EXECUTIVE SUMMARY	19
AUTHOR'S NOTE	37
INTRODUCTION	41
CHAPTER I — Institutional and economic framework for water resources management and planning	47
1. Legal framework for water resources management and planning	47
2. Economic and financial framework for water resources management and planning	56
3. Public/private interface	65
CHAPTER II — Overview of water resources availability and sectoral water use	69
1. Overview of water resources availability	70
2. Profile of sectoral water use	80
3. Exploitation and consumption indices	88
4. Analysis of the main trends for water availability and use	92
5. International river basin water resources	98
6. Analysis of hydrological planning: The White Paper on water and the draft national irrigation plan	101
CHAPTER III — Analysis of influencing factors on water resources management and planning	105
1. Climate change	105
2. Use of non-conventional resources	106
3. Water transfers	108
4. Technological development: Development of clean and water-saving technologies	109
5. Research and development programmes	110
CHAPTER IV — Future trends in water management and planning	113
1. Economic and financial framework	113
2. Licensing system for water abstraction control	115
3. Implementation into national law of the Convention on the Protection and Use of Transboundary Rivers and International Lakes, approved on 24 July 1995	117

CHAPTER V — Assessment of setting up cooperation networks between regions (case studies: Ecowat and HYDRE)	119
ACTION PLAN	121
I. Priorities for sustainable water resources management in the Mediterranean basin	122
II. Medium- and long-term proposed actions to achieve sustainable water resources management	124
III. Measures to be taken at a national, transnational and Community level	129
GLOSSARY	133

ANNEX — Data comparability and compatibility at the European level	143

FRANCE

PART 1 — Overview

I. Legal framework for water resources management and planning	149
1. Legislation	149
2. Organisations	150
3. Licensing and permits	153
II. Economic and financial framework for water management	154
1. Pricing structure and level	154
2. Subsidising	156
3. Investments	156
4. Public/private interface	156
III. Water quality	159
1. Compliance with the directive on urban wastewater (91/271/EEC)	159
2. Industrial pollution	162
3. Agricultural pollution	163
References	165

PART 2 — Action plan

Foreword	173
Introduction	173
I. Medium-term and long-term priorities for sustainable water management in France	173
I.1. Improving data on and knowledge of the environment, ecosystems and uses	173
I.2. Improving resource management	175
I.3. Reducing demand	178
I.4. Improving water quality	180
I.5. Crisis management	181

II. Measures to be undertaken at the different territorial levels	182
II.1. Proposed recommendations within a Community context	182
II.2. Proposed recommendations within the context of transnational cooperation	183
II.3. Proposed recommendations within a national context	183
II.4. Proposed recommendations at river basin level	183

GREECE

PART 1 — Overview

I. Legal framework for water resources management and planning	187
1. Legislation	187
2. Organisations	188
3. Licensing and permits	189
II. Economic and financial framework for water management	189
1. Pricing structure and level	189
2. Subsidising	191
3. Full cost recovery	191
4. Investments	191
5. Public/private interface	191
III. Water quality	192
1. Wastewater and sewage treatment	192
2. Agricultural pollution	192
3. Industrial pollution	193
References	193

PART 2 — Action plan

Foreword	195
Introduction	195
I. Medium-term and long-term priorities for sustainable water management in Greece	197
I.1. Improving knowledge of water resources and ecosystems	197
I.2. Improving water resources management	197
I.3. Improving water supply and sewage infrastructure	198
I.4. Reducing water demand	199
I.5. Improving and restoring water quality	199
I.6. Preventing soil erosion	200
I.7. Managing floods	201
II. Measures to be undertaken at the different territorial levels	201
II.1. Proposed recommendations within a Community framework	201
II.2. Proposed recommendations within a transboundary framework	201
II.3. Proposed recommendations within a regional framework	201

ITALY

PART 1 — Overview

I. Legal framework of water resources management and planning	205
1. Legislation	206
2. Organisations	208
3. Licensing and permits	210
II. Economic and financial framework for water management	211
1. Pricing structure and level	211
2. Subsidising	215
3. Full cost recovery	215
4. Investment	215
5. Public/private interface	217
III. Water quality	218
Compliance with the directive on urban wastewater (91/271/EEC)	218
References	219

PART 2 — Action plan

Foreword	221
Introduction	221
I. Medium-term and long-term priorities for sustainable water management in Italy	224
I.1. Improving monitoring of water resources and systems for water data collection	224
I.2. Improving demand management	225
I.3. Improving and restoring water quality	226
I.4. Improving drought management	229
I.5. Improving flood management	230
II. Measures to be undertaken at the different territorial levels	231
II.1. Proposed recommendations within the Community framework	231
II.2. Proposed recommendations within a transboundary framework	231
II.3. Proposed recommendations within the national framework	232
II.4. Proposed recommendations within the regional framework	233

PORTUGAL

PART 1 — Overview

I. Legal framework for water resources management and planning	237
1. Legislation	237
2. Organisations	238
3. Licensing and permits	240

II. Economic and financial framework for water management	241
1. Pricing structure and level	241
2. Subsidising	242
3. Public/private interface	242
III. Water quality	242
Compliance with the directive on urban wastewater (91/271/EEC)	243
References	244

PART 2 — Action plan

Foreword	245
Introduction	245
1. Recent institutional developments	246
2. Internal complexities	246
I. Medium-term and long-term priorities for sustainable water management in Portugal	247
I.1. Improving wastewater and sewage treatment networks in medium-sized cities	247
I.2. Improving water resources management	248
I.3. Reducing water demand	248
I.4. Improving and restoring water quality	250
I.5. Conserving and restoring aquatic ecosystems and wetlands	251
I.6. Managing extreme events	252
II. Measures to be undertaken at the different territorial levels	252
II.1. Proposed recommendations within the Community framework	252
II.2. Proposed recommendations within the transboundary framework	253
II.3. Proposed recommendations within the river basin framework	253
II.4. Proposed recommendations within the national framework	253
Annex — Water management and planning in the Algarve	254

SPAIN

PART 1 — Overview

I. Legal framework for water resources management and planning	259
1. Legislation	259
2. Organisations	260
3. Licensing and permits	262
II. Economic and financial framework for water management	263
1. Pricing structure and level	263
2. Subsidising	267
3. Full cost recovery	268

4. Investments	268
5. Public/private interface	269
III. Water quality	270
1. Saline intrusion	270
2. Compliance with the directive on urban wastewater (91/271/EEC)	270
3. Domestic pollution	272
4. Industrial pollution	272
5. Agricultural pollution	273
References	274
 PART 2 — Action plan	
Foreword	277
Introduction	277
I. Medium-term and long-term priorities for sustainable water management in Spain	279
I.1. Improving ecosystems management	279
I.2. Conserving and restoring land cover, fighting erosion and desertification	280
I.3. Improving water resources monitoring systems and knowledge on water resources and ecosystems	280
I.4. Reducing agricultural demand	281
I.5. Improving and restoring water quality	282
I.6. Improving extreme events management	284
II. Measures to be undertaken at the different territorial levels	284
II.1. Proposed recommendations within the Community framework	284
II.2. Proposed recommendations within the national framework	285
II.3. Proposed recommendations within the transboundary framework	285
 MALTA	
 PART 1 — Overview	
I. Legal framework for water resources management and planning	289
1. Legislation	289
2. Organisations	289
3. Licensing and permits	290
II. Economic and financial framework for water management	290
1. Pricing structure and level	290
2. Subsidising	294
3. Full cost recovery	294
4. Investments	294
5. Public/private interface	294

III. Water quality	294
1. Wastewater and sewage treatment	294
2. Groundwater and seawater pollution	298
3. Policy measures	298
IV. Quality management policy	299
References	299
 PART 2 — Action plan	
Introduction	301
I. Medium-term and long-term priorities for sustainable water management in Malta	301
I.1. Assessing the sustainable use of existing available resources	301
I.2. Reducing the demand	302
I.3. Strengthening efforts for prevention and reduction of pollution	303
I.4. Protecting and enhancing groundwater resources	304
II. Measures to be undertaken at the different territorial levels	304
II.1. Proposed recommendations within the Community framework	304
II.2. Proposed recommendations within the national framework	304
 CYPRUS	
PART 1 — Overview	
I. Legal framework for water resources management and planning	307
1. Legislation	307
2. Organisations	308
3. Licensing and permits	310
II. Economic and financial framework for water management	311
1. Pricing structure and level	311
2. Subsidising	312
3. Full cost recovery	312
4. Investment	313
5. Public/private interface	314
III. Water quality	314
1. Saline intrusion	314
2. Wastewater and sewage treatment	314
3. Urban pollution	315
4. Industrial pollution	315
5. Agricultural pollution	315
References	315

PART 2 — Action plan

Introduction	319
I. Medium-term and long-term priorities for sustainable water management in Cyprus	319
I.1. Assessing the sustainable use of existing available resources	319
I.2. Reducing the demand	320
I.3. Improving and restoring water quality	321
I.4. Protecting and enhancing groundwater resources	321
I.5. Conserving and restoring aquatic ecosystems and wetlands	321
I.6. Drought management	322
II. Measures to be undertaken at the different territorial levels	322
II.1. Proposed recommendations within the Community framework	322
II.2. Proposed recommendations within the national framework	322
II.3. Proposed recommendations within the watershed framework	322
