TABLE OF CONTENTS

INTRODUCTION 13

1.1 The Capital Structure Problem 13

1.2 Features of Debt and Equity 17
1.2.1 Payout Structure and Voting Rights 18
1.2.2 Bankruptcy and Reputation 21

1.3 Theories of Capital Structure 23
1.3.1 Agency 24
1.3.2 Asymmetric Information 32
1.3.3 Corporate Control 35
1.3.4 Industrial Organization 36
1.3.5 Incomplete Contracts 41

1.4 Corporate Governance Mechanisms 45
1.4.1 Internal Mechanisms 47
1.4.2 External Mechanisms 50

1.5 Scope of the Book 56

CAPITAL STRUCTURE AS AN INCENTIVE DEVICE FOR A WEALTH CONSTRAINED MANAGEMENT 59

2.1 Introduction 59

2.2 The Model 63
2.2.1 General Framework 63
2.2.2 Some Remarks on the Driving Assumptions of the Analysis 68

2.3 Analysis of the Model 70
2.3.1 Bank Participation and Interest Rate $r(D)$ 70
2.3.2 Investor's Payoff and Maximization Problem 72
2.3.3 The Optimal Incentive Scheme 76

2.4 Graphical Analysis 82

2.5 A Numerical Example 86

2.6 Conclusion 90

2.7 Appendix 92
2.7.1 Interest Behavior in Debt 92
2.7.2 Lagrangian and Kuhn-Tucker Conditions for Investor's Maximization Problem 94
2.7.3 Uniqueness of the Optimal Incentive Scheme 97

CAPITAL STRUCTURE AND THE CORPORATE GOVERNANCE ROLE OF BANKS 103

3.1 Introduction 103

3.2 The Model 105

3.3 On the Bank's Role in the Model 110

3.4 The Sequence of Decision Problems 112
3.4.1 The Management 112
3.4.2 The Bank 113
3.4.3 The Investor 116

3.5 Analysis of the Model 118
3.5.1 Step 1: Minimization of Expected Wage Payments 118
3.5.2 Step 2: Implementation of b given $(u_0^*(b), u_1^*(b))$ 120

3.6 Bank Corporate Control vs. Monetary Incentives 126

3.7 Conclusion 128

3.8 Appendix 130
3.8.1 Lagrangian and FOCs 130
3.8.2 Existence of an Optimal Vector (u_0^*, u_1^*) 130
3.8.3 Monotonicity of (u_0^*, u_1^*) 132
3.8.4 Uniqueness of (u_0^*, u_1^*) given $b \in B$ 132
3.8.5 Interest Rate Behavior in D 132
3.8.6 Existence of an Optimal Debt Level for Implementation of b 134

CAPITAL STRUCTURE, FINANCIAL SIGNALING AND PRODUCT MARKET COMPETITION 135

4.1 Introduction 135

4.2 The Model 138
4.2.1 Framework and Timing 138
4.2.2 Firm Behavior in the Continuation Game 143
4.2.3 Interest Rate and Payoff to Firm Stakeholders 144
4.2.4 The Model in the Class of Signaling Games 146

4.3 Equilibrium Analysis 149
4.3.1 Firm Strategies 149
4.3.2 Perfect Bayesian Equilibria 150

4.4 Equilibrium Refinement 162
4.4.1 On the Multiplicity of Equilibria 162
4.4.2 The Refinement Criterion 164
4.4.3 Reducing the Number of Separating Equilibria 165

4.5 Interaction Between Markets 167

4.6 Conclusion 169

4.7 Appendix 170
4.7.1 Cournot Interaction for Exogenous Beliefs 170
4.7.2 General Properties of the Game 173
4.7.3 A Modified Version of the Spence-Mirrlees Condition 175

CONCLUDING REMARKS 180

BIBLIOGRAPHY 187
