

ENVIRONMENTAL SOIL SCIENCE

THIRD EDITION

CONTENTS

Preface to the Third Edition	xxi
Preface to the Second Edition	xxix
Preface to the First Edition	xxxv
 Chapter 1 SOILS AND THE ENVIRONMENT	 1
1.1 The Birth of Environmental Soil Science	1
1.2 Concept of Environmental Science	2
1.3 Concept of Ecology	4
1.4 Definition and Concept of Soils	5
1.5 Pedologic Concept of Soils	7
1.5.1 Soil Profile and Pedon	7
1.5.2 Master Horizons and Diagnostic Epipedons	10
1.6 Soil Orders	13
1.6.1 Entisols	15
1.6.2 Gelisols	16
1.6.3 Inceptisols	17
1.6.4 Mollisols	18
1.6.5 Spodosols	19
1.6.6 Alfisols	20
1.6.7 Ultisols	21
1.6.8 Oxisols	22
1.6.9 Aridisols	24
1.6.10 Vertisols	25
1.6.11 Andisols	26
1.6.12 Histosols	30
1.7 Relation of Soil Orders with the Environment	31
	 xi

1.7.1	Latitudinal Distribution of Zonal Soils	31
1.7.2	Altitudinal Distribution of Zonal Soils	33
1.7.3	Effect of Global Warming	35
Chapter 2 INORGANIC SOIL CONSTITUENTS		37
2.1	Soil Composition	37
2.2	Inorganic Constituents	40
2.3	Mineral Composition	41
2.4	Primary Minerals	44
2.4.1	Quartz	44
2.4.2	Feldspars	46
2.4.3	Mica	47
2.4.4	Ferromagnesians	48
2.4.5	Magnesium Silicates	49
2.4.6	Phosphate Minerals	50
2.4.7	Carbonates	51
2.5	Weathering of Primary Minerals	53
2.5.1	Concepts of Weathering	53
2.5.2	Environmental Significance of Weathering	54
2.5.3	Abiotic Weathering of Primary Minerals	55
2.5.4	Biological Weathering	60
2.5.5	Space Weathering	65
2.5.6	Environmental Factors in Weathering	66
2.5.7	Physical Properties of the Minerals	68
2.5.8	Chemical Characteristics and Crystal Chemistry	70
2.5.9	Saturation of the Environment	71
2.6	Secondary Minerals	71
2.6.1	Major Types of Secondary Minerals	73
2.6.2	Weathering of Secondary Minerals	89
Chapter 3 ORGANIC SOIL CONSTITUENTS		93
3/1	Soil Organic Matter	93
3.1.1	Beneficial Effects of Soil Organic Matter	95
3.1.2	Allelopathy	96

Contents	xiii
3.2 Humus	98
3.2.1 Environmental Significance of Humus	100
3.3 Soil Biomass	101
3.3.1 Macrofaunae	102
3.3.2 Microfaunae	106
3.3.3 Macroflorae	110
3.3.4 Microflorae	113
3.4 Biochemical Reactions of Soil Microorganisms	125
3.4.1 Carbon Cycle	126
3.4.2 Decomposition and Mineralization	126
3.4.3 Nitrogen Cycle	129
3.4.4 Nitrogen Fixation	130
3.4.5 Ammonification	134
3.4.6 Nitrification	136
3.4.7 Denitrification	138
3.4.8 Chemodenitrification	139
3.4.9 Assimilatory Denitrification	140
3.4.10 Immobilization	140
3.5 Nonhumified Organic Matter	141
3.5.1 Carbohydrates	141
3.5.2 Amino Acids and Protein	146
3.5.3 Lipids	148
3.5.4 Nucleic Acids	149
3.5.5 Lignin	150
3.5.6 Organic Acids	152
3.6 Humified Organic Matter	153
3.6.1 Types of Humic Matter	154
3.6.2 Chemical Composition	155
3.6.3 Chemical Reactions	156
3.6.4 Spectral Characteristics	157
3.6.5 Effect of Humic Matter on Soils and the Environment	160
Chapter 4 GAS PHASE IN SOILS	163
4.1 Soil Air	163
4.2 Soil Aeration	166

4.2.1	The Controversy of Aeration in the Environment	167
4.3	Soil Air Quality in Agriculture	169
4.3.1	Variations of Air Quality in Soils	169
4.3.2	Methods of Determination for Soil Air Quality	170
4.4	Biochemical Effect of Aeration	173
4.4.1	Biochemistry in Aerobic Conditions and Its Role in Environmental Quality	173
4.4.2	Biochemistry in Anaerobic Conditions and Its Role on Environmental Quality	176
4.4.3	Anaerobic Decomposition of Organic Matter and Its Effect on Environmental Quality	177
4.5	Biological Effect of Aeration	179
4.5.1	Effect on Plant Growth	179
4.5.2	Water Uptake	184
4.5.3	Nutrient Uptake	185
4.5.4	Microorganisms	185
4.6	Chemical Effect of Aeration	186
Chapter 5	LIQUID PHASE	189
5.1	The Concept of Solutions	189
5.2	Types of Water in Soil	189
5.3	The Soil Solution	191
5.3.1	Forces Attracting Water in Soils	191
5.3.2	Soil Moisture Constants	194
5.3.3	Physical Classification of Soil Moisture	196
5.3.4	Biological Classification of Soil Moisture	196
5.3.5	Environmental Significance of Soil Moisture Constants	197
5.4	Movement of Soil Water	198
5.4.1	Movement of Liquid Water	198
5.4.2	Unsaturated Flow	199
5.4.3	Saturated Flow	200
5.4.4	Movement of Water as Water Vapor	202
5.4.5	Environmental Significance of Water Movement	203

5.5	Water Losses	204
5.5.1	Vapor Loss	205
5.5.2	Mulch in Control of Vapor Loss	206
5.5.3	Liquid Loss	207
5.5.4	Control of Loss of Water in the Form of Liquid	208
5.6	Dissolved Solid Substances	209
5.6.1	Aluminum	209
5.6.2	Iron	213
5.6.3	Silicon	215
5.6.4	Nitrogen	221
5.6.5	Phosphorus	224
5.6.6	Sodium and Potassium	226
5.6.7	Calcium	228
5.6.8	Magnesium	229
5.6.9	Sulfur	230
5.6.10	Manganese	231
5.6.11	Soil Colloids	232
5.7	Environmental Issues of Soil Solutes	237
5.7.1	Eutrophication	238
5.7.2	Oligotrophication	240
5.7.3	Dystrophication	241
5.8	Dissolved Gas	242
5.8.1	Henry's Law	242
5.8.2	Dissolved CO ₂ Gas	243
5.8.3	Dissolved Oxygen	245
5.8.4	Environmental Significance of Dissolved Oxygen	246
5.9	Oxygen Demand	248
5.9.1	Environmental Significance of BOD	248
Chapter 6 SOIL PHYSICS IN THE ENVIRONMENT		251
6.1	Physical Properties	251
6.2	Particle Size Distribution	253
6.2.1	Soil Separates	253
6.2.2	Soil Texture	254
6.2.3	Soil Classes	256

6.2.4	Environmental Significance of Soil Texture	257
6.3	Soil Structure	261
6.3.1	Types of Soil Structure	261
6.3.2	Environmental Significance of Soil Structure	263
6.4	Soil Density and Soil Porosity	267
6.4.1	Bulk Density	267
6.4.2	Particle Density	268
6.4.3	Pore Spaces	269
6.4.4	Environmental Significance of Soil Density and Soil Porosity	270
6.5	Soil Consistence	271
6.5.1	Types of Soil Consistence	271
6.5.2	Atterberg's Plasticity Index	272
6.5.3	Environmental Significance of Consistence	274
6.6	Thermal Properties of Soils	275
6.6.1	Soil Temperature	276
6.6.2	Heat Capacity of Soil	277
6.6.3	Thermal Conductivity	278
6.6.4	Thermal Diffusivity	279
6.6.5	Significance of Environmental Factors for Soil Temperature	280
6.7	The Issue of Soil Physics in Histosols	280
Chapter 7	ELECTROCHEMICAL PROPERTIES OF SOLID CONSTITUENTS	283
7.1	Electrical Charges	283
7.2	Soil Clays	284
7.2.1	Isomorphous Substitution and Permanent Negative Charges	284
7.2.2	Isomorphous Substitution and Permanent Positive Charges	286
7.2.3	Dissociation of Exposed Hydroxyl Groups	287
7.2.4	Protonation of Exposed Hydroxyl Groups	288
7.2.5	Zero Point of Charge	288
7.2.6	Electric Double Layers in the Environment	290
7.2.7	Cation Exchange Capacity of Soils	292

7.2.8	Environmental Importance of Soil Cation Exchange	294
7.2.9	Cation Exchange Capacity of Plants	297
7.3	Anion Exchange Capacity	298
7.3.1	Negative Adsorption	299
7.3.2	Positive Adsorption	299
7.3.3	Specific Adsorption	300
7.3.4	Environmental Significance of Anion Exchange	301
7.4	Soil Organic Matter	302
7.4.1	Amino Acids	303
7.4.2	Environmental Significance of Amino Acids	305
7.4.3	Humic Matter	305
7.4.4	Environmental Significance of Humic Matter	307
7.5	Soil Reaction	310
7.5.1	Concept of Soil Reaction	310
7.5.2	Types of Soil Reactions	311
7.5.3	Sources and Types of Soil Acidity	313
7.5.4	Effect of Soil Reaction on Plant Growth	314
7.6	The Aesthetic Issue of Induced Micronutrient Toxicity and Deficiency	316
Chapter 8	SOILS AND CROP PRODUCTION	317
8.1	Clearing New Lands	318
8.1.1	Deforestation	318
8.1.2	Opening New Lands for Crop Production	319
8.1.3	Nutrient Cycling or Biogeochemical Cycling	321
8.2	Soil Degradation and the Issue of Retrogression	324
8.2.1	Physical Degradation	325
8.2.2	Chemical Degradation	327
8.2.3	Biological Degradation	330
8.3	Environmental Changes	332
8.3.1	Regional Climatic Changes	333
8.3.2	Effect of Increased CO ₂ Emission	335
8.4	The Issue of Biodiversity	336
8.4.1	Terrestrial Biodiversity	337
8.4.2	Marine Biodiversity	338

8.5	Plantation Agriculture and Agroforestry	343
8.5.1	Agroforestry	347
8.6	Intensifying Soil Productivity	348
8.6.1	Green Revolution	349
8.6.2	Hybrid Corn	351
8.6.3	Use of Fertilizers	352
8.7	Residue, No-Till, and Strip-Till Farming	355
8.8	Organic Farming	357
8.9	LISA or Low-Input Sustainable Agriculture	360
Chapter 9 SOILLESS AGRICULTURE		363
9.1	Hydroponics	363
9.1.1	Water Requirements	364
9.1.2	Nutrient Solutions	365
9.1.3	The Issue of Crop Yield	368
9.1.4	Significance in Food Production	369
9.2	Hydroponic Cultivation of Algae	370
9.2.1	Cultivation of Kelp	372
9.2.2	Cultivation of Spirulina	373
9.3	Aeroponics	373
9.4	Nutrient Film Technique	376
9.5	Artificial Soil	376
9.5.1	Orchid Medium	378
9.6	Aquaculture	379
9.6.1	Freshwater Aquaculture	381
9.6.2	Marine Aquaculture	387
9.7	Aquaculture in the United States	391
9.7.1	Salmon Ranching	391
9.6.2	Channel Catfish Farming	393
9.8	The Law of the Sea	396
Chapter 10 BIOTECHNOLOGY IN SOIL SCIENCE AND AGRICULTURE		397
10.1	Definitions and Concepts	397
10.2	Food Biotechnology	400
10.2.1	Production of Fermented Food	400

Contents	xix
10.2.2 Production of Beer and Light Beer	402
10.2.3 Production of Food Additives and Sweeteners	402
10.2.4 Production of Ethnic Food	404
10.3 Agricultural Biotechnology	407
10.3.1 Crop Production	407
10.3.2 The Issue of Golden Rice	408
10.3.3 The Issue of Flavr Savr Tomato	409
10.3.4 The Issue of Roundup Ready Plants	410
10.3.5 The Issue of Safety in Biotech Products	411
10.3.6 Environmentally Friendly Pesticides	413
10.4 Tissue Culture	414
10.4.1 Nutrient Solutions	414
10.4.2 Meristem Culture or Cloning	415
10.5 Environmental Significance of Tissue Cultures	416
10.6 Soil Biotechnology	418
10.6.1 Biofertilizers	419
10.6.2 The Issue of EM Organisms	420
10.6.3 Biomedicines	421
10.6.4 Microbial Genetic Engineering	423
Chapter 11 / SOIL AND POLLUTION	425
11.1 Forms of Pollution	425
11.2 Definition and Concept of Waste	426
11.3 Agricultural Waste	427
11.3.1 Fertilizers	428
11.3.2 Pesticides	429
11.3.3 Crop Residues	433
11.3.4 Animal Waste	435
11.3.5 Forest Waste	436
11.4 Composting and Compost	439
11.4.1 Concepts and Purpose	439
11.4.2 Methods of Composting	440
11.4.3 Materials for Composting	440
11.5 Industrial Waste	441
11.5.1 Carbon Monoxide	442
11.5.2 Carbon Dioxide	443
11.5.3 Nitrogen Oxides	444

11.5.4 Sulfur and Sulfur Oxide	447
11.6 Waste from Food Processing Plants	449
11.6.1 Solid Waste	449
11.6.2 Liquid Waste (Effluent)	449
11.7 Municipal Waste	450
11.7.1 Municipal Refuse	450
11.7.2 Environmental Problems in Disposal of Municipal Refuse	452
11.7.3 Sewage Sludge	452
11.8 Detoxification of Waste	458
11.8.1 Biodegradation	459
11.9 Soil Remediation	460
11.9.1 Physical Remediation	460
11.9.2 Chemical Remediation	461
11.9.3 Biological Remediation	462
11.9.4 Phytoremediation	463
11.9.5 Natural Attenuation	465
11.10 Soil Resilience	467
11.11 Environmental Impact of Agricultural and Industrial Waste	468
11.11.1 Greenhouse Effect	468
11.11.2 Acid Rain	471
11.11.3 Destruction of the Ozone Shield	474
Appendix A Atomic Weights of the Major Elements in Soils	479
Appendix B International System of Units (SI) Factors for Converting U.S. Units into SI Units	483
Appendix C U.S. Weights and Measures	487
References and Additional Readings	489
Index	517
