The Economics of Made-to-Order Production

Theory with Applications
Related to the Airframe Industry

00227223

Springer-Verlag
Berlin Heidelberg New York Tokyo

TECHNISCHE HOCHSCHULE DARMSTADT

Fachbereich 1

Gesamtbibliothek

Betriebswirtschaftslehre

Inventar-Nr. : 37.610

Abstell-Nr. : A25/544

Sachgebiete: 1.69.1.1
4.1

TABLE OF CONTENTS

I	Introduction	1
	Statement of the Learning Augmented Economic Planning Problem	3
	Scope and Methodology	4
II	Historical Perspective	7
	The Origins of the Learning Curve	8
	Linking the Progress Function with Economic Theory	10
	Early Solutions for the Learning Augmented Planning Problem	16
III	Recent Results in the Analysis of Made-to-Order Production	20
	General Theoretical Results	20
	Profit Maximization	21
	Cost Minimization	22
	Revenue Maximization	23
	Comments	23
	A Refinement of Alchian's Propositions	23
	A Basic Model for Learning Augmented Production Analysis	26
	The Basic Model with a Variable Delivery Schedule	31
	The Production Situation	33
	The Planning Situation	35
	A Constant Workforce Policy	38
	Summary	39
	The Importance of the Theoretical Framework	39
IV	Model Applications in the Airframe Industry	41
	Application to the C141 Airframe Program	41
	Production Cost Drivers	42
	The C141 Model	43
	Empirical Results	51
	Sensitivity Analyses	52
	Model Modifications and Extensions	56
	Sensitivity Analyses	60
	Application to the F4 Airframe Program	63
	Summary	65

V	Two Production Function Model	66
	The Model Formulation and Solution	66
	Strategy for Application	74
	Sensitivity Analyses	76
	Application to the F102 Airframe Program	82
	Estimation and Results	85
	Summary	86
VI	Discrete Dynamic Cost Models	89
	A Dynamic Programming Model for Made-to-Order Production	93
	Simulations with the Dynamic Programming Model	97
	A Second Dynamic Programming Model for Made-to-Order Production	100
	A Third Dynamic Programming Model for Made-to-Order Production	105
	Relationships Among the Three Models	108
	A Limiting Case	110
	A Transformation	112
	An Application of a Discrete Dynamic Model	113
	Summary	117
VII	Empirical Production Rate Assessment Models	118
	Estimating Cost Impacts	118
	Contractor Behavior	120
	Summary	123
VIII	Summary and Conclusions	125
	Appendix	127
	Bibliography	130
