<i>Vorwort</i>	III
<b>Acknowledgements</b>	V
<b>List of Figures</b>	VIII
<b>List of Tables</b>	XIII
<b>Notation</b>	XVII
<i>Zusammenfassung</i>	XXI
<b>Abstract</b>	XXXIII
<b>1 Introduction</b>	1
1.1 Background . . . . .	1
1.2 Objectives . . . . .	2
<b>2 Review</b>	5
2.1 Basin-scale dynamics of stratified lakes . . . . .	5
2.2 Basin-scale dynamics of stratified Upper Lake Constance . . . . .	21
<b>3 Methodology</b>	35
3.1 Time conventions . . . . .	35
3.2 Field measurement program in autumn 2001 . . . . .	35
3.3 Numerical simulation . . . . .	38
3.4 Data information system and data flow . . . . .	41
3.5 Data processing . . . . .	44
<b>4 Overview of Field Results and Wind Forcing</b>	49
4.1 Overview . . . . .	49
4.2 Wind measurement results . . . . .	51

4.3 Discussion of the state of the lake during the measurement . . . . .	57
<b>5 Basin-Scale Internal Waves</b>	<b>59</b>
5.1 Theoretical velocity structure . . . . .	59
5.2 Frequency content of motion . . . . .	60
5.3 Kelvin wave . . . . .	67
5.4 Internal waves of Poincaré type in the main basin . . . . .	74
5.5 Internal waves in Lake Überlingen . . . . .	88
<b>6 Response to Strong Wind Forcing</b>	<b>95</b>
6.1 Upwelling . . . . .	95
6.2 Internal surge and intrusion in the metalimnion . . . . .	112
6.3 Discussion of possible mixing mechanisms . . . . .	124
<b>7 Conclusions and Outlook</b>	<b>125</b>
7.1 Conclusions . . . . .	125
7.2 Outlook . . . . .	127
<b>References</b>	<b>129</b>
<b>Appendix</b>	<b>135</b>
A.1 Terminology . . . . .	135
A.2 Date conversion . . . . .	136
A.3 Test of Butterworth bandpass filter resolution . . . . .	137
A.4 Plots of measurement results . . . . .	138
A.5 Sensitivity analysis of ELCOM simulations . . . . .	145
A.6 Plots of ELCOM results . . . . .	148
A.7 Comparison of field and simulation results . . . . .	164
A.8 Free Kelvin wave after a wind impulse . . . . .	172
A.9 Derivation of the Lake number . . . . .	174
A.10 Lake number calculation for wind episode w7 . . . . .	176
