Jayalakshmi Krishnakumar

Estimation of Simultaneous Equation Models with Error Components Structure

Fachbereich Mathematik Technische Hochschule Darmstadt Bibliothek

Inv.-Nr. 827844

Springer-Verlag Berlin Heidelberg New York London Paris Tokyo

TABLE OF CONTENTS

.

CHAPTER 1. INTRODUCTION	1
1.1 General	1
1.2 Organization of the Book	3
CHAPTER 2. A SURVEY OF PANEL DATA MODELS	6
2.1 General	6
2.2 Constant Slope Variable Intercept Models	8
2.2.1 Fixed Effects Models 2.2.2 Random Effects Models	8 9
2.2.2.1 Error Components Models : Classical Estimation Methods 2.2.2.2 EC Models : Bayesian Analysis 2.2.2.3 EC Models Using Stratified Data	9 13 15
2.2.3 Random Effects Models with Non-Zero Correlations between Specific Effects and Exogenous Variables	17
2.2.4 Dynamic Random Effects Models	20
2.3 Variable Coefficient Models	25
2.3.1 Fixed Coefficient Component Models	25
2.3.2 Random Coefficient Models	26
2.3.2.1 Purely Random Coefficient Components	26
2.3.2.2 Transmitted Variations Model	28
Stochastically Convergent Parameters	29
Autoregressive Model	30
2.3.3 The "Mixed" Model	31
2.3.4 Quantitative Effects Models 2.3.5 General Stratified Effect Component	32
Models	34
2.3.6 Bayesian Analysis of Some Varying	25
2 A Retimation of Variance Components in Panel	
Data Models	39
2.4.1 Analysis of Variance Methods	39
2.4.2 "Fitting of Constants" Method	40
2.4.4 MINQUE	41
2.4.5 Comparison of Alternate Estimation Methods	42
2.5 Estimation of Models using Incomplete Time-	
Series Cross-Section Data	43
2.6 Extensions	45
2.6.1 SUR with EC 2.6.2 SEM with EC	45 46

CHAPTER 3. PRESENTATION OF SIMULTANEOUS EQUATIONS MODELS WITH ERROR COMPONENTS STRUCTURE	
AND ESTIMATION OF THE REDUCED FORM	47
3.1 The Model	47
3.1.1 Notations	47
3.1.2 Stochastic Specifications	49
3.2 Estimation of the Reduced Form	53
3.2.1 Derivation of Stochastic Properties of Reduced Form Errors and Interpretation	•
of the Reduced Form	53
3.2.2 Feasible GLS Estimation of Reduced Form Parameters	56
3.2.3 Maximum Likelihood Estimation of the	50
Reduced Form	63
Appendix 3.A Proof of the Consistency of the Feasible GLS Estimator of Reduced Form Coefficients	72
3.A.l Basic Assumptions and Some Preliminary	
Results 3 A 2 Consistency of $\hat{\pi}$	72 79
3 A 2 Consistency of MOV Estimators of Figenvalues	,,,
(and Variance Components) of Ω_{mm} ,	80
3.A.4 Consistency of the Feasible GLS Estimator	
. of H 3.A.5 Proof of Lemma L-1	90 93
Appendix 3.B Limiting Distribution of the Feasible GLS Estimator of the Reduced Form	100
Appendix 3.C. Limiting Distribution of the Reduced Form Maximum Likelihood Estimators	112
3.C.1 The Information Matrix	112
3.C.2 Limit of the Information Matrix	115
3.C.3 The Limiting Distribution	117
CHAPTER 4 ESTIMATION OF THE STRUCTURAL FORM -	
PART 1	120
4.1 Generalised Two Stage Least Squares - A Single Equation Method	120
4 1 1 Estimation in the Case of Known	
Variance Components	120
4.1.2 Estimation in the Case of Unknown Variance Components	122
A 2 Conoralised Three Stage Least Squares -	
A System Method	129
Appendix 4.A Proof of the Consistency of the 2SLS	
Covariance Estimators $\hat{\alpha}_{m,COV}$ and	124
M,C2SLS A A l Consistency of ô	134
T.A.I CONSISCENCY OF WM,COV	104 701
4.A.2 Consistency of $\hat{\alpha}_{m}$,C2SLS	13/

.

Appendix 4.B	Proof of the Consistency of AOV Estimators of Eigenvalues and Variance Components of Σ_{mm}	139
4.B.1 Method 4.B.2 Method	1 1 1 2	139 148
Appendix 4.C	Proof of the Consistency of the Feasible (and pure) G2SLS Estimator	149
Appendix 4.D	Limiting Distribution of the Feasible G2SLS Estimator	155
Appendix 4.E	Limiting Distribution of the Feasible G3SLS Estimator	161
CHAPTER 5 EST PAR	FIMATION OF THE STRUCTURAL FORM - RT 2	170
5.1 Full Inf Estimati	formation Maximum Likelihood (FIML) ion of the Structural Form	170
5.2 Limited (LIML) F	Information Maximum Likelihood Estimation of the Structural Form	186
Appendix 5.A	Limiting Distribution of the FIML Estimators	192
5.A.l The Ir	nformation Matrix	192
5.A.2 Limit 5.A.3 The Li	of the Information Matrix imiting Distribution	198 201
CHAPTER 6 THE EST	E JUST-IDENTIFIED CASE AND INDIRECT FIMATION OF STRUCTURAL PARAMETERS	205
6.1 The Ider	ntification Problem	205
6.2 Derivati of Struc Limiting	ion of the Indirect Estimators ctural Coefficients and their Distributions	20.6
6.2.1 The (Case of a Single Just-Identified	200
Struc	ctural Equation	206
6.2.1.1 Th	ne Indirect Estimation Method	206
6.2.1.2 Th 6.2.1.3 Th	ne Indirect Covariance Estimator ne Indirect Feasible GLS Estimator	209 211
6.2.2 The C	Case of a Just-Identified System	218
6.3 Comparis	son of the IfGLS Estimator with	
the fG28	SLS and fG3SLS Estimators	218
6.3.1 The (Case of a Single Just-Identified	219
6.3.2 The (Case of a Just-Identified System	210
6.3.2.1 Co	omparison between fG2SLS and	
f(6.3.2.2 C	G3SLS Estimators omparison between fG2SLS, fG3SLS	219
ar	nd IfGLS Estimators	221
Appendix 6.A	Limiting Distribution of the Indirect Feasible GLS Estimator	222

CHAPTER 7 BIAS OF THE FEASIBLE ESTIMATORS OF REDUCED FORM AND STRUCTURAL VARIANCE COMPONENTS AND COEFFICIENTS	227 -
7.1 The Unbiasedness of the Feasible AOV Estimators of Reduced Form Variance	227
Components	221
7.2 The Unblasedness of the Feasible GLS Estimator of the Reduced Form Coefficients	230
7.3 Bias of Structural Variance Components Estimators	232
7.3.1 A General Note 7.3.2 Bias of $\hat{\sigma}_{c,1,1}$	232 233
7.3.3 Bias of $\hat{\sigma}_{\mu 11}$	246
7.4 Bias of Structural Coefficients Estimators	251
7.4.1 A General Note 7.4.2 Bias of the Covariance 2SLS Estimator 7.4.3 Bias of the Feasible G2SLS Estimator	251 252 256
Appendix 7.A Preliminary Computations of Orders	268
7.A.l Some Basic Order Calculations 7.A.2 Further Results on Orders	268 274
Appendix 7.B Derivations of Expectations	280
7.B.1 Expectation of $u_1' \overline{F} U' N_4 u_1$	280
7.B.2 Expectation of u¦FU'FU'N ₄ u	282
7.B.3 Expectation of $u_1^{\dagger}HURU'N_4u_1$	286
7.B.4 Expectation of u'CURU'N, u	288
7.B.5 Expectation of $u_1^{\dagger} \overline{F} U' N_4 U \overline{F}' u_1$	289
Appendix 7.C Order Calculations Involved in the Determination of the Bias of the Feasible G2SLS Estimator	291
Appendix 7.D Expectation of $n_{ill}X'N_{j}u_{l}$ for i=1,4 and j=1,4	300
CHAPTER 8 APPLICATION TO A MODEL OF RESIDENTIAL ELECTRICITY DEMAND	307
8.1 The Model	307
8.2 The Data	310
8.3 Estimation Methods 8.4 Results	313
Appendix 8.A Computer Programs of Estimation Methods	331
CHAPTER 9 CONCLUSIONS	346
REFERENCES	353
