Pseudo-periodic Maps and Degeneration of Riemann Surfaces

Springer

Contents

Part I Conjugacy Classification of Pseudo-periodic Mapping Classes

1 Pseudo-periodic Maps 3
1.1 Basic Definitions 3
1.2 Nielsen's Results on Pseudo-periodic Maps 6

2 Standard Form 17
2.1 Definitions and Main Theorem of Chap. 2 17
2.2 Periodic Part 20
2.3 Non-amphidrome Annuli 20
2.4 Amphidrome Annuli 35
2.5 Proof of Theorem 2.1 47

3 Generalized Quotient 53
3.1 Definitions and Main Theorem of Chap. 3 53
3.2 Proof of Theorem 3.1 60
3.3 Quotient of $(\mathscr{B}', f|\mathscr{B}')$ 61
3.4 Re-normalization of a Rotation 61
3.5 Re-normalization of a Linear Twist 71
3.6 Re-normalization of a Special Twist 83
3.7 Completion of Theorem 3.1. (Existence) 91

4 Uniqueness of Minimal Quotient 93
4.1 Main Theorem of Chap. 4 93
4.2 Structure of π^{-1}(arch) 97
4.3 Structure of π^{-1}(tail) 103
4.4 Structure of π^{-1}(body) 107
4.5 Completion of the Proof of Theorem 4.1. (Uniqueness) 113
4.6 General Definition of Minimal Quotient 118
4.7 Conjugacy Invariance 119

5 A Theorem in Elementary Number Theory 131
5.1 Proof of Theorem 5.1. (Uniqueness) 132
5.2 Proof of Theorem 5.1. (Existence) 135

6 Conjugacy Invariants 145
6.1 Partition Graphs 149
6.2 Weighted Graphs 151
6.3 Completion of the Proof of Theorem 6.1 162
6.4 Weighted Cohomology 164

Part II The Topology of Degeneration of Riemann Surfaces

7 Topological Monodromy 173
7.1 Proof of Theorem 7.1 175
7.2 Construction of Δ and $\{N_i\}_{i=1}^{s}$ 176
7.3 The Decomposition $F_\xi = A_\xi \cup B_\xi$ 177
7.4 Construction of a Monodromy Homeomorphism 177
7.5 Negativity of Screw Numbers 181
7.6 Completion of the Proof of Theorem 7.1 185

8 Blowing Down Is a Topological Operation 189

9 Singular Open-Book 199
9.1 Completion of the Proof of Theorem 7.2 211
9.2 Characterization of the Triples (S, Y, c) That Come from Pseudo-periodic Maps 213
9.3 Completion of the Proof of Theorem 9.2 218
9.4 Concluding Remark 220

A Periodic Maps Which Are Homotopic 221
