08.8 HIE

A Handbook of Industrial Ecology

Technische Universität Darmstadt
Bibliothek Wasser und Umwelt
Petersenstraße 13
D-64287 Darmstadt
Telefon 06151 / 163659
Fax 06151 / 163758

Edited by

Robert U. Ayres

Sandoz Professor of Environment and Management, Professor of Economics and Director of the Centre for the Management of Environmental Resources at the European Business School, INSEAD, France

and

Leslie W. Ayres

Research Associate, Centre for the Management of Environmental Resources at the European Business School, INSEAD, France

Edward Elgar

Cheltenham, UK • Northampton MA, USA

Contents

<i>List of tables</i>	viii
<i>List of figures</i>	xi
<i>List of authors</i>	xv
<i>Preface</i>	xviii

PART I CONTEXT AND HISTORY

1 Industrial ecology: goals and definitions <i>Reid Lifset and Thomas E. Graedel</i>	3
2 Exploring the history of industrial metabolism <i>Marina Fischer-Kowalski</i>	16
3 The recent history of industrial ecology <i>Suren Erkman</i>	27
4 Industrial ecology and cleaner production <i>Tim Jackson</i>	36
5 On industrial ecosystems <i>Robert U. Ayres</i>	44
6 Industrial ecology: governance, laws and regulations <i>Braden R. Allenby</i>	60
7 Industrial ecology and industrial metabolism: use and misuse of metaphors <i>Allan Johansson</i>	70

PART II METHODOLOGY

8 Material flow analysis <i>Stefan Bringezu and Yuichi Moriguchi</i>	79
9 Substance flow analysis methodology <i>Ester van der Voet</i>	91
10 Physical input-output accounting <i>Gunter Strassert</i>	102
11 Process analysis approach to industrial ecology <i>Urmila Diwekar and Mitchell J. Small</i>	114
12 Industrial ecology and life cycle assessment <i>Helias A. Udo de Haes</i>	138
13 Impact evaluation in industrial ecology <i>Bengt Steen</i>	149

PART III ECONOMICS AND INDUSTRIAL ECOLOGY

- | | | |
|----|--|-----|
| 14 | Environmental accounting and material flow analysis
<i>Peter Bartelmus</i> | 165 |
| 15 | Materials flow analysis and economic modeling
<i>Karin Ibenholt</i> | 177 |
| 16 | Exergy flows in the economy: efficiency and dematerialization
<i>Robert U. Ayres</i> | 185 |
| 17 | Transmaterialization
<i>Walter C. Labys</i> | 202 |
| 18 | Dematerialization and rematerialization as two recurring phenomena of industrial ecology
<i>Sander De Bruyn</i> | 209 |
| 19 | Optimal resource extraction
<i>Matthias Ruth</i> | 223 |
| 20 | Industrial ecology and technology policy: the Japanese experience
<i>Chihiro Watanabe</i> | 232 |

PART IV INDUSTRIAL ECOLOGY AT THE NATIONAL/REGIONAL LEVEL

- | | | |
|----|--|-----|
| 21 | Global biogeochemical cycles
<i>Vaclav Smil</i> | 249 |
| 22 | Material flow accounts: the USA and the world
<i>Donald G. Rogich and Grecia R. Matos</i> | 260 |
| 23 | Industrial ecology: analyses for sustainable resource and materials management in Germany and Europe
<i>Stefan Bringezu</i> | 288 |
| 24 | Material flow analysis and industrial ecology studies in Japan
<i>Yuichi Moriguchi</i> | 301 |
| 25 | Industrial ecology: an Australian case study
<i>Andria Durney</i> | 311 |
| 26 | Industrial ecology: the UK
<i>Heinz Schandl and Niels Schulz</i> | 323 |
| 27 | Industrial symbiosis: the legacy of Kalundborg
<i>John R. Ehrenfeld and Marian R. Chertow</i> | 334 |

PART V INDUSTRIAL ECOLOGY AT THE SECTORAL/MATERIALS LEVEL

- | | | |
|----|--|-----|
| 28 | Material flows due to mining and urbanization
<i>Ian Douglas and Nigel Lawson</i> | 351 |
| 29 | Long-term world metal use: application of industrial ecology in a system dynamics model
<i>Detlef P. van Vuuren, Bart J. Strengers and Bert J.M. de Vries</i> | 365 |

30	Risks of metal flows and accumulation <i>Jeroen B. Guinée and Ester van der Voet</i>	382
31	Material constraints on technology evolution: the case of scarce metals and emerging energy technologies <i>Björn A. Andersson and Ingrid Råde</i>	391
32	Wastes as raw materials <i>David T. Allen</i>	405
33	Heavy metals in agrosystems <i>Simon W. Moolenaar</i>	421
34	Industrial ecology and automotive systems <i>Thomas E. Graedel, Yusuke Kakizawa and Michael Jensen</i>	432
35	The information industry <i>Braden R. Allenby</i>	445
 PART VI APPLICATIONS AND POLICY IMPLICATIONS		
36	Industrial ecology and green design <i>Chris T. Hendrickson, Arpad Horvath, Lester B. Lave and Francis C. McMichael</i>	457
37	Industrial ecology and risk analysis <i>Paul R. Kleindorfer</i>	467
38	Industrial ecology and spatial planning <i>Clinton J. Andrews</i>	476
39	Industrial estates as model ecosystems <i>Fritz Balkau</i>	488
40	Closed-loop supply chains <i>V. Daniel R. Guide, Jr and Luk N. van Wassenhove</i>	497
41	Remanufacturing cases and state of the art <i>Geraldo Ferrer and V. Daniel R. Guide Jr</i>	510
42	Industrial ecology and extended producer responsibility <i>John Gertsakis, Nicola Morelli and Chris Ryan</i>	521
43	Life cycle assessment as a management tool <i>Paolo Frankl</i>	530
44	Municipal solid waste management <i>Clinton J. Andrews</i>	542
45	Industrial ecology and integrated assessment: an integrated modeling approach for climate change <i>Michel G.J. den Elzen and Michiel Schaeffer</i>	554
46	Earth systems engineering and management <i>Braden R. Allenby</i>	566
	 <i>References</i>	 572
	<i>Index</i>	645
