Geotechnical Engineering

Principles and Practices

Donald P. Coduto

Professor of Civil Engineering California State Polytechnic University, Pomona

Contents

Preface	ix
Notation and Units of Measurement	xi
1. Introduction to Geotechnical Engineering	1
1.1 Historical Development	3
1.2 Modern Geotechnical Engineering	11
1.3 Accuracy of Geotechnical Engineering Analyses	12
2. Engineering Geology	15
2.1 Rock and Soil	16
2.2 Rock-Forming Minerals	17
2.3 The Geologic Cycle	18
2.4 Structural Geology	26
Questions and Practice Problems 2.1-2.8	. 32
2.5 Soil Formation, Transport, and Deposition	33
Questions and Practice Problems 2.9–2.12	43
Summary	43
Comprehensive Questions and Practice Problems 2.13-2.19	45
3. Site Exploration and Characterization	46
3.1 Project Assessment	47
3.2 Literature Search	48
3.3 Remote Sensing	49
3.4 Field Reconnaissance and Surface Exploration	50
3.5 Subsurface Exploration	51
3.6 Soil and Rock Sampling	62
3.7 Groundwater Exploration and Monitoring	65
Questions and Practice Problems 3.1–3.4	. 66
3.8 Ex-Situ Testing	68
3.9 In-Situ Testing	68
Questions and Practice Problems 3.5–3.8	84
3.10 Geophysical Exploration	· 84
3.11 Synthesis and Interpretation	86
3.12 Economics	89
3.13 Geotechnical Monitoring During Construction	90
Summary	90
Comprehensive Questions and Practice Problems 3.9–3.12	91
4. Soil Composition	94
4.1 Soil as a Particulate Material	95
4.2 The Three Phases	95

iv	Contents

	4.3 Weight-Volume Relationships	97
	Questions and Practice Problems 4.1–4.9	113
	4.4 Particle Size and Shape	115
	Questions and Practice Problems 4.10–4.14	123
	4.5 Clay Soils	125
	4.6 Plasticity and the Atterberg Limits	128
	4.7 Structured vsUnstructured Soils	131
	4.8 Organic Soils	131
	Questions and Practice Problems 4.15–4.19	132
	Summary	133
	Comprehensive Questions and Practice Problems 4.20–4.28	134
5. Soil	Classification	136
	5.1 USDA Soil Classification System	136
	5.2 AASHTO Soil Classification System	139
	5.3 Unified Soil Classification System (USCS)	141
	5.4 Visual-Manual Soil Classification	150
	5.5 Supplemental Soil Classifications	150
	5.6 Applicability and Limitations	154
•	Summary	155
	Comprehensive Questions and Practice Problems 5.1–5.13	155
6. Exc	cavation, Grading, and Compacted Fill	157
	6.1 Earthwork Construction Objectives	159
	6.2 Construction Methods and Equipment	160
•	Questions and Practice Problems 6.1–6.4	177
	6.3 Soil Compaction Standards and Assessment	177
	Questions and Practice Problems 6.5–6.12	. 192
	6.4 Suitability of Soils for Use as Compacted Fill	193
	6.5 Earthwork Quantity Computations	195
	6.6 Lightweight Fills	199
	6.7 Deep Fills	200
	Questions and Practice Problems 6.13–6.18	202
	Summary	203
	Comprehensive Questions and Practice Problems 6.19–6.22	204
7. Gr	oundwater — Fundamentals	206
	7.1 Hydrology	207
	7.2 Coordinate System and Notation	210
	7.3 Head and Pore Water Pressure	210
	Questions and Practice Problems 7.1–7.5	218
	7.4 Groundwater Flow Conditions	218
	7.5 One-Dimensional Flow	220
	7.6 Capillarity	233
	Questions and Practice Problems 7.6–7.16	235

Contents v

	Summary	237
	Comprehensive Questions and Practice Problems 7.17-7.21	238
	8. Groundwater — Applications	240
	8.1 Two-Dimensional Flow	240
	Questions and Practice Problems 8.1–8.5	257
	8.2 Three-Dimensional Flow	258
	Questions and Practice Problems 8.6–8.7	266
	8.3 Uplift Pressures on Structures	268
	8.4 Groundwater Control and Dewatering	272
	8.5 Soil Migration and Filtration	277
	Questions and Practice Problems 8.8–8.11	284
	Summary	285
	Comprehensive Questions and Practice Problems 8.12–8.18	286
	9. Geoenvironmental Engineering	288
	9.1 Types of Underground Contamination	292
O	9.2 Sources of Underground Contamination	294
	9.3 Fate and Transport of Underground Contaminants	297
٠	9.4 Geoenvironmental Site Characterization	302
	9.5 Remediation Methods	302
	9.6 Sanitary Landfills	308
	Summary	311
	Comprehensive Questions and Practice Problems 9.1–9.8	313
	10. Stress	314
	10.1 Simplifying Assumptions	315
	10.2 Mechanics of Materials Review	316
	10.3 Sources of Stress in the Ground	320
	10.4 Geostatic Stresses	321
	Questions and Practice Problems 10.1–10.2	323
	10.5 Induced Stresses	323
	10.6 Superposition	333
	Questions and Practice Problems 10.3–10.7	336
	10.7 Effective Stresses	336
	Questions and Practice Problems 10.8–10.11	345
	10.8 Programs STRESSP, STRESSL, STRESSR, and STRESSC	345
	Questions and Practice Problems 10.12–10.15	348
	10.9 Mohr's Circle Analyses	348
	Questions and Practice Problems 10.16–10.19	355
	10.10 Seepage Force	.356
	10.11 Stresses in Layered Strata	358
	10.12 Stress Paths	359
	Summary	359
	Comprehensive Questions and Practice Problems 10 20–10 27	360
