Contents

Preface	ix
Chapter 1. Measuring Populations in Person and on The Telephone	
1.1. Components of Telephone Survey Methodology	5
1.2. The Design of a Research Project Investigating Method Effects	9
1.3. <i>Organization of This Monograph</i>	11
1.4. Summary	12
Chapter 2. Sample Designs for Personal and Telephone Interview Surveys	
2.1. National Probability Samples of Housing Units	16
2.2. Attributes of the Population of Telephone Numbers	18
2.3. Alternative Sample Designs for Telephone Numbers	19
2.4. Using an Areal Probability Design as a Base Design for a Telephone Sample	23
2.5. The Stratified Random Telephone Sample	29
2.6. Constructing Sampling Fractions for the Sample Designs	30

2.7. Selecting a Respondent from Sample Households	32
2.8. Summary	37
Chapter 3. Administration of the Surveys	
3.1. Design of the Survey Administration	40
3.2. Results of Calls to Sample Numbers	45
3.3. Number of Calls Made to Sample Numbers	55
3.4. Selection of the Respondent in the Telephone Sample	59
3.5. Response-Nonresponse Analyses of the Surveys	63
3.6. Summary	74
Chapter 4. Response Differences between the Two Modes of Data Collection	
4.1. Preparing for Methodological Comparisons	79
4.2. An Overview of Response Differences between Modes	85
4.3. Characteristics of the Respondents	91
4.4. Reactions of the Respondent to the Interview	97
4.5. Replicate Group Differences within the Telephone Survey	99
4.6. Method Effects in Different Residential Groups	107
4.7. Differences among Demographic Subgroups in Observed Method Effects	110
4.8. Summary	118
Chapter 5. Method Effects Associated with Specific Types of Measures	
5.1. Adapting Response Card Questions for Use in a Telephone Survey	122
5.2. An Analysis of Overall Bias in Estimates of Voting Behavior by Survey Mode	133
5.3. Response Differences for Open-Ended Items	136
5.4. Correlates of the Tendency to Truncate Answers to Open-Ended Items.	140
5.5. Summary	148
Chapter 6. Measurable Sources of Error in the Survey Data	
6.1. Coverage of the United States Household Population by the Two Modes of Surveys	153
6.2. Characteristics of Respondent Households	155

6.3. Sampling Errors on Telephone and Personal Interview Samples	161
6.4. Interviewer Effects within the Telephone Survey	170
6.5. Combining Estimates of Sampling and Interviewer Error	179
6.6. Summary	182
Chapter 7. Sampling and Data Collection Costs for the Surveys	
7.1. Methods of the Cost Analysis	186
7.2. Overall Cost Comparisons	188
7.3. Costs of Selecting the Samples	196
7.4. Pretest Costs	197
7.5. Training and Prestudy Work	198
7.6. Cost of Printed Survey Materials	199
7.7. Ann Arbor Field Office Costs	202
7.8. Interviewer and Supervisor Costs during the Field Period	203
7.9. Costs for Interviewer and Supervisor Travel	203
7.10. Communication Costs	205
7.11. Costs of Administrative Record Keeping	206
7.12. Poststudy Activities	206
7.13. Appropriate Uses of This Cost Analysis	208
7.14. Summary	210
Chapter 8. Summary and Speculation	
8.1. Sample Coverage	213
8.2. Sample Design	215
8.3. Implementing the Designs	216
8.4. Selection of Respondents within Households	217
8.5. Differences between Modes: Response and Nonresponse	218
8.6. Costs and Benefits	223
8.7. Future Work	224
8.8. Future Developments in Survey Research	227
Appendix I. Telephone Survey Questionnaire Study of Telephone Survey Methodology	229
Appendix II. Unweighted Responses to Questions by Mode of Interview	269

**Appendix III. A Comparison of Two Telephone
Sample Designs**

A.III.1. Disposition of Sample Numbers in the Two Designs	333
A.III.2. Sampling Variance of Estimates from the Two Designs	338
A.III.3. A Variance-Cost Comparison of the Two Designs	341
A.III.4. Summary and Conclusions	343

Appendix IV. Calculation of Sampling Errors 345**References** 349**Index** 353
