# Contents

- 1. THE GERMAN CHEMICAL INDUSTRY:  
CHEMICALS FROM COAL** **1**
- Allied Teams Conduct Technical Audit, 2  
Rise of the Organic Chemical Industry: Dyestuffs  
Came First, 17  
Catalysis Brings a New Dimension, 24  
The Birth of I.G. Farbenindustrie, 31  
Chemical Technology Can Make Fuels, 34  
Ethylene and Benzene from Coke Ovens, 42  
German Fiber and Plastics Industries Were Very  
Advanced, 48  
The End of I.G. Farben, 52
- 2. EARLY PETROCHEMICAL PRODUCTION  
IN THE UNITED STATES** **63**
- Union Carbide—Ethylene and Its Derivatives, 69  
Shell Chemical—Ammonia, Propylene, and  
Solvents, 82  
Dow Chemical—Chloride and Bromine Lead to the  
Gulf Coast, 89

- Standard Oil Company (N.J.)—Hydrogenation, Olefins,  
and Aromatics, 96  
Feedstock Selection: Judgments and Actions, 106
- 3. CAT CRACKERS: WARTIME FUELS AND  
PETROCHEMICAL RAW MATERIALS 116**
- Getting Ready for War, 120  
Development of Fixed-Bed Catalytic Cracking, 123  
The Next Technology: Cat Cracking, 128  
Petroleum Technology Keeps Advancing, 138  
The Other Problem: Synthetic Rubber, 141  
Development of Styrene Production, 144  
Butadiene from Various Sources, 146
- 4. AROMATIC FEEDSTOCKS FROM  
PETROLEUM: UNIVERSAL OIL PRODUCTS  
COMPANY (UOP) 157**
- Asphalt Processing Was an Early Start, 164  
Catalysis: Ipatieff, Sabatier, and Other Giants, 170  
Platforming—UOP's Biggest Breakthrough, 176  
Getting the Aromatics Out of Reformate, 184  
A Unique Separations Technology, 191
- 5. THE OLD ORDER: COOPERATION AND  
CARTELS 197**
- The Birth and Growth of Cartels, 202  
Alkali Cartel Illustrates Role of Technology, 209  
Nitrogen Cartel Shows Techniques Employed, 212  
Cartels and Power Politics, 215  
Fewer Producers Allowed Better Control, 220
- 6. PLASTICS: THE ENGINE FOR GROWTH 227**
- Early History of Plastics, 235  
The Discovery of Thermoset Resins, 239  
Thermoplastics—Modern Polymer Science, 245  
Polyvinyl Chloride, 250

- Polystyrene, 253  
Polyethylene, 257
- 7. FROM CELLULOSIC TO SYNTHETIC FIBERS** **271**
- Inspired Research by Carothers, 274  
German Development Work Was Along a Different Path, 279  
Polyester—The Second “Miracle Fiber,” 282  
The Third Synthetic Fiber—Acrylics, 287  
And Now—Phenomenal Growth, 291  
Various Petrochemical Intermediates Used to Make Synthetic Fibers, 294
- 8. THE RUSH INTO PETROCHEMICALS** **302**
- Korean War Provides Extra Boost, 310  
Petrochemical Technology Becomes Broadly Available, 313  
Enter Scientific Design Company, 318  
Ziegler and Linear Polyolefins, 331  
Numerous Producers—A New Competitive Environment, 338
- 9. INTERNATIONAL DEVELOPMENT AND GROWTH** **344**
- Postwar Europe Considers the Transition from Coal, 345  
The European Response, 359  
Petrochemical Development in Japan, 375  
The Rest of the World, 384
- 10. WINNERS AND LOSERS: THE CASE OF VINYL CHLORIDE** **390**
- Becoming a Vinyl Chloride Producer, 397  
Background to Change, 399  
New Acetylene Processes, 400  
The Price of Monomer and PVC Heads Down, 401

	The Ethylene Oxychlorination Process, 403	
	VCM Demand Continues to Grow, 404	
	And the Game Continued, 413	
	The Scoreboard, 413	
	The Conclusions, 416	
<b>11.</b>	<b>LARGE PLANTS: THE NEW ECONOMICS</b>	<b>418</b>
	Large Single-Train Ammonia Plants, 426	
	Apotheosis: "World Size" Steam Crackers, 437	
	Large Plants—Other Issues and Conclusions, 457	
<b>12.</b>	<b>THE 1970s: DISCONTINUITIES AND UNCERTAINTIES</b>	<b>462</b>
	The U.S. Energy Picture Darkens, 469	
	The First Oil Shock, 476	
	Oil-Rich Countries Enter the Petrochemical Industry, 486	
	Environmental and Toxicity Concerns, 491	
	The Second Oil Shock, 494	
	Implications of Higher Energy and Feedstock Costs, 497	
	Will Plastics Remain Competitive? 498	
	Discontinuities and Uncertainties, 500	
<b>13.</b>	<b>THE ONCE AND FUTURE INDUSTRY</b>	<b>507</b>
	Feedstocks: The Condition Precedent, 513	
	Dimensions of a New Industry, 515	
	The Industry Becomes Too Attractive, 521	
	The 1970s—And Then Restructuring, 525	
	Smokestack Industries, Maturity, and the Growth Cycle, 526	
	Raw Materials Options and the Role of Technology, 533	
	Problems of the Past, 537	
	The Industry Had No Control Over These Issues, 539	

These Issues Were Under the Chemical Industry's Control, 540	
Changes in Industry Conditions, 541	
The Licensing Decision, 546	
A More Difficult Research Climate, 550	
Management Guidelines for the Future, 552	
The End and the Beginning, 556	

<b>APPENDIX: DESCRIPTION OF TECHNICAL TERMS</b>	<b>561</b>
<b>CHEMICAL INDEX</b>	<b>567</b>
<b>SUBJECT INDEX</b>	<b>577</b>
