

TRANSPORTATION PLANNING MODELS

proceedings of the course given at
The International Center for Transportation Studies (ICTS)
Amalfi, Italy – October 11–16, 1982

the course was sponsored by:
THE INTERNATIONAL CENTER FOR
TRANSPORTATION STUDIES (ICTS)
THE ITALIAN NATIONAL RESEARCH COUNCIL,
SPECIAL PROJECT ON TRANSPORTATION RESEARCH

Edited by
Michael Florian
Centre de Recherche sur les Transports
Université de Montréal
Montréal, Canada

and

Director of ICTS
School of Analysis of Transportation Planning

1984

TECHNISCHE HOCHSCHULE DARMSTADT	
Fachbereich 11	
Gesamtbibliothek	
Betriebswirtschaftslehre	
Inventar-Nr. :	37.117
Abstell-Nr. :	A 14/1049
Sachgebiete :	1.6.8.4

NORTH-HOLLAND
AMSTERDAM • NEW YORK • OXFORD

CONTENTS

Preface	v
CHAPTER I:	
TRANSPORTATION DEMAND MODELS	
Recent Advances in Disaggregate Demand Modelling S.R. Lerman	3
The Application of Disaggregate Choice Models to Travel Demand Forecasting: Issues and Methods F.S. Koppelman	19
Functional Form and Stochastic Specifications: Current Applications to Aggregate Time-Series and Cross-Sectional Travel Demand Models M.J.I. Gaudry	61
The Calibration and Application of Travel Demand Models in Sweden S. Algers	79
The Structure of Random Utility Models in the Light of the Asymptotic Theory of Extremes G. Leonardi	107
CHAPTER II:	
TRANSPORTATION NETWORK ANALYSIS AND DESIGN MODELS	
An Introduction to Network Models used in Transportation Planning M. Florian	137
Models and Algorithms for Predicting Urban Traffic Equilibria T.L. Magnanti	153

Introduction and Recent Advances in Network Design: Models and Algorithms R.T. Wong	187
Shortest Path Methods in Transportation Models G. Gallo and S. Pallottino	227
Practical and Theoretical Aspects of Aggregation Problems in Transportation Planning Models D.W. Hearn	257
Rail Analysis Interactive Language (RAIL): A Decision Support System E.R. Petersen	289
Interactive Graphic Railway Planning Models K.-D. Wiegand	347
 CHAPTER III: MODELS FOR ESTIMATING ORIGIN/DESTINATION MATRICES	
Estimating Origin–Destination Matrices from Observed Flows S. Nguyen	363
 CHAPTER IV: TRANSPORTATION ROUTING AND CREW SCHEDULING MODELS	
Introduction to and Recent Advances in Vehicle Routing Methods B.L. Golden	383
The Local Delivery Problem: Algorithms and Applications M.L. Fisher and R. Jaikumar	419
Crew Scheduling Methods in the Operation and Planning of Transportation Systems J.-M. Rousseau	439
 CHAPTER V: MODELS OF TRANSPORTATION/LAND USE INTERACTIONS	
Network Models in Transportation/Land Use Planning D.E. Boyce	475

Land Use-Transport Planning Models	
B.G. Hutchinson	

499
