

MANAGEMENT-ORIENTED MANAGEMENT INFORMATION SYSTEMS

JEROME KANTER

Honeywell Information Systems

Prentice-Hall, Inc., Englewood Cliffs, New Jersey

CONTENTS

<i>Chapter 1</i>	MIS—AN ANALYTICAL FRAMEWORK	1
	Elements of a Management Information System	2
	Levels of Management	2
	Top Management	2
	Middle Management	4
	Operating Management	5
	Distinction Between Management Levels	6
	Types of Management Information	10
	Business Dimension of Information	11
	Technical Dimension of Information	12
	The System Element	13
	Distinction Between Physical and Information System	14
	Functional Systems—The Horizontal Dimension	16
	Design and Analysis of Systems—The Vertical Dimension	18
	Total Systems and Integrated Systems	20

Characteristics of MIS 21

1. Management-oriented 21
2. Management-directed 21
3. Integrated 22
4. Common data flows 22
5. Heavy planning element 23
6. Subsystem concept 23
7. Central data base 23
8. Computerized 24

Summary 24

Chapter 2 THE STATE OF THE ART; COMPUTERS AND MIS 28

A Quantitative View of the EDP Industry 28

The Changing Dimensions of the EDP Industry 31

**Dimensioning the Market by Computer Size and
Industry Share 32**

Other Quantitative Indicators 32

Qualitative View of EDP Usage 34

Environment for MIS Development 36

Case Study of A Computer User Through Three Generations 38

Summary of Forman's Experience 40

1. Lack of Management Involvement 41
2. The EDP People Problem 41
3. The Conversion Requirement 41
4. Absence of a Comprehensive EDP Plan 41

Summary 42

Chapter 3 FUNCTIONAL SUBSYSTEMS—THE HORIZONTAL DIMENSION 45

Horizontal Information System Model 46

**Information System Model and the Horizontal Subsystems
in a MIS 52**

Integration and Interrelationships of Subsystems 52

Implementation Considerations 55

Relationship of Physical Systems with Information Systems 56

Priority Analysis in Selection of Subsystems 57

Time Frame and Phasing Plan	59
Central Data Base Requirements	60
Manufacturing Information System Model	64
Subsystem Classification	66
Summary	71

**Chapter 4 DEVELOPMENT AND IMPLEMENTATION OF SUBSYSTEMS—
THE VERTICAL DIMENSION 76**

Feasibility	79
Feasibility Criteria	79
Return on Investment Analysis	84
Marginal Value of Information	86
Application Business Plan	89
The System Study	92
• Business objectives	93
• Business strategies	93
• Business system objectives	95
• Subsystem objectives	95
• Priority analysis	95
• Input/output processing analysis	95
• System specification	95
System Design	98
Resource Utilization	99
Implementation	102
Summary	103

ADDENDUM 1 System Specification— Order Processing Subsystem	104
Section 1—System Description	104
Section 2—System Objectives	104
Section 3—General Flow Chart	105
Section 4—Input/Output Requirements	105
Section 5—File Considerations	106
Section 6—Volume and Other Specifics	106
Section 7—Complementary Subsystems	108
Section 8—Cost and Other Ground Rules	109

ADDENDUM 2 Systems Considerations in MIS— A Case Study	110
---	-----

Chapter 5 THE TECHNOLOGICAL FOUNDATION OF MIS 135

Introduction 135

Definition of Computer Technology 136

Hardware Elements 137

Central processors 139

Peripheral devices 140

Terminal devices 142

Source data collection devices 142

System and Application Software Elements 143

System software 143

Business application software 144

Scientific application software 145

Support Services Elements 146

Computer Time 146

Support 147

Application services 148

Supplies 149

Central Data Base Hardware and Software 149

Data base hardware 149

Data base software 152

File structure 154

Data base languages 156

Communication Hardware and Software 158

Communication hardware 159

Direct access inquiry/response 160

Direct access on-line processing 161

Communication software 162

Design considerations in a communication system 164

Scientific And Business Application Software 166

Scientific software aids 166

General business application software 170

Summary 173

Chapter 6 THE EFFECT OF MIS ON MANAGEMENT AND THE MANAGEMENT PROCESS 177

Introduction 177

Two Points of View on the Impact of MIS 177

Effect of MIS on Top Management 180

1. Identity Areas of Improvement 181
2. Analyze These Areas 181
3. Develop Alternate Solutions 181
4. Evaluate Alternate Solutions 181
5. Make The Decision 182
6. Implement the Decision 182

**Reasons for Limited MIS Impact on Top Management
Decision Making 183**

- Unstructured Nature of Data 184
- Management Science Techniques 184
- The Element of Intuition 185
- Computerized Decision Making by the
Leading Edge 185
- Making Decisions Under Conditions
of Uncertainty 188
- The Keyed-in Top Executive 190
- Impact of MIS on Middle and Operating
Management 192
- The Management Process 193
- Effect of a MIS on Operating Management 197
- Impact of Computers on Organizational Structure 200

Summary 203

Chapter 7 MANAGEMENT INVOLVEMENT AND INFLUENCE IN MIS 210

Management's Role in System Development 211

Issues of Importance to MIS Professionals 214

Establishing the Proper Involvement Level 215

Direct EDP Participation 217

Indirect EDP Participation 218

Management Education and Training 220

- EDP education in schools 220
- Internal on-site company training 224
- External training 225

EDP Education Matrix 226

Operating Personnel and EDP Personnel—the Conflict 228

Reasons for EDP/User Conflict 229

- The place of EDP in the organization 230
- EDP viewed as a threat 230

Broad charter of EDP	231
Distorted viewpoint concerning EDP	231
Track record of EDP	231
Motivation and aspirations	232
Language and communications	232
EDP—immune to control	232

Alleviating the Conflict 233

Establish consistent performance and work criteria for EDP	233
Rotation of EDP/user personnel	234
Education and training	234
Plan inter-area activities	234
Place EDP in proper organizational position	235

Summary 235

Chapter 8 THE FUTURE OF COMPUTERIZED INFORMATION SYSTEMS—THE GENERATION BEYOND 241

The Next Generation's Management Information System 242

Sales Forecasting and Market Analysis 242

Sales Order Processing and Distribution 243

Engineering 244

Production 244

Administration 246

Management Planning 246

Trends in Information Processing 247

1. Advanced applications 248
2. Systematic, logical growth 250
3. Reduced system implementation cycle 251
4. Economical, efficient operation 252

The Planning Process for Tomorrow's Computer Systems 253

Sociological Considerations 256

Summary 260

INDEX 265
