*Preface*     *xix*

## SECTION ONE

*Cost Accounting Fundamentals*

### 1

*The Accountant's Role in the Organization*     3

**focus of cost accounting and management accounting** emphasis on internal decisions  
relation to decisions planning and control cost-benefit approach  
accountant as a decision maker **the pervading duties of the management accountant**  
line and staff relationships the controller: the chief management accountant  
distinctions between controller and treasurer division of duties SUMMARY  
PROBLEMS FOR SELF-STUDY QUESTIONS, PROBLEMS, AND CASES

*vii*

## 2

### *An Introduction to Cost Terms and Purposes 19*

**costs in general** cost objectives cost systems **variable costs and fixed costs**  
 costs and changes in activity fixed costs and shutdown costs cost behavior patterns  
**unit costs and total costs product costs and period costs**  
 manufacturing and non-manufacturing activities three manufacturing cost elements  
 product costs (inventoriable costs) effect on the balance sheet  
 perpetual and periodic inventories **some cost accounting language**  
 troublesome terminology subdivisions of labor costs payroll fringe costs  
**classifications of cost** SUMMARY PROBLEM FOR SELF-STUDY  
 QUESTIONS, PROBLEMS, AND CASES

## 3

### *Cost-Volume-Profit Relationships 44*

**the breakeven point** equation method contribution-margin method graphic approach  
 target net income **cost-volume-profit assumptions** relevant range  
 the economist's breakeven chart limitations of assumptions  
**interrelationships of cost, volume, and profits** uncertainty and sensitivity analysis  
 cost of prediction error changes in variable costs changes in fixed costs  
 the p/v chart **measuring volume contribution approach to income statements**  
 contribution approach versus traditional approach  
 comparison of contribution margin and gross margin  
 advantages of contribution margins and ratios SUMMARY  
 PROBLEMS FOR SELF-STUDY APPENDIX: Role of Income Taxes  
 QUESTIONS, PROBLEMS, AND CASES

## 4

### *Job-Order Accounting: An Illustration of Systems Design 74*

**job-order approach to costing products** product costing and control purposes  
 job and process costing: a matter of averaging source documents  
 responsibility and control **illustration of job-order accounting**  
**the conceptual approach to accounting for prime costs limitations of general ledger**  
**overhead application** tracing overhead to product annualized rates  
 ledger procedure for overhead underapplied or overapplied overhead  
 interim financial statements external interim reporting SUMMARY  
 PROBLEM FOR SELF-STUDY

APPENDIX: Supplementary Description of Ledger Relationships  
 subsidiary ledgers and general ledger direct-material-usage reports  
 direct-labor-cost recapitulation sample entries QUESTIONS, PROBLEMS, AND CASES

## SECTION TWO

### *Multiple Purpose Systems for Management Control*

#### 5

#### *Budgeting in General: Profit Planning 123*

**major features of budgets** definition and role of budgets wide use of budgets  
**types of budgets** time coverage classification of budgets  
**illustration of master budget** basic data and requirements  
 basic approach to formulating master budget **sales forecasting—a difficult task**  
 factors in sales forecasting forecasting procedures **planning models and simulation**  
 SUMMARY SUGGESTED READINGS PROBLEM FOR SELF-STUDY  
 QUESTIONS, PROBLEMS, AND CASES

#### 6

#### *Systems Design, Responsibility Accounting, and Motivation 150*

**motivation and systems design** goal congruence: the first motivational problem  
 incentive: the second motivational problem explaining the evolution of systems  
**advantages of budgets** compelled planning framework for judging performance  
 communication and coordination human aspect **responsibility accounting**  
 systems and organization changes definition of responsibility accounting  
 illustration of responsibility accounting format of feedback reports  
**controllable and uncontrollable costs** definition of controllable costs  
 determining controllability or responsibility  
 reporting controllable and uncontrollable items the time period and control  
 feedback and fixing blame subunit performance and manager performance  
**effect of systems on human behavior** alternative views of organizations  
 three types of control system goals and individual goals senior-manager support  
**illustrations of behavioral focus** general difficulties of goal congruence  
 human resources accounting slack: a universal behavioral problem  
 cooperation versus competition importance of formal systems accurate scorekeeping  
 intelligent analysis of relevant data SUMMARY SUGGESTED READINGS  
 PROBLEM FOR SELF-STUDY QUESTIONS, PROBLEMS, AND CASES

## 7

**Standard Costs:****Direct Material and Direct Labor 186**

**standard costs as feedback aids** distinction between budgets and standards  
standards as a basis for feedback price and efficiency variances  
substitute terminology measuring and expressing output

**evolution of standard-cost system** the flexible budget two versions of flexible budget  
steps in evolution types of standards presence of expected variances  
responsibility for developing standards responsibility for price variance  
trade-offs among variances physical standards and improvement of operations

**material-price standards** timing of material-price standards  
who sets material-price standards? **material-efficiency standards**  
nature of efficiency standards setting efficiency standards control of usage

**labor-price standards labor-efficiency standards** general characteristics setup time

**general-ledger entries** entries for illustration variations in systems  
disposition of variances costs of data gathering **when to investigate variances**  
rules of thumb timing and aggregation **learning curves and accounting**  
effects of learning on productivity setting budgets or standards SUMMARY  
PROBLEMS FOR SELF-STUDY QUESTIONS, PROBLEMS, AND CASES

## 8

**Flexible Budgets****and Overhead Control 221**

**flexible budgets** the variety of control techniques  
basic approach of the flexible budget how should activity be budgeted?  
spending and efficiency variances use of standard hours as a budget base  
the scope of flexible budgets **mixed costs** cost functions and simplifications  
nature of mixed costs budgeting mixed costs high-low method

**committed, discretionary, and engineered costs** committed fixed costs  
discretionary fixed costs comparing inputs and outputs engineered variable costs

**nonmanufacturing work measurement** measurement is needed for control  
other examples of measurement budgeting of nonmanufacturing costs  
difficulties in applying work measurement SUMMARY SUGGESTED READINGS  
PROBLEMS FOR SELF-STUDY QUESTIONS, PROBLEMS, AND CASES

## 9

**Standard Absorption Costing:****Overhead Variances 259**

**variable-overhead rate** developing the rate general-ledger entries  
analysis of variable-overhead variances

**fixed overhead and standard absorption costing** developing a unit cost  
 fixed-overhead application and the denominator selecting the denominator level  
 general-ledger entries analysis of fixed-overhead variance  
 nature of fixed-overhead variances weaknesses and dangers in fixed-overhead analysis  
**combined-overhead rate and two-way and three-way analysis** combined rate  
 two-way and three-way analysis SUMMARY SUGGESTED READINGS  
 PROBLEM FOR SELF-STUDY **overhead variances in the ledger**  
 QUESTIONS, PROBLEMS, AND CASES

## 10

### *Income Effects of Alternative Product-Costing Methods 294*

**contribution approach to income measurement** absorption costing and direct costing  
 the central issue: a question of timing PROBLEM FOR SELF-STUDY  
**role of various activity levels in absorption costing** characteristics of capacity  
 normal activity versus expected annual activity selection of activity base  
 practical capacity significance of activity base for product costing and control  
 PROBLEM FOR SELF-STUDY **standard-cost variances and the income statement**  
 proration to achieve actual costs proration of material-price variance  
 the case against proration varieties of proration **an overview of budgetary control**  
 a variance threesome role of denominator variance  
 relationship of volume and denominator variances PROBLEM FOR SELF-STUDY  
 SUMMARY SUGGESTED READINGS QUESTIONS, PROBLEMS, AND CASES  
**special review material for chapters 7 through 10**

## 11

### *Relevant Costs and the Contribution Approach to Decisions 336*

**meaning of relevance** historical costs and predictions  
 qualitative and quantitative factors  
**illustration of relevance: choosing activity levels** the special order  
 fixed expenses and unit costs short run and long run reports for decision making  
**contribution approach to pricing** superiority of the contribution approach  
 the contribution approach or absorption costing? need for clear information  
 the Robinson-Patman Act impact on behavior costs as substitutes for the market  
**other illustrations of relevance and the contribution approach**  
 contribution per unit of constraining factor make or buy, and idle facilities  
 essence of make or buy: utilization of facilities beware of unit costs  
**irrelevance of past costs** obsolete inventory regular inventory opportunity cost  
 book value of old equipment examining alternatives over the long run  
**the problem of uncertainty** SUMMARY PROBLEM FOR SELF-STUDY  
 APPENDIX A: Cost Terms Used for Different Purposes  
 APPENDIX B: Cost-Plus for Setting Prices QUESTIONS, PROBLEMS, AND CASES

## SECTION THREE

### *Special Topics for Further Study*

# 12

## *Cost Analysis and Capital Budgeting 375*

**contrasts in purpose of cost analysis** **definition of capital budgeting**  
**urgency and persuasion** **discounted cash flow** time value of money  
 internal rate of return explanation of compound interest  
 depreciation and discounted cash flow net present-value model assumptions of model  
**comparison of net present-value and internal-rate models** **dealing with uncertainty**  
**applicability to nonprofit organizations** **inflation and capital budgeting**  
**analysis of typical items under discounted cash flow** **payback**  
**accounting rate of return: conflict of models** the basic computation  
 evaluation of performance **administration of capital budgets** SUMMARY  
 PROBLEM FOR SELF-STUDY APPENDIX A: Accrual Accounting Rate-of-Return Model  
 fundamental model the denominator: investment base initial investment as a base  
 current assets as a part of investment base danger of understating investment  
 accounting model is an averaging technique conflict of concepts and purposes  
 uneven cash flows postaudit understandability  
 APPENDIX B: Comparison of Decision Models nonuniform cash inflows  
 the bail-out factor: a better approach to payback  
 annuity formula and payback reciprocal limitations of payback reciprocal  
 relationships of payback reciprocal to rate of return accounting rates and internal rates  
 APPENDIX C: Internal Rate of Return Using Trial-and-Error Methods  
 QUESTIONS, PROBLEMS, AND CASES

# 13

## *A Closer Look at Capital Budgeting 424*

**income tax factors** importance of income taxes  
 timing and different depreciation methods the best depreciation method  
 effects of income taxes on cash flow investment tax credit  
**net present value or internal rate of return?** conflict of ranking techniques  
 unequal lives and reinvestment equipment replacement reinvestment outlook  
**applications of net present value** rationing capital  
 excess present-value index or net present value?  
 mutually exclusive alternatives and budget constraints investment indivisibilities  
 recapitulation **minimum desired rate of return: cost of capital** importance of concept  
 complexity of measuring computation of cost of capital debt and preferred stock

common stock retained earnings weighted-average cost of capital  
 degree of risk or uncertainty portfolio analysis SUMMARY SUGGESTED READINGS  
 PROBLEMS FOR SELF-STUDY APPENDIX: The Financial Lease  
 QUESTIONS, PROBLEMS, AND CASES

## 14

### *Inventory Planning, Control, and Valuation 462*

**characteristics of inventories** need for inventories inventory records and control  
**relevant costs for inventory decisions** **choice of order quantity** how much to order?  
 order-size formula **implications for accountants** cost estimates and prediction errors  
 impact on human behavior difficulties of cost estimation **safety stocks**  
 when to order? minimum inventory: safety allowance for fluctuations in demand  
 computation of safety stock **emphasis on optimality**  
**control classifications: the ABC method** **the mechanics of the system**  
 fixing responsibility internal check purchase records factory usage  
**inventory-valuation methods** purpose of discussion of inventory methods  
 the question of timing LIFO versus FIFO SUMMARY PROBLEMS FOR SELF-STUDY  
 QUESTIONS, PROBLEMS, AND CASES

## 15

### *Cost Allocation: An Introduction 494*

**the general process of allocation** **cost pools and allocation bases**  
 general use of pools intermediate and final objectives cost allocation base  
 Cost Accounting Standards Board **allocation for planning and controlling**  
 dual allocation beware of full reallocation of actual costs  
 how to allocate for planning and control **multiple purposes of cost allocation**  
 overlapping purposes effects on decisions  
**criteria of equity, fairness, and benefits received** ability to bear fairness for pricing  
 fairness or equity fairness and benefits received  
**motivation and partial or full allocation** SUMMARY PROBLEM FOR SELF-STUDY  
 QUESTIONS, PROBLEMS, AND CASES

## 16

### *A Closer Look at Cost Allocation 520*

**the contribution approach to cost allocation**  
 revenues, variable costs, and contribution margins unallocated costs  
 contribution controllable by segment managers  
 contribution by segments and income before income taxes

**service department cost allocation** direct reallocation step method  
 reciprocal services **number of cost pools** nature of homogeneity  
 plant-wide rate versus departmental rates factors affecting homogeneity  
 intermediate cost pools different bases for different departments  
**choosing allocation bases** SUMMARY PROBLEMS FOR SELF-STUDY  
 QUESTIONS, PROBLEMS, AND CASES

## 17

### *Joint-Product Costs and By-Product Costs 548*

**methods of allocating joint costs to products** nature of joint-product cost  
 physical measures net realizable value costs beyond split-off  
 costing joint products at realizable values **irrelevance of joint costs in decision making**  
 sell or process further pricing decisions **accounting for by-products**  
 problems of definition accounting methods for by-products  
 comparison of the methods by-products used internally by-products used in petroleum  
 SUMMARY SUGGESTED READINGS PROBLEM FOR SELF-STUDY  
 APPENDIX A: Alternative to Net Realizable Value  
 APPENDIX B: By-Products and Separable Costs QUESTIONS, PROBLEMS, AND CASES

## 18

### *Process Costing: A Type of Product Costing 576*

**general characteristics of process costing** all product costing is averaging  
 equivalent units: the key **weighted-average and FIFO** beginning inventory  
 physical flow and equivalent units application to products inter-departmental transfers  
 effect of transfers: modification of FIFO journal entries for transfers pitfalls to avoid  
**standard costs and process costs** standards are useful  
 computations under standard costing **additional aspects of process costing**  
 estimating degree of completion overhead and predetermined rates  
 overhead and cost flow SUMMARY PROBLEMS FOR SELF-STUDY  
 QUESTIONS, PROBLEMS, AND CASES

## 19

### *Spoilage, Waste, Defective Units, and Scrap 603*

**terminology spoilage in general** management implications and factor combination  
 normal spoilage abnormal spoilage general accounting procedures for spoilage

**process-cost accounting procedures and spoilage**

distinguish between normal and abnormal spoilage base for computing normal spoilage  
 weighted-average and FIFO interim fluctuations in spoilage rates

**job costing and spoilage defective units accounting for scrap**

**comparison of accounting for spoilage, defective work, and scrap**

**some applications to standard costs** shrinkage and waste scrap spoilage

SUMMARY PROBLEMS FOR SELF-STUDY QUESTIONS, PROBLEMS, AND CASES

## 20

### *Accounting for Payroll 631*

**government impact** complexity of payroll accounting withholding taxes

other withholdings **fringe benefits** large size of fringe benefits

timing of cost recognition **employer payroll taxes: theory and practice**

**illustration of payroll accounting incentive plans** objective of incentives

accounting for incentive plans **payroll bank account** SUMMARY

PROBLEM FOR SELF-STUDY QUESTIONS, PROBLEMS, AND CASES

## 21

### *Accounting Systems and Internal Control 647*

**internal control: definition checklist for internal control illustrations**

McKesson & Robbins fraud: the limitations of systems using the checklist

inventory shrinkage retail method of inventory control

effects of computers on internal check SUMMARY PROBLEM FOR SELF-STUDY

APPENDIX: Factory Ledgers classification and coding branch ledger

QUESTIONS, PROBLEMS, AND CASES

## 22

### *Decentralization and Transfer Pricing 673*

**nature of decentralization** relative freedom to make decisions

benefits of decentralization costs of decentralization comparison of benefits and costs

**profit centers** confusion of terms size and number of centers

**three problems of systems design and decentralization objectives of transfer pricing**

nature of transfer prices choosing transfer prices **market prices**

appeal of market prices pitfalls in market prices distress prices

**general rule for transfer pricing?** outlay cost and opportunity cost imperfect markets

organization as a whole **alternatives to market prices** full-cost bases

cost-plus as a synthetic market price variable-cost plus lump-sum  
 prorating the overall contribution dual pricing **taxes and tariffs why profit centers?**  
**accounting entries for transfers** SUMMARY SUGGESTED READINGS  
 PROBLEM FOR SELF-STUDY APPENDIX: Economic Analysis of Transfer Pricing  
 QUESTIONS, PROBLEMS, AND CASES

## 23

### *Segment Performance Measurement 709*

**overview of problems of design** measure that represents top-management objectives  
 role of investment ROI as a tool for management ROI or residual income?  
**distinction between managers and investments** role of budget  
 controllable performance **definitions of income and investment** contribution approach  
 allocating costs and assets to divisions possible investment bases  
 comparison of asset and equity bases **measurement alternatives for investments**  
 disposal or continuance disposal or continuance or expansion  
 evaluation of performance nature of replacement cost total present value  
 approximation of replacement cost why historical cost?  
 general price-level adjustments plant and equipment: gross or net?  
**consistency between models** compound interest and compatibility  
 residual-income effects **choosing desired rates of return pitfalls in current practice**  
 SUMMARY PROBLEMS FOR SELF-STUDY QUESTIONS, PROBLEMS, AND CASES

## 24

### *Decision Models, Uncertainty, and the Accountant 751*

**characteristics of uncertainty** decisions under certainty  
 decisions under risk or uncertainty expected value and standard deviation  
 the accountant and uncertainty **coping with uncertainty** general approach to uncertainty  
 buying perfect information buying imperfect information cost-benefit is paramount  
 expected monetary value and utility SUMMARY SUGGESTED READINGS  
 QUESTIONS, PROBLEMS, AND CASES

## 25

### *Determination of Cost Behavior Patterns 777*

PART ONE **cost estimation and cost prediction**  
**general approach to approximating cost functions**

independent and dependent variables scatter diagrams  
**objectives provide the framework linearity and cost functions**  
**nonlinearity and cost functions** step-function costs examples of nonlinearity  
width of steps **industrial-engineering approach analysis of accounts**  
a necessary first step **high-low method representative marginal or incremental cost**  
**visual fit** PROBLEM FOR SELF-STUDY PART TWO **presentation of results**  
**choosing among regressions criterion 1: economic plausibility**  
**criterion 2: goodness of fit** use of tests fixed-cost component  
**criterion 3: specification analysis** linearity and relevant range constant variance  
independence normality no multicollinearity SUMMARY SUGGESTED READINGS  
PROBLEMS FOR SELF-STUDY APPENDIX: Regression Analysis **least squares**  
**correlation standard error of estimate sampling errors and regression coefficients**  
testing for significance of a relationship confidence intervals and *t*-values  
**multiple regression** improving accuracy illustration of technique  
QUESTIONS, PROBLEMS, AND CASES

## 26

### *Variances:*

#### *Mix, Yield, and Investigation 832*

PART ONE **sales mix variances** product-by-product analysis use by managers  
higher managers mix and quantity variance sales mix and p/v charts  
PROBLEM FOR SELF-STUDY PART TWO **production yield variances**  
the production setting expectations as a frame of reference  
meaning of the usual analysis more elaborate analysis PROBLEM FOR SELF-STUDY  
PART THREE **the decision to investigate** types of deviations  
difficulties in analysis of variances comparison of costs and benefits  
role of probabilities practical approach statistical quality control SUMMARY  
SUGGESTED READINGS PROBLEM FOR SELF-STUDY  
QUESTIONS, PROBLEMS, AND CASES

## 27

### *Cost Accounting and Linear Programming 866*

**the linear-programming model** single constraint building the model graphic solution  
trial and error **substitution of scarce resources**  
**implications for managers and accountants** sensitivity analysis effects of other costs  
shadow prices assumptions and limitations **simplex method** SUMMARY  
SUGGESTED READINGS PROBLEM FOR SELF-STUDY  
QUESTIONS, PROBLEMS, AND CASES

# 28

## *Cost Accounting in Professional Examinations 891*

**review for examinations** divergent terminology alternative solutions  
**alternate general-ledger treatments standard costs spoilage** SUMMARY  
SUGGESTED READINGS QUESTIONS, PROBLEMS, AND CASES

## SECTION FOUR

### *Appendixes*

# A

## *Cost Accounting Standards Board 903*

# B

## *Notes on Compound Interest and Interest Tables 905*

interest interest tables

## *Author Index 915*

## *Subject Index 918*
