Contributors	xiii
Preface	xviii
<b>Part One Principles of phosphorus distribution: chemistry, geochemistry, mineralogy, biology</b>	<b>1</b>
1. The chemistry of phosphorus	3
<i>D. Bryant</i>	
1.1 Introduction	3
1.2 Atomic properties	4
1.3 Electronic structure and bonding	4
1.4 Phosphorus Compounds	5
References	17
2. The geochemistry and mineralogy of phosphorus	20
<i>E. Valsami-Jones</i>	
2.1 Introduction	20
2.2 Geochemical abundance and distribution of phosphorus	22
2.3 Phosphate minerals	32
References	44
3. The biology of phosphorus	51
<i>C. Dobrota</i>	
3.1 Introduction	51
3.2 Phosphate acquisition	51
3.3 Transport and translocation	52
3.4 Phosphate assimilation	62
References	74

<b>Part Two</b>	<b>Phosphorus in the environment</b>	<b>77</b>
4.	Background and elevated phosphorus release from terrestrial environments	79
	<i>P.M. Haygarth &amp; L.M. Condon</i>	
4.1	Introduction	79
4.2	Background release	80
4.3	Elevated release	81
4.4	Conclusion	87
	References	87
5.	Phosphorus and crop nutrition: principles and practice	93
	<i>T.D. Evans &amp; A.E. Johnston</i>	
5.1	Introduction	93
5.2	Phosphorus resources	95
5.3	Phosphorus fertilisers	96
5.4	Phosphorus in soils	98
5.5	Phosphorus nutrition of plants	103
5.6	Fertilisation practices	110
5.7	Phosphorus fertilisation and environmental issues	113
5.8	Concluding remarks	115
	References	116
6.	Transfer of phosphorus to surface waters; eutrophication	120
	<i>S. Burke, L. Heathwaite and N. Preedy</i>	
6.1	Introduction	120
6.2	Evidence of sources and pathways of P delivery to water	122
6.3	Transfer mechanisms and control	131
6.4	Management minimisation	138
	References	140
7.	Environmental chemistry of phosphonic acids	147
	<i>B. Nowack</i>	
7.1	Introduction	147
7.2	Analysis of phosphonates	150
7.3	Exchange reactions	151
7.4	Degradation	157
7.5	Speciation	161
7.6	Environmental behavior	163
7.7	Conclusions	165
	Acknowledgements	165
	References	166
8.	Phosphate pollution: a global overview of the problem	174
	<i>A.M. Farmer</i>	
8.1	Introduction	174
8.2	The European Union	176

8.3	The river Rhine: case study	181
8.4	United States	183
8.5	Australia	185
8.6	Japan	186
8.7	South and East Asia	188
8.8	Africa	189
8.9	The Antarctic	190
8.10	Conclusions	190
	References	190

### **Part Three Phosphorus removal from water and waste water: principles and technologies 193**

9.	Principles of phosphate dissolution and precipitation	195
	<i>P.G. Koutsoukos &amp; E. Valsami-Jones</i>	
9.1	Introduction	195
9.2	Equilibrium and kinetics: theory, mechanisms and equations	196
9.3	Applications relevant to the precipitation of calcium phosphates	208
9.4	Applications relevant to the dissolution of calcium phosphates	234
9.5	Metal phosphates, dissolution and precipitation applications	238
9.6	Concluding remarks	239
	References	241
10.	Waste water treatment principles	249
	<i>S.A. Parsons &amp; T. Stephenson</i>	
10.1	Introduction	249
10.2	Waste water treatment processes	250
10.3	Sludge treatment and disposal	257
	References	259
11.	Chemical phosphorus removal	260
	<i>S.A. Parsons &amp; T.A. Berry</i>	
11.1	Introduction	260
11.2	Phosphorus removal with metal salts	261
11.3	Concluding remarks	269
	References	270
12.	Biological phosphorus removal	272
	<i>J.W. McGrath &amp; J.P. Quinn</i>	
12.1	Introduction	272
12.2	Process design of biological phosphorus removal plants	274
12.3	Polyphosphate	276
12.4	Isolation and identification of polyphosphate-accumulating microorganisms from the EBPR process	282
12.5	New approaches to biological phosphate removal	283
	Acknowledgements	286
	References	286

13.	A review of solid phase adsorbents for the removal of phosphorus from natural and waste waters	291
	<i>G.B. Douglas, M.S. Robb, D.N. Coad &amp; P.W. Ford</i>	
13.1	Introduction	291
13.2	Adsorbent materials	293
13.3	Selection of an appropriate phosphorus adsorbent	307
13.4	Concluding remarks	311
	References	311
14.	Removing phosphorus from sewage effluent and agricultural runoff using recovered ochre	321
	<i>K.V. Heal, K.A. Smith, P.L. Younger, H. McHaffie &amp; L.C. Batty</i>	
14.1	Introduction	321
14.2	Formation and properties of ochre	322
14.3	Capacity of ochre for phosphorus removal	325
14.4	Future developments	330
14.5	Conclusions	333
	Acknowledgements	334
	References	334
<b>Part Four</b>	<b>Phosphorus recovery for reuse: principles, technologies, feasibility</b>	<b>337</b>
15.	Phosphorus recovery in the context of industrial use	339
	<i>I. Steén</i>	
15.1	Introduction	339
15.2	Why recovery?	341
15.3	Possible technical-industrial pathways	344
15.4	Recycling by the phosphate industry	348
15.5	Future prospects	353
	References	354
16.	Fluid dynamic concepts for a phosphate precipitation reactor design	358
	<i>D. Mangin &amp; J.P. Klein</i>	
16.1	Introduction	358
16.2	Fluid dynamics and mixing	359
16.3	Interaction between mixing and primary nucleation	366
16.4	Interaction between mixing and other precipitation mechanisms	373
16.5	Stirred vessels	379
16.6	Fluidised bed reactors	388
16.7	Air mixing	392
16.8	Modelling of precipitation reactors	394
16.9	Conclusion and perspectives	397
16.10	Notation	398
	References	400

17.	Phosphorus recovery via struvite production at Slough sewage treatment works, UK – a case study	402
	<i>Y. Jaffer &amp; P. Pearce</i>	
17.1	Introduction	402
17.2	Site description	403
17.3	Phosphorus forms through the sewage treatment process	405
17.4	Phosphorus mass balance	407
17.5	Bench-scale work	411
17.6	The reactor	415
17.7	Preliminary results	419
17.8	Quality of struvite	419
17.9	Further work	424
17.10	Proposed use of product	425
	References	426
	Appendix	427
18.	Phosphorus recovery trials in Treviso, Italy – theory, modelling and application	428
	<i>P. Battistoni</i>	
18.1	Introduction	428
18.2	Italian sewer waste water and WWTPs	429
18.3	Improvement of BNR technologies and performance	437
18.4	Phosphorus recovery test	439
18.5	FBR and air stripping	443
18.6	Case study: Treviso city waste water treatment plant	455
18.7	Long term performance of the reactor in Treviso	463
18.8	Perspective and conclusions	465
	Acknowledgements	467
	References	467
19.	The case study of a phosphorus recovery sewage treatment plant at Geestmerambacht, Holland – design and operation	470
	<i>P.G. Piekema</i>	
19.1	Introduction	470
19.2	Overview of the plant before upgrading	471
19.3	Key features of the plant after upgrading	472
19.4	Design philosophy of the P-recovery process	475
19.5	Design of the biological part of the side-stream	478
19.6	Design of Crystalactor® in the side-stream	484
19.7	Control of sludge settling	490
19.8	Control of nitrogen removal	491
19.9	Full scale results	493
19.10	Cost	494
19.11	New developments	495
	References	495

20.	Full scale struvite recovery in Japan	496
	<i>Y. Ueno</i>	
20.1	Introduction	496
20.2	Full scale struvite recovery in Japan	497
20.3	Summary	506
	References	506
21.	Phosphorus recovery from unprocessed manure	507
	<i>P. Hobbs</i>	
21.1	Introduction	507
21.2	Profile of phosphorus species in different livestock manure	508
21.3	Extraction of phosphorus from wastes and manure	511
21.4	Concluding remarks	518
	References	519
22.	Scenarios of phosphorus recovery from sewage for industrial recycling	521
	<i>A. Klapwijk &amp; H. Temmink</i>	
22.1	Introduction	521
22.2	Wastewater and sludge treatment	522
22.3	P-recovery from the end product of sludge treatment	524
22.4	P-extraction before sludge treatment	525
22.5	Discussion	527
22.6	Conclusions	527
	References	528
23.	Phosphate recycling: regulation and economic analysis	529
	<i>J. Köhler</i>	
23.1	Introduction	529
23.2	Why recycle phosphates?	530
23.3	Regulation and economics of WwTPs and phosphates	532
23.4	A system approach	540
23.5	Conclusions: economics and policies	543
	References	543
<b>Part Five</b>	<b>Novel biotechnologies</b>	<b>547</b>
24.	Bacterial precipitation of metal phosphates	549
	<i>L.E. Macaskie, P. Yong &amp; M. Paterson-Beedle</i>	
24.1	Introduction	549
24.2	Heavy metal bioremediation: why select a phosphate-based precipitation process?	551
24.3	Case history: metal phosphate biomineralization by <i>Serratia</i> sp.	553
24.4	A conceptual model for phosphate biomineralization	557
24.5	A quantitative model for metal phosphate biomineralization	560
24.6	Phosphate biomineralization for the removal of transuranic elements: the need for nucleation processes	561

24.7	Co-precipitative metal removal	562
24.8	Use of metal phosphate as an ion exchanger	564
24.9	Use of alternative phosphate donors	566
24.10	Use of inorganic phosphate as the phosphate donor	569
24.11	Conclusions	573
	References	575
25.	Developments in the use of calcium phosphates as biomaterials	582
	<i>R.L. Sammons, P.M. Marquis, L.E. Macaskie, P. Yong &amp; C. Basner</i>	
25.1	Introduction	582
25.2	The demand for bone substitute materials	582
25.3	The ideal bone-substitute: what it has to do?	583
25.4	Successful applications of calcium phosphates in biomaterials	586
25.5	Chemistry and manufacture of biomedical calcium phosphates	590
25.6	Reactions of biomedical phosphates in the body	597
25.7	Future developments	601
25.8	Concluding remarks	603
	References	604
26.	Agronomic-based technologies towards more ecological use of phosphorus in agriculture	610
	<i>W.J. Horst &amp; M. Kamh</i>	
26.1	Introduction	610
26.2	Defining optimum soil-P levels	611
26.3	Phosphorus dynamics in soils	611
26.4	Phosphorus utilisation efficiency of plants	612
26.5	Agronomic practices	614
26.6	Conclusion	622
	References	622
27.	Biodegradation of organophosphate nerve agents	629
	<i>M. Shimazu, W. Chen &amp; A. Mulchandani</i>	
27.1	Introduction	629
27.2	Microbial degradation	631
27.3	Enzymatic detoxification of OP neurotoxins	632
27.4	Whole cell detoxification of OP neurotoxins	634
27.5	Modifications of specificity and activity	636
27.6	Organophosphorus acid anhydrolase	638
27.7	Conclusion	639
	Acknowledgements	639
	References	639
	Index	643
