

Theory Reasoning in Connection Calculi

Springer

Contents

1. Introduction	1
1.1 Theory Reasoning: Motivation	1
1.2 Historical Notes	5
1.3 Further Reading	8
1.4 Overview and Contributions of this Book	9
2. Logical Background	15
2.1 Preliminaries	15
2.2 Syntax of First-Order Logic	17
2.3 Semantics of First-Order Logic	20
2.4 Clause Logic	27
2.4.1 Transformation into Clause Logic	27
2.4.2 Herbrand Interpretations	30
2.4.3 Unification	34
2.5 Theories	36
2.5.1 Sample Theories	38
2.5.2 Properties of Theories	41
2.5.3 Universal Theories and Herbrand Theory Interpretations	44
3. Tableau Model Elimination	49
3.1 Clausal Tableaux	49
3.2 Inference Rules and Derivations	52
3.2.1 Answers	57
3.2.2 Clausal Tableaux vs. Branch Sets	58
3.3 Improvements	60
3.3.1 Independence of the Computation Rule	60
3.3.2 Regularity	61
3.3.3 Factorization	62
3.3.4 Reduction Steps	63
4. Theory Reasoning in Connection Calculi	65
4.1 Basics of Theory Reasoning	65
4.1.1 Total and Partial Theory Reasoning	68
4.1.2 Instances of Theory Reasoning	72

4.2	A Total Theory Connection Calculus	80
4.2.1	Theory Refuting Substitutions	81
4.2.2	Definition of a Total Theory Connection Calculus	85
4.2.3	Soundness of TTCC	89
4.3	Theory Model Elimination — Semantical Version	90
4.3.1	Motivation	90
4.3.2	Definition of Theory Model Elimination	92
4.3.3	Relation to TTCC-Link	95
4.4	Total Theory Model Elimination — MSR-Version	101
4.4.1	Complete and Most General Sets of $\mathcal{T}$ -Refuters	102
4.4.2	Definition of TTME-MSR	106
4.4.3	Soundness and Answer Completeness of TTME-MSR	109
4.4.4	Related Work	112
4.4.5	A Sample Application: Terminological Reasoning	113
4.5	Partial Theory Model Elimination - Inference Systems Version	115
4.5.1	Theory Inference Systems	118
4.5.2	Definition of PTME- $\mathcal{I}$	120
4.5.3	Soundness and Answer Completeness	123
4.5.4	An Application: Generalized Model Elimination	128
4.6	Restart Theory Model Elimination	129
4.6.1	Definition of Restart Theory Model Elimination	130
4.6.2	Soundness and Answer Completeness	135
4.6.3	Regularity and First-Order Completeness	137
	Other Refinements	139
5.	Linearizing Completion	141
5.1	Introduction	142
5.1.1	Linearizing Completion and Theory Reasoning	142
5.1.2	Related Work	143
5.1.3	Relation to Knuth-Bendix Completion	147
5.1.4	Informal Description of the Method	148
5.1.5	Linearizing Completion and Resolution Variants	153
5.1.6	Preliminaries	157
5.2	Inference Systems	157
5.2.1	Initial Inference Systems	160
5.2.2	Completeness of Initial Inference Systems	162
5.2.3	Subderivations	163
5.3	Orderings and Redundancy	165
5.3.1	Orderings on Nested Multisets with Weight	165
5.3.2	Derivation Orderings	167
5.3.3	Redundancy	168
5.4	Transformation Systems	171
5.4.1	Limit Inference Systems	174
5.4.2	Fairness and Completion	175
5.5	Complexity-Reducing Transformation Systems	177

5.6	Completeness	180
5.6.1	Ground Completeness	181
5.6.2	The Link to Theory Model Elimination	183
5.6.3	First-Order Completeness	185
5.7	Sample Theories	186
5.7.1	Equality and Paramodulation	186
5.7.2	Equality plus Strict Orderings	189
5.7.3	Modal Logics	190
6.	Implementation	193
6.0.4	SCAN-IT	193
6.0.5	LC	194
6.1	PROTEIN	195
6.1.1	High Inference Rate Based Theorem Proving	195
6.1.2	The PTP Implementation Technique	196
6.2	Practical Experiments	200
7.	Conclusions	207
A.	Appendix: Proofs	211
A.1	Proofs for Chapter 4 — Theory Reasoning	211
A.1.1	Completeness of TTME-MSR	215
A.1.2	Ground Completeness of PTME-I	235
A.2	Proofs for Chapter 5 — Linearizing Completion	239
A.2.1	Section 5.2 — Inference Systems	239
A.2.2	Section 5.3 — Orderings and Redundancy	241
A.2.3	Section 5.4 — Transformation Systems	246
A.2.4	Section 5.5 — Complexity-Reducing Transformation Systems	250
A.2.5	Section 5.6 — Completeness	257
B.	What is Where?	263
	List of Figures	267
	Bibliography	269
	Index	281
