

**FATIGUE LIFE PREDICTION  
OF WELDED JOINTS  
USING FRACTURE MECHANICS**

**by**

**KENTARO YAMADA<sup>1)</sup> & HENNING AGERSKOV<sup>2)</sup>**

## CONTENTS

### SYNOPSIS

Page

2

1. FATIGUE CRACK PROPAGATION ANALYSIS USING FRACTURE MECHANICS	3
1.1. Introduction	3
1.2. Fracture Mechanics Approach	3
1.3. Computer Program VARFAT	7
1.4. Examples	8
1.5. Summary	10
2. FATIGUE CRACK PROPAGATION ANALYSIS OF TENSILE SPECIMENS	12
2.1. Introduction	12
2.2. Stress Intensity Factor Expression	13
2.3. Fatigue Crack Propagation Due to Constant Amplitude Stress Variations	17
2.4. Fatigue Crack Propagation Due to Variable Amplitude Stress Variations	20
2.5. Summary	25
3. PREDICTION OF FATIGUE CRACK PROPAGATION LIFE OF TUBULAR JOINTS IN BENDING	27
3.1. Introduction	27
3.2. Fatigue Behaviour of Tubular Joints in Bending	29
3.3. Stress Intensity Factor	38
3.4. Analytical Results	41
3.5. Summary	47
ACKNOWLEDGEMENTS	49
REFERENCES	50
APPENDIX I: COMPUTER PROGRAM VARFAT	51
I.1. Main Program and Subroutines	51
I.2. Input data	52
