEMS IN CAPITAL BUDGETING</b> |  |            |
| <b>Chapter 10</b>   | <b>A Project Is Not a Black Box</b>  | <b>207</b> |
| 10-1  | Sensitivity Analysis<br><i>Value of information / Limits to sensitivity analysis / Examining the project under different scenarios / Break-even analysis</i>   | 207        |
| 10-2  | Monte Carlo Simulation<br><i>Simulating the electric car project / Assessing simulation: You pay for what you get / Misusing simulation</i>  | 215        |

|                   |  |            |
|-------------------|--|------------|
| 10-3              | Decision Trees and Subsequent Decisions<br><i>An example: Vegetron / A tougher example: Magna Charter / Bailing out / Abandonment value and capital budgeting / Pro and con decision trees / Decision trees and Monte Carlo simulation</i>         | 220        |
| 10-4              | Summary  | 228        |
|                   | Further Reading  | 230        |
|                   | Quiz   | 230        |
|                   | Questions and Problems   | 231        |
| <b>Chapter 11</b> | <b>Where Positive Net Present Values Come From</b>   | <b>235</b> |
| 11-1              | Inconsistent Attitudes and Assumptions   | 235        |
| 11-2              | The Problems of Bias and Errors<br><i>Errors in forecasting</i>  | 236        |
| 11-3              | Look First at Market Values  | 237        |
| 11-4              | Forecasting Economic Rents   | 241        |
| 11-5              | Example—Marvin Enterprises Decides to Exploit a New Technology<br><i>Forecasting prices of gargle blasters / The value of Marvin's new expansion / Alternative expansion plans / The value of Marvin stock / The lessons of Marvin Enterprises</i> | 242        |
| 11-6              | Summary  | 248        |
|                   | Further Reading  | 249        |
|                   | Quiz   | 249        |
|                   | Questions and Problems   | 250        |
| <b>Chapter 12</b> | <b>Organizing Capital Expenditure and Evaluating Performance Afterward</b>   | <b>255</b> |
| 12-1              | Capital Budgets and Project Authorizations<br><i>Project authorizations / Bottom-up versus top-down / The decision criteria firms actually use</i>   | 255        |
| 12-2              | Problems and Some Solutions<br><i>Problems of cooperation / Some partial solutions</i>   | 259        |
| 12-3              | Evaluating Performance<br><i>Controlling projects in progress / Postaudits / Problems in measuring incremental cash flows after the fact / Evaluating operating performance / Accounting rate of return as a performance measure</i>               | 262        |
| 12-4              | Example—Measuring the Profitability of the Nodhead Supermarket<br><i>Book earnings versus true earnings / Does ROI give the right answer in the long run?</i>  | 265        |
| 12-5              | What Can We Do about Biases in Accounting Profitability Measures?  | 269        |
| 12-6              | Summary  | 270        |
|                   | Further Reading  | 271        |
|                   | Quiz   | 272        |
|                   | Questions and Problems   | 273        |

## PART FOUR FINANCING DECISIONS AND MARKET EFFICIENCY

|                   |   |            |
|-------------------|---|------------|
| <b>Chapter 13</b> | <b>Corporate Financing and the Six Lessons of Market Efficiency</b>   | <b>279</b> |
| 13-1              | We Always Come Back to NPV<br><i>Differences between investment and financing decisions / Efficient capital markets</i>   | 280        |
| 13-2              | What Is an Efficient Market?<br><i>A startling discovery: Price changes are random / Which was the real Standard &amp; Poor's? / A theory to fit the facts / Three forms of the efficient-market theory / Some misconceptions</i> | 281        |
| 13-3              | The First Lesson of Market Efficiency: Markets Have No Memory   | 289        |
| 13-4              | The Second Lesson of Market Efficiency: Trust Market Prices<br><i>Example: Northwestern Bell's bond repurchase offer</i>  | 290        |
| 13-5              | The Third Lesson of Market Efficiency: There Are No Financial Illusions<br><i>Stock splits and dividends / Calculating abnormal returns / Accounting changes</i>  | 291        |
| 13-6              | The Fourth Lesson of Market Efficiency: The Do-It-Yourself Alternative  | 296        |
| 13-7              | The Fifth Lesson of Market Efficiency: Seen One Stock, Seen Them All  | 296        |
| 13-8              | The Sixth Lesson of Market Efficiency: Reading the Entrails   | 298        |
| 13-9              | Summary   | 298        |
|                   | Further Reading   | 299        |
|                   | Quiz  | 299        |
|                   | Questions and Problems  | 300        |
| <b>Chapter 14</b> | <b>An Overview of Corporate Financing</b>   | <b>303</b> |
| 14-1              | Common Stock<br><i>Definitions / Stockholders' rights</i>   | 303        |
| 14-2              | A First Look at Corporate Debt<br><i>Debt comes in many forms / A debt by any other name</i>  | 306        |
| 14-3              | Preferred Stock   | 308        |
| 14-4              | Convertible Securities  | 309        |
| 14-5              | Variety's the Very Spice of Life<br><i>The process of innovation</i>  | 310        |
| 14-6              | Patterns of Corporate Financing<br><i>Do firms rely too heavily on internal funds? / When do firms need external finance? / Timing debt and equity issues / Dilution fallacies / Has capital structure changed?</i>               | 312        |
| 14-7              | Summary   | 320        |
|                   | Further Reading   | 322        |
|                   | Quiz  | 322        |
|                   | Questions and Problems  | 323        |
| <b>Chapter 15</b> | <b>How Corporations Issue Securities</b>  | <b>325</b> |
| 15-1              | Venture Capital   | 325        |
| 15-2              | The Initial Public Offering<br><i>Arranging a public issue / Pricing a new issue / Costs of a public issue</i>  | 329        |

|  |  |            |
|--|--|------------|
| 15-3   | General Cash Offers by Public Companies<br><i>General cash offers and shelf registration / International security issues / The costs of the general cash offer / Market reaction to stock issues</i>   | 332        |
| 15-4   | The Role of the Underwriter<br><i>Who are the underwriters? / Choosing an underwriter</i>  | 336        |
| 15-5   | The Private Placement  | 340        |
| 15-6   | Summary  | 342        |
|  | Appendix A: The Privileged Subscription or Rights Issue<br><i>How rights issues work / How a rights issue affects the stock price / Issue price is irrelevant as long as the rights are exercised / The choice between the cash offer and the rights issue</i> | 343        |
|  | Appendix B: Marvin's New Issue Prospectus  | 347        |
|  | Further Reading  | 351        |
|  | Quiz   | 352        |
|  | Questions and Problems   | 353        |
| <br><b>PART FIVE DIVIDEND POLICY AND CAPITAL STRUCTURE</b> |  |            |
| <b>Chapter 16</b>  | <b>The Dividend Controversy</b>  | <b>357</b> |
| 16-1   | How Dividends Are Paid<br><i>Some legal limitations on dividends / Dividends come in many forms / Share repurchase</i>   | 358        |
| 16-2   | How Do Companies Decide on Dividend Payments?<br><i>Lintner's model / The information content of dividends</i>   | 360        |
| 16-3   | Controversy about Dividend Policy<br><i>Dividend policy is irrelevant in perfect capital markets / Dividend irrelevance—An illustration / Calculating share price / Share repurchase</i>   | 362        |
| 16-4   | The Rightists<br><i>Do MM ignore risk? / Market imperfections</i>  | 366        |
| 16-5   | Taxes and the Radical Left<br><i>How taxes affect values / Why pay any dividends at all? / Empirical evidence on dividends and taxes / Dividends and capital gains under the 1986 Tax Reform Act</i>   | 369        |
| 16-6   | The Middle-of-the-Roaders  | 374        |
| 16-7   | Summary  | 375        |
|  | Further Reading  | 376        |
|  | Quiz   | 377        |
|  | Questions and Problems   | 378        |
| <b>Chapter 17</b>  | <b>Does Debt Policy Matter?</b>  | <b>383</b> |
| 17-1   | The Effect of Leverage in a Competitive Tax-Free Economy<br><i>Enter Modigliani and Miller / The law of the conservation of value / An example of proposition I</i>  | 384        |
| 17-2   | How Leverage Affects Returns<br><i>Implications of proposition I / Proposition II / The risk-return trade-off</i>  | 390        |

|                   |   |            |
|-------------------|---|------------|
| 17-3              | The Traditional Position<br><i>Two warnings / Rates of return on levered equity—The traditional position / Where to look for violations of MM's propositions / Today's unsatisfied clienteles are probably interested in exotic securities / AT&amp;T's stillborn savings bonds / Imperfections and opportunities</i>   | 393        |
| 17-4              | Summary   | 400        |
|                   | Appendix: MM and the Capital Asset Pricing Model  | 401        |
|                   | Further Reading   | 402        |
|                   | Quiz  | 402        |
|                   | Questions and Problems  | 404        |
| <b>Chapter 18</b> | <b>How Much Should a Firm Borrow?</b>   | <b>407</b> |
| 18-1              | Corporate Taxes<br><i>How do interest tax shields contribute to the value of stockholders' equity? / Recasting Merck's capital structure / MM and taxes</i>   | 408        |
| 18-2              | Corporate and Personal Taxes<br><i>Debt policy when interest and equity income are taxed at the same personal rate / Debt policy when interest is taxed at a higher rate than equity income / Merton Miller's "Debt and Taxes" / Miller's model before and after the 1986 Tax Reform Act / A possible compromise theory?</i>  | 413        |
| 18-3              | Costs of Financial Distress<br><i>Bankruptcy costs / Evidence on bankruptcy costs / Direct versus indirect costs of bankruptcy / Financial distress without bankruptcy / Risk shifting: The first game / Refusing to contribute equity capital: The second game / And three more games, briefly / What the games cost / Costs of distress vary with type of asset</i> | 421        |
| 18-4              | Explaining Financing Choices<br><i>A pecking order theory</i>   | 432        |
| 18-5              | Choosing the Firm's Debt-Equity Ratio<br><i>A checklist / Planning ahead</i>  | 434        |
| 18-6              | Summary   | 436        |
|                   | Further Reading   | 437        |
|                   | Quiz  | 438        |
|                   | Questions and Problems  | 440        |
| <b>Chapter 19</b> | <b>Interactions of Investment and Financing Decisions</b>   | <b>443</b> |
| 19-1              | The Adjusted Present Value Rule<br><i>The base case / Issue costs / Additions to the firm's debt capacity / The value of interest tax shields / Review of the adjusted present value approach</i>   | 444        |
| 19-2              | Adjusted Discount Rates—An Alternative to Adjusted Present Value<br><i>Example: The geothermal project / A general definition of the adjusted cost of capital / What happens when future debt levels are uncertain / How useful are adjusted cost of capital formulas?</i>  | 447        |
| 19-3              | The Weighted Average Cost of Capital Formula<br><i>Now we apply the textbook formula to the geothermal project / Using the textbook formula: An application to the railroad industry / Mistakes people make in using the weighted-average formula</i>   | 451        |

|      |  |     |
|------|--|-----|
| 19-4 | Discounting Safe, Nominal Cash Flows<br><i>A general rule / Some further examples / Adjusted discount rates for debt-equivalent cash flows</i> | 455 |
| 19-5 | Summary  | 459 |

## PART SIX OPTIONS

|                   |   |            |
|-------------------|---|------------|
| <b>Chapter 20</b> | <b>Corporate Liabilities and the Valuation of Options</b>   | <b>469</b> |
| 20-1              | Calls, Puts, and Shares<br><i>Selling calls, puts, and shares</i>   | 471        |
| 20-2              | Holding Calls, Puts, and Shares in Combination<br><i>The difference between safe and risky bonds / Spotting the option</i>  | 474        |
| 20-3              | What Determines Option Values?  | 480        |
| 20-4              | An Option-Valuation Model<br><i>Why discounted cash flow won't work for options / Constructing option equivalents from common stocks and borrowing / The risk-neutral method / Valuing options that last for more than one period / Using the Black-Scholes formula</i> | 484        |
| 20-5              | Summary   | 489        |
|                   | Further Reading   | 490        |
|                   | Quiz  | 490        |
|                   | Questions and Problems  | 492        |
| <b>Chapter 21</b> | <b>Applications of Option Pricing Theory</b>  | <b>495</b> |
| 21-1              | Real Options and the Value of Management<br><i>Timing of capital investment / Follow-on investment opportunities / Real options and the value of management</i>   | 495        |
| 21-2              | Some Practical Problems in Valuing Options<br><i>Valuing the abandonment put—An example / The value of flexibility</i>  | 500        |
| 21-3              | Valuing Options that Last for More Than One Period<br><i>Option values after 6 months / Option value now / Calculating the option delta / The general binomial method</i>   | 503        |
| 21-4              | Some Complications<br><i>European versus American options / Dividends / Currency options</i>  | 506        |
| 21-5              | Hedging and Volatility<br><i>Changing volatility / Transaction costs</i>  | 509        |
| 21-6              | Using Options to Insure Against Risk  | 512        |
| 21-7              | Summary   | 514        |
|                   | Further Readings  | 515        |
|                   | Quiz  | 515        |
|                   | Questions and Problems  | 516        |

|                                      |   |            |
|--------------------------------------|---|------------|
| <b>Chapter 22</b>                    | <b>Warrants and Convertibles</b>  | <b>521</b> |
| 22-1                                 | What Is a Warrant?<br><i>Valuing warrants / Two complications: Dividends and dilution / Example: Valuing United Glue's warrants / How the value of United warrants is affected by dilution / Warrants on bonds</i>    | 521        |
| 22-2                                 | What Is a Convertible Bond?<br><i>Valuing convertible bonds / Dividends and dilution revisited / Forcing conversion</i>   | 527        |
| 22-3                                 | The Difference between Warrants and Convertibles  | 531        |
| 22-4                                 | Why Do Companies Issue Warrants and Convertibles?   | 532        |
| 22-5                                 | Summary   | 534        |
|                                      | Further Reading   | 535        |
|                                      | Quiz  | 536        |
|                                      | Questions and Problems  | 537        |
| <br><b>PART SEVEN DEBT FINANCING</b> |   |            |
| <b>Chapter 23</b>                    | <b>Valuing Risky Debt</b>   | <b>543</b> |
| 23-1                                 | The Classical Theory of Interest<br><i>Real interest rates / Inflation and interest rates</i>   | 544        |
| 23-2                                 | Term Structure and Yields to Maturity<br><i>Yield to maturity / Problems with yield to maturity / Measuring the term structure / Pricing bonds of different maturity</i>  | 547        |
| 23-3                                 | Explaining the Term Structure<br><i>Ms. Long's problem / Mr. Short's problem / The expectations hypothesis / The liquidity-preference theory / Introducing inflation / A comparison of theories of term structure</i> | 553        |
| 23-4                                 | Allowing for the Risk of Default<br><i>Bond ratings / Option pricing and risky debt / Valuing government loan guarantees</i>  | 561        |
| 23-5                                 | Summary   | 568        |
|                                      | Further Reading   | 569        |

|                                      | Questions and Problems  | 572        |
| <b>Chapter 24</b>                    | <b>The Many Different Kinds of Debt</b>   | <b>575</b> |
| 24-1                                 | Domestic Bonds, Foreign Bonds, and Eurobonds  | 576        |
| 24-2                                 | The Bond Contract<br><i>Indenture, or trust deed / The bond terms / Registered and bearer bonds</i>   | 577        |
| 24-3                                 | Security and Seniority  | 579        |
| 24-4                                 | Repayment Provisions<br><i>Sinking funds / Call provisions / Extendable and retractable bonds</i>   | 581        |
| 24-5                                 | Restrictive Covenants<br><i>Positive covenants</i>  | 583        |
| 24-6                                 | Innovation in the Bond Market<br><i>The causes of innovation / The gains from innovation / Lasting innovations</i>  | 586        |
| 24-7                                 | Summary   | 589        |

|   |            |
|---|------------|
| Appendix A: Excerpts from a Prospectus for a Bond Issue   | 591        |
| Appendix B: Project Finance   | 600        |
| <i>An example from the oil industry / Project finance—Some common features / The benefits of project finance</i>  |            |
| Further Reading   | 603        |
| Quiz  | 603        |
| Questions and Problems  | 604        |
| <b>Chapter 25 Hedging Financial Risk</b>  | <b>607</b> |
| 25-1 The Technique of Hedging   | 609        |
| 25-2 Duration and Volatility  | 611        |
| <i>Example and some refinements</i>   |            |
| 25-3 Hedging with Futures   | 614        |
| <i>Commodity and financial futures / The mechanics of futures trading / Spot and futures prices—Financial futures / Spot and futures prices—Commodities</i> |            |
| 25-4 Forward contracts  | 618        |
| <i>Homemade forward contracts</i>   |            |
| 25-5 Swaps  | 620        |
| 25-6 Summary  | 621        |
| Further Reading   | 622        |
| Quiz  | 622        |
| Questions and Problems  | 623        |
| <b>Chapter 26 Leasing</b>   | <b>629</b> |
| 26-1 What Is a Lease?   | 629        |
| <i>Example of a financial lease / Who really owns the leased asset? / Leasing and the Internal Revenue Service / Leasing and the accountants</i>            |            |
| 26-2 Why Lease?   | 634        |
| <i>Sensible reasons for leasing / Some dubious reasons for leasing</i>  |            |
| 26-3 Valuing Financial Leases   | 637        |
| <i>A first pass at valuing a lease contract / Why leasing would make Greymare's shareholders worse off / The story so far</i>                               |            |
| 26-4 When Does Leasing Pay?   | 640        |
| 26-5 Evaluating a Large, Leveraged Lease  | 641        |
| 26-6 Summary  | 643        |
| Further Reading   | 644        |
| Quiz  | 645        |
| Questions and Problems  | 646        |

## PART EIGHT FINANCIAL PLANNING

|   |            |
|---|------------|
| <b>Chapter 27 Analyzing Financial Performance</b>   | <b>651</b> |
| 27-1 Financial Ratios   | 651        |
| <i>Leverage ratios / Liquidity ratios / Profitability, or efficiency ratios / Market value ratios / Accounting definitions / Choosing a benchmark / Which financial ratios?</i> |            |

|                   |  |            |
|-------------------|--|------------|
| 27-2              | The Earnings Record<br><i>The meaning of accounting earnings / How inflation affects book returns</i>  | 664        |
| 27-3              | Applications of Financial Analysis<br><i>Using financial ratios to estimate market risk / Using financial ratios to predict bond ratings</i>                                     | 669        |
| 27-4              | Summary  | 672        |
|                   | Further Reading  | 672        |
|                   | Quiz   | 673        |
|                   | Questions and Problems   | 675        |
| <b>Chapter 28</b> | <b>Approaches to Financial Planning</b>  | <b>679</b> |
| 28-1              | What Is Financial Planning?<br><i>Financial planning focuses on the big picture / Financial planning is not just forecasting / Financial planning is a communal activity</i>     | 679        |
| 28-2              | The Contents of a Completed Financial Plan<br><i>Planned financing / Three requirements for effective planning / Financial planning as managing a portfolio of options</i>       | 681        |
| 28-3              | Financial Planning Models<br><i>Executive Fruit's financial model / Pitfalls in model design / There is no finance in corporate financial models</i>                             | 685        |
| 28-4              | Summary  | 690        |
|                   | Appendix: LONGER   | 691        |
|                   | <i>Example / Extending the model / Comparison of LONGER with the typical corporate planning model / Shadow prices, or marginal costs</i>   |            |
|                   | Further Reading  | 698        |
|                   | Quiz   | 698        |
|                   | Questions and Problems   | 699        |
| <b>Chapter 29</b> | <b>Short-Term Financial Planning</b>   | <b>701</b> |
| 29-1              | The Components of Working Capital  | 702        |
| 29-2              | Links between Long-Term and Short-Term Financing Decisions<br><i>Matching maturities / Permanent working-capital requirements / The comforts of surplus cash</i>                 | 703        |
| 29-3              | Tracing Changes in Cash and Working Capital<br><i>Tracing changes in net working capital / Profits and cash flow</i>   | 705        |
| 29-4              | Cash Budgeting<br><i>Preparing the cash budget: Inflow / Preparing the cash budget: Outflow</i>  | 710        |
| 29-5              | The Short-Term Financing Plan<br><i>Options for short-term financing / The first financing plan / The second financing plan / A note on short-term financial planning models</i> | 713        |
| 29-6              | Summary  | 719        |
|                   | Further Reading  | 720        |
|                   | Quiz   | 720        |
