# Contents

*Introduction* ..... v

  

1    **Numerical analysis of galvanic interaction in reinforcement corrosion** ..... 3  
     J Gulikers & E Schlangen

  

2    **Corrosion of steel in the area of cracks in concrete: laboratory tests and calculations using a transmission line model** ..... 13  
     M Raupach

  

3    **Influence of cracking and water cement ratio on macrocell corrosion of steel in concrete** ..... 24  
     Y Ohno, S Prapartanatorn & K Suzuki

  

4    **Effective cathode to anode ratio and reinforcement corrosion in concrete** ..... 33  
     C Arya & P R W Vassie

  

5    **Deterioration of concrete due to corrosion of reinforcement in immersed concrete and preventive measures** ..... 43  
     R O Müller

  

6    **Corrosion performance of chloride-bearing aggregates in concrete** ..... 55  
     D G Manning & A K C Ip

  

7    **Effect of temperature on pore solution chemistry and reinforcement corrosion in contaminated concrete** ..... 67  
     M Maslehuddin, C L Page, Rasheeduzzafar & A I Al-Mana

  

8    **Influence of external concentration and testing time on chloride diffusion coefficient values of steady and non-steady state migration experiments** ..... 76  
     C Andrade, M Castellote, D Cervigon & C Alonso

  

9    **Time to cracking for chloride-induced corrosion in reinforced concrete** ..... 88  
     Y Liu & R E Weyers

  

10   **Effect of structural shape and chloride binding on time to corrosion of steel in concrete in marine service** ..... 105  
     A A Sagués & S C Kranc
